

SUMMARY

Supply Chain professional with 4+ years of experience in demand forecasting, procurement, and end-to-end supply chain optimization. Proficient in SAP SCM, SAP APO, SAP IBP, and SAP Ariba for integrated planning and execution. Proficient in Python, SQL, Excel, Tableau, and Power BI for data analytics and KPI reporting. Demonstrated success in improving OTIF performance, reducing lead times, and optimizing inventory levels through Lean Six Sigma methodologies and MRP tuning. Knowledgeable at partnering with production, logistics, and finance teams to streamline operations, enhance supplier performance, and ensure seamless global supply continuity.

TECHNICAL SKILLS

Supply Chain Planning & Optimization: SAP SCM, SAP APO, SAP MM, SAP IBP, Demand Planning, Inventory Optimization, MRP (Safety Stock, ROP, MOQ)
Data Analysis & Visualization: Python (Pandas, NumPy), SQL, Excel (Solver, Pivot Tables, VLOOKUP, Dashboards), Tableau, Power BI
ERP & Procurement Systems: SAP Ariba, Oracle SCM Cloud, Procurement Spend Analysis, Supplier Relationship Management (SRM)
Logistics & Inventory Management: SAP WM, TMS, WMS, Freight Optimization, Inventory Replenishment, OTIF/OTD Tracking
Quality & Process Improvement: Lean Six Sigma (Green Belt), Kaizen, RCA, FMEA, Continuous Improvement Initiatives
Project Management & Collaboration: JIRA, MS Teams, Agile, Scrum

PROFESSIONAL EXPERIENCE

Cabot Corporation, USA

Jan 2025 – Current

Supply Chain Analyst

- Designed and implemented procurement planning workflows integrating SAP MM with supplier performance dashboards in Power BI, improving OTIF by 9% and reducing stockouts by 11%, significantly strengthening order fulfillment efficiency across global regions.
- Conducted purchase price variance (PPV) analysis to identify cost-saving opportunities and negotiated supplier contracts, reducing procurement spend by \$450K annually through data-driven supplier selection and strategic sourcing strategies.
- Optimized MRP parameters including safety stock, MOQ, and reorder points (ROP) across multiple materials, enhancing forecast accuracy by 8% (MAPE ↓ from 16% to 8%) and increasing inventory turns from 5.2 to 7.1 cycles per year.
- Utilized Lean methodologies and root cause analysis (RCA) to eliminate supply bottlenecks, improving logistics throughput and reducing lead time by an average of 5.6 days per shipment cycle.
- Automated the 3-way match process using SQL-based reporting dashboards connecting purchase orders, GRNs, and invoices, cutting financial reconciliation time from 6 days to 2 days and improving traceability across procurement systems.

Reliance Industries, India

Mar 2021 – Aug 2023

Supply Chain Analyst

- Improved forecast accuracy by developing Python-based time series forecasting models, reducing MAPE from 22% to 8% and enabling better demand-supply alignment across five business units.
- Managed raw material procurement using SAP APO, optimizing planning parameters and achieving a 12% reduction in working capital while improving material availability by 16% through improved supplier coordination.
- Implemented vendor scorecards and freight analytics dashboards in Power BI to improve OTIF delivery from 84% to 93% and reduce average freight cost per unit by 7%.
- Conducted excess and obsolete (E&O) inventory audits using SQL data extraction and RCA, eliminating ₹6.3 crore of idle stock and increasing overall inventory turnover ratio from 4.8 to 6.4.
- Automated invoice and PO reconciliation through SQL-based scripts, reducing 3-way match cycle time by 35 hours monthly and improving compliance with payment SLAs.

Reliance Industries, India

Feb 2020 – Feb 2021

Supply Chain Assistant

- Supported daily procurement activities through SAP MM including vendor onboarding, PO creation, and logistics tracking, improving vendor compliance rates to 97% and enhancing operational accuracy across five divisions.
- Automated Excel-based approval workflows and validation scripts, cutting invoice processing time from 10 days to 4 days and ensuring accurate reconciliation of over 200 supplier invoices monthly.
- Partnered with logistics and finance teams to identify cost-saving opportunities, optimizing freight routing and vendor selection to achieve a 6% reduction in per-unit transport cost.
- Developed Power BI dashboards to monitor lead times, supplier performance, and procurement KPIs, increasing process visibility and enabling real-time decision-making for 250+ POs.

EDUCATION

Master of Science in Industrial Engineering

Sep 2023 – May 2025

Northeastern University, Boston, MA, USA

Bachelor of Technology in Mechanical Engineering

Aug 2017 – May 2021

Jawaharlal Nehru Technological University, Hyderabad, India

PROJECTS

- Optimization of Raw Material Procurement
- Developed a supplier allocation model optimizing cost, MOQ, and lead time improving procurement profitability by 40% and reducing cycle time by 40%.
 - Analyzed Excel Solver, Gurobi, and LINGO to design a data-driven procurement strategy enhancing sourcing efficiency.

- Multi-Period Production Planning & Facility Siting
- Modeled multi-period production and inventory planning to maximize weekly profit by \$682K through capacity and location optimization.
 - Applied AMPL and LINGO to balance transportation cost, facility siting, and demand fulfillment across regions.

CERTIFICATES

Six Sigma Green Belt, Institute of Industrial and Systems Engineers (IISE)

Mar 2024 - Mar 2027

Supply Chain Foundations: The Essentials Professional Certificate, CSCMP

2025

Excel: Data Analysis, LinkedIn Learning

2025

SQL Fundamentals, SoloLearn

2025

Power BI: Data Analytics Fundamentals, Microsoft Learn

2025
