PROFESSIONAL SUMMARY

Supply Chain Analyst with 3+ years of experience supporting large-scale e-commerce and retail operations through data-driven planning and execution. Specialized in demand forecasting, inventory optimization, safety stock modeling, and omnichannel fulfillment analytics. Strong hands-on expertise in Python, SQL, Excel, ERP systems, and Power BI to analyze POS, logistics, and warehouse data. Proven ability to improve service levels, reduce inventory imbalance, optimize transportation costs, and insight-driven decisions through cross-functional collaboration while supporting S&OP alignment and operational performance improvement initiatives globally.

SKILLS

Supply Chain & Operations Analytics: Demand forecasting, supply planning, inventory optimization, safety stock modeling, order fulfillment analysis, lead-time variability analysis, capacity planning, S&OP support, SKU rationalization

ECommerce & Retail Domain Expertise: Omnichannel fulfillment, last-mile delivery optimization, warehouse operations analytics, reverse logistics, dropshipping models, marketplace operations (Amazon, Shopify), store-to-online inventory alignment

Data Analysis & Reporting: Advanced Excel (Power Query, Pivot Tables, VBA), SQL (joins, CTEs, performance optimization), Python (Pandas, NumPy), KPI design, variance analysis, root cause analysis, ad-hoc reporting

Supply Chain Systems & Tools: ERP systems (SAP MM, Oracle SCM, NetSuite), WMS, TMS, inventory management systems, demand planning tools, POS data integration

Business Intelligence & Visualization: Power BI, Tableau, Looker, dashboard development, executive reporting, trend analysis

Process Improvement & Cost Optimization: Process mapping, bottleneck analysis, cycle time reduction, logistics cost optimization, supplier performance analysis, continuous improvement initiatives

Collaboration & Delivery: Cross-functional coordination (procurement, logistics, merchandising), Agile/Scrum exposure, stakeholder communication, documentation, UAT support, data governance

PROFESSIONAL EXPERIENCE

Supply Chain Analyst, Lowe's

Sep 2024 – Present | Remote, USA

- Designed Power BI dashboards consolidating POS, ERP, and fulfillment data at Lowe's, enabling real-time omnichannel inventory visibility and driving an 18% improvement in on-time customer order fulfillment.
- Applied Python-based data analysis to evaluate regional demand patterns, supporting distribution center forecasting decisions and reducing inventory imbalance across core home-improvement categories by 14%.
- Assessed last-mile delivery performance by analyzing carrier SLA exceptions, enabling corrective actions that reduced late deliveries by 16% during peak promotional and seasonal demand periods.
- Evaluated reverse logistics workflows by analyzing return reason trends and processing times, shortening return cycle time by 17% while protecting resale recovery value across returned merchandise.
- Integrated TMS and ERP datasets to analyze transportation cost drivers, identifying optimization opportunities that reduced logistics spend by 13% without impacting customer delivery commitments.
- Performed capacity-planning analysis for distribution centers, balancing labor availability and throughput constraints to maintain fulfillment SLAs above 97% during sustained order growth periods.
- Collaborated with merchandising and procurement teams to translate KPI trends into replenishment actions, accelerating response to demand shifts and improving decision-making cycles by 15%.

Supply Chain Analyst, Logitech

May 2021 - Jul 2023 | Chennai, India

- Optimized inventory buffers by recalibrating safety stock thresholds across peripherals SKUs, lowering excess inventory exposure by 14% while maintaining consistent service levels during seasonal demand cycles.
- Evaluated supplier lead-time variability using ERP extracts and Excel-based models, enabling planners to adjust order cadence proactively and reduce inbound shipment delays by 15%.
- Leveraged Python-driven data cleansing and Excel analysis on Asia-Pacific distributor sell-in records at Logitech, strengthening replenishment signals and lowering recurring regional stockouts incidents by 18%.
- Analyzed WMS throughput and pick-pack efficiency metrics, identifying operational bottlenecks that contributed to a 13% reduction in average fulfillment cycle time across regional distribution operations.
- Supported S&OP planning cycles by preparing demand-supply alignment reports, enabling procurement and logistics teams to respond faster to forecast deviations across e-commerce fulfillment channels.
- Conducted SKU rationalization using sales velocity and aging analysis, phasing out slow-moving accessories and freeing 11% warehouse capacity for high-demand product categories.
- Developed standardized KPI reporting in Excel tracking inventory turns, fill rate, and backorders, improving leadership visibility and contributing to a 12% improvement in working capital efficiency.

EDUCATION

Master of Science, Trine University
Management of Information Systems

Aug 2023 - May 2025 | IN, USA

Bachelor of Technology, Veltech Institute of Technology and Sciences
Information Technology

Jun 2018 – Mar 2022 | Chennai, India
