PROFESSIONAL SUMMARY

Data Operations Analyst with 5 years of experience in the financial and healthcare industries, specializing in ETL development, data pipeline optimization, and operational data management. Skilled at ensuring data quality, automating workflows, and delivering reliable datasets for business operations. Proficient in SQL, Python, cloud platforms, and BI tools, with experience improving efficiency and scalability in fast-paced environments.

TECHNICAL SKILLS

Data Operations & ETL: ETL pipeline development, Data cleansing, Data integration, Data validation, Workflow automation, Data quality monitoring

Databases & Cloud: SQL Server, MySQL, PostgreSQL, Azure SQL DW, AWS Redshift, AWS S3, Azure Data Factory, GCP basics

Data Visualization & Reporting: Tableau, Power BI, Excel (Pivot Tables, VLOOKUP/XLOOKUP, Conditional Formatting, VBA)

Programming: Python (pandas, NumPy), SQL, Jupyter Notebook

Workflow & Collaboration: Apache Airflow, Git/GitHub, Jira, Confluence, Agile (Scrum)

Operating Systems: Windows, Linux

PROFESSIONAL EXPERIENCE

Data Operations Analyst | Discover Financial, IL, USA

Aug 2024 – Present

- Designed and maintained **scalable ETL pipelines** in Python and SQL, ingesting and processing large datasets from AWS S3, Redshift, and internal APIs, ensuring high availability for operational reporting.
- Implemented **data quality monitoring and automated validation checks**, achieving **99.9% accuracy** and reducing manual corrections.
- Automated credit processing workflows, cutting manual review time by **35%** and reducing loan processing turnaround from 48 hours to **under 18 hours**.
- Developed **operational dashboards in Tableau and Excel** to track KPIs, monitor system performance, and identify workflow bottlenecks.
- Optimized data architecture and pipeline design to support **2x growth in monthly loan applications** without additional infrastructure costs.
- Documented all data operations processes and pipeline standards in Confluence, improving team knowledge sharing and compliance.
- Led ad-hoc operational projects to troubleshoot data issues, enhance workflow efficiency, and support business operations.

Key Projects / Achievements:

- Streamlined ETL pipeline for credit data, reducing data processing time by **40%**.
- Built dynamic dashboards to monitor loan processing performance, resulting in faster decision-making for operations teams.
- Mentored 3+ junior analysts on data pipeline best practices and workflow automation.

Data Operations Analyst | Hexaware, India

Mar 2020 – Jul 2023

- Built and managed **ETL pipelines** in Python and Azure Data Factory to integrate EHR and insurance claims data into Azure SQL DW.
- Implemented **automated data validation and reconciliation checks**, reducing operational errors by **60%**.
- Designed a **star schema data repository** linking patients, encounters, and claims, improving reporting speed and operational efficiency.
- Developed **Power BI dashboards** to track real-time claim processing metrics and denial trends, cutting days-in-AR from 45 to **28 days**.
- Automated repetitive operational tasks, including charge matching and reporting, improving team productivity.
- Participated in Agile sprints, code reviews, and cross-functional stakeholder meetings to streamline operations.

Key Projects / Achievements:

- Reduced manual claim reconciliation time by **60%** through automation and data integration.
- Designed operational dashboards that provided actionable insights for claims management and process improvement.
- Led process optimization initiatives, enabling faster reporting and enhanced data reliability for business teams.

EDUCATION:

Master of Science in Computer Science

Lewis University – Romeoville, IL | Aug 2023 – May 2025
