

Vishalsinh Rana

Data Analyst

Vishalsinhrana.career@gmail.com | [LinkedIn](#) | +1 (703)-822-7794 | Florida, 33763

Summary

- Around 4 years of experience as a Data Analyst with an understanding of Data Modeling, Evaluating Data Sources, and understanding of Data Warehouse/ Data Mart Design, and Client/Server applications.
- Good Knowledge of the Software Development Life Cycle (SDLC), Agile, and Waterfall Methodologies.
- Understanding of different python IDEs such as Visual Studio Code and Jupyter Notebook.
- Advanced knowledge of Python and R libraries such as NumPy, Pandas, Matplotlib, SciPy, and ggplot2.
- Proficient in designing stunning visualizations using Tableau and Power BI software and publishing and presenting dashboards, and Storylines on web and desktop platforms.
- Capable of all phases of data mining, data collection, data cleaning, Data wrangling developing models, validation, and visualization.
- Extensive background in Python development and web/application programming.
- Knowledge of various Relational Database Management Systems (RDBMS) such as MySQL and SQL Server.
- Experience with cloud technology, including GCP and AWS.

Skills

Methodologies	SDLC, Agile, Waterfall
Languages	Python, R, SQL
Frameworks/IDEs	Django, Flask, Visual Studio Code, Jupyter Notebook, PyCharm
Cloud Services	AWS, GCP
Packages & Tools	NumPy, Pandas, Web2py, CherryPy, Matplotlib, SciPy, Seaborn, ggplot2, dplyr, tidyr, plotly
Web Technologies	HTML, CSS, JavaScript, Bootstrap, jQuery, Ajax, JSON, XML
Databases	MySQL, Oracle, T-SQL, Monet DB, Teradata, PostgreSQL, SQL Server, ETL (SSIS)
Visualization Tools	Tableau Desktop, Tableau Server, Tableau Reader, Power BI, Microsoft Excel
Machine Learning	Regression, Random Forest, Support Vector Machine, Logistic Regression, k-Means, Clustering, Classification, SVM, KNN
Version Control	Git, GitHub
Other Skills	Data Cleaning, Statistics, Data Modeling, Data Wrangling, Presentation Skills, Data Conversion, Data Warehousing, Data Architecture, Database Building, Data Governance, Data Analysis, Data Wrangling, Application Development, Analytical Skills, Information Management, Operations Support, Performance Management, Quantitative Analysis, Ad hoc Analysis, Statistical Analysis, Financial Analysis, Pivot Tables
Other Tools	MS Office Suite (Microsoft Word, PowerPoint, MS Visio), OLAP & OLTP, Unify, SAS, KPI, Strategy
Operating Systems	Windows, Linux

Education

- Bachelor of Computer Science and Engineering (Data Science) | MPSTME, India
- Bachelor of Cybersecurity Management and Analytics | Virginia Tech, VA, USA
- Masters in Global Business Analytics | Virginia Tech, VA, USA

Experience

State Street, USA | Aug 2024 - Current

Data Analyst

- Extracted, cleansed, and analyzed extensive financial datasets from diverse sources, including transaction records, financial statements, and market databases at State Street.
- Developed and maintained robust data models to identify patterns and trends, facilitating operational and financial decision-making within an Agile project development framework.
- Led projects using Agile methodology, ensuring effective collaboration within cross-functional teams.
- Created categorization models in Python to identify customer loss and metrics to predict customers before discontinuation for improved retention in the financial domain.
- Managed sensitive financial data, conducted standardization, and formatting using Microsoft Excel and R before importing into State Street's centralized database.
- Published and maintained Power BI workspaces, managed data refresh schedules, and maintained apps and workbooks.
- Utilized Python, R, and SQL to develop statistical algorithms, including Multivariate Regression, Linear Regression, Logistic Regression, Random Forest models, and Support Vector Machine, for estimating financial risks.
- Applied Random Forest models to identify potential customers for targeted marketing campaigns in the financial sector.
- Analyzed business data primarily using SQL queries and stored procedures in PostgreSQL for comprehensive financial data analysis.
- Consulted with and trained analysts on accessing financial data and optimizing Tableau dashboards.
- Designed interactive dashboards and real-time visualizations using Power BI to showcase key financial KPIs, significantly reducing manual reporting time.
- Ensured data integrity, compliance with regulatory requirements, and adherence to privacy and security standards specific to financial regulations at State Street.
- Assisted the Reporting & Analytics team at State Street with financial data needs, conducting research to support both standard and ad hoc reporting processes.

Ace Infoway, India | Jan 2021 – Jun 2023

Data Analyst

- Designed and developed Relational Database Management, Database Design, and Database Architecture System using PostgreSQL and SQL Server.
- Utilized SciPy, NumPy, and Matplotlib libraries for developing various algorithms. Implemented Tableau advanced charts for multidimensional views, designing and deploying reports with Drill Down, Drill Through, and Drop-down menu options.
- Set up project baselines, branching, merging, and regular backups of source code in GIT. Programmed data listings using SAS, converting MS-Word documents and Excel tables into SAS datasets.
- Executed end-to-end machine learning workflows, including data collection from AWS Snowflake, data preprocessing, feature extraction, modeling, model evaluation, and deployment.
- Applied statistical methods, metrics, and strategic project plans for data collection and validation of data integrity.
- Designed and developed weekly and monthly reports using Excel techniques (Charts, Graphs) and PowerPoint presentations.
- Collaborated with cross-functional teams in troubleshooting and finding innovative solutions for data analysis.
