

Subhasmita Maharana

Phone no: +1 (234)-282-9019 | Email ID: subhasmitamaharana234@gmail.com

LinkedIn ID: <https://www.linkedin.com/in/subhasmita-maharana23/>

Professional Summary:

- 7+ years of professional experience as a **Data Analyst** delivering measurable business outcomes by transforming raw data into actionable insights that support strategic decision-making.
- Strong expertise in SQL including T-SQL, PostgreSQL, SQL Server, and Snowflake for data extraction, transformation, querying, and performance optimization.
- Extensive experience performing Exploratory Data Analysis (EDA), data profiling, data validation, and data quality checks to ensure reliable analytics and reporting.
- Proven ability to gather business requirements, translate them into analytical solutions, and partner effectively with stakeholders across cross-functional teams.
- Hands-on experience with Power BI including Power Query, DAX, data modeling, star and snowflake design, and Row-Level Security (RLS).
- Experience working with Power BI Service including datasets, workspaces, gateways, dataflows, deployment pipelines, and scheduled refresh management.
- Strong background in building interactive dashboards, KPI scorecards, executive reports, and self-service analytics using Power BI and Tableau.
- Proficient in Python and R for data cleaning, preprocessing, statistical analysis, hypothesis testing, regression modeling, clustering, and forecasting.
- Experience designing and supporting ETL pipelines using Azure Data Factory, Tableau Prep, Power Query, AWS Glue, and Python automation scripts.
- Solid understanding of data warehousing concepts including fact tables, dimension tables, star and snowflake schemas, and analytical performance tuning.
- Hands-on experience with cloud analytics platforms including AWS (S3, Redshift, Lambda, EMR), Azure (Synapse Analytics, Data Factory), and Snowflake.
- Exposure to big data technologies including PySpark, Spark SQL, Hadoop, and distributed data processing concepts.
- Advanced proficiency in Microsoft Excel including Pivot Tables, Power Pivot, XLOOKUP, macros, and reporting automation.
- Experienced working in Agile and Scrum environments with strong skills in documentation, sprint collaboration, version control using Git, and issue tracking with Jira.

Technical Skills:

- **Data Analytics & SQL:** Advanced SQL (T-SQL, PostgreSQL, SQL Server, Snowflake), Stored Procedures, Views, Indexes, Window Functions, Exploratory Data Analysis (EDA), Data Validation, Data Quality Checks
- **BI & Data Visualization:** DAX, Power Query (M), Data Modeling, Row-Level Security (RLS), Power BI Service, Tableau Desktop, Tableau Prep, Tableau Server/Cloud, LOD Expressions, Parameters, Dashboard Actions, KPI Scorecards, Executive Dashboards, Data Storytelling
- **Programming & Scripting:** Python, Pandas, NumPy, Scikit-learn (for analytics & modeling support), R, dplyr, tidyr, ggplot2, Automation & data transformation using Python scripts
- **ETL & Data Preparation:** Power Query, Tableau Prep, Azure Data Factory (ADF), AWS Glue (data preparation & transformation)
- **Cloud Platforms & Data Warehousing:** S3, Redshift, Lambda, EMR, Azure Synapse Analytics, Azure Data Factory, Snowflake (Cloud Data Warehouse)
- **Databases:** SQL Server, PostgreSQL, Snowflake, DynamoDB, Cosmos DB
- **Excel & Productivity Tools:** Pivot Tables, Power Pivot, XLOOKUP, Macros, Git, Jira
- **Methodologies:** Agile / Scrum, Requirements Gathering, Stakeholder Communication

Professional Experience:

UBS, USA

Mar 2024 – Present

Role: Data Analyst

Responsibility:

- Translated complex credit risk models and large-scale financial datasets into actionable insights through dashboards, reports, and visual analytics to support real-time business and regulatory decision-making.
- Designed and developed scalable BI solutions using Power BI Desktop and Power BI Service, leveraging DAX, Power Query (M), and optimized semantic data models.
- Integrated loan, mortgage, and credit risk data from SQL Server and Azure SQL Database into Power BI, ensuring data accuracy, consistency, and compliance with reporting standards.
- Developed and optimized ETL pipelines using Azure Data Factory to automate data ingestion, transformation, and loading for enterprise analytics use cases.
- Built and optimized star and snowflake schema data models, improving query performance and report refresh times by approximately 20 percent.
- Implemented Row-Level Security (RLS) in Power BI to enforce role-based data access and comply with financial data security and governance policies.
- Managed Power BI Premium capacity and Pro licensing, optimizing resource utilization and enabling secure enterprise-wide report distribution.
- Developed and optimized SQL queries, stored procedures, views, indexes, and functions to enhance data retrieval performance and reporting efficiency.
- Embedded Python scripts within Power BI using Python visuals to perform advanced analytics, predictive modeling, and credit risk forecasting.
- Conducted Exploratory Data Analysis (EDA) to identify trends, patterns, and anomalies across financial datasets, supporting data-driven insights.
- Collaborated with cross-functional teams in an Agile environment, participating in sprint planning, backlog grooming, and iterative BI solution delivery.
- Tracked and managed development tasks using Jira, ensuring timely completion of dashboards, data model enhancements, and bug fixes.

Environment: Power BI Desktop & Service, DAX, Power Query (M), SQL Server, Azure SQL Database, Azure Data Factory (ADF), Python, ETL, Star & Snowflake Schema, Row-Level Security (RLS), Jira, Agile/Scrum, Data Modeling, Dashboards, Exploratory Data Analysis (EDA), Predictive Analytics.

Accenture, India

Feb 2020 – Jul 2023

Role: Application Analyst

Responsibility:

- Supported enterprise analytics initiatives by performing data analysis, data modeling, and dashboard development for multiple client engagements across industries.
- Worked closely with Business Analysts and Product Managers to gather functional and non-functional requirements and translate them into analytical solutions.
- Integrated and validated data from multiple sources including Oracle, PostgreSQL, SQL Server, Access, and cloud platforms to improve data reliability and reporting accuracy.
- Designed and automated interactive KPI dashboards and executive reports using Power BI and Tableau, increasing stakeholder visibility and insight adoption.
- Applied advanced Tableau techniques including LOD expressions, calculated fields, parameters, and Tableau Prep for data preparation and dashboard optimization.
- Utilized AWS Glue for ETL processing, data cataloging, schema evolution, and preparation of analytical datasets.
- Performed data profiling, cleansing, validation, and exploration data analysis on customer, campaign, and operational datasets to uncover actionable insights.
- Implemented Power BI best practices for data modeling, DAX optimization, performance tuning, and security configuration.
- Supported ETL processes involving data migration from multiple business units using SQL-based transformations and validation checks.

- Conducted statistical analysis using Python, R, SPSS, and MATLAB to support business decision-making and performance evaluation.
- Collaborated with cross-functional teams to improve analytics adoption, CRM workflows, and operational efficiency through data-driven solutions.

Environment: Power BI, Tableau Desktop & Server, Tableau Prep, LOD Expressions, Calculated Fields, DAX, SQL Server, Oracle, PostgreSQL, Access, AWS Glue, ETL, Data Modeling, Data Profiling, Data Cleansing, Python, R, SPSS, MATLAB, Agile/Scrum, Dashboards, KPI Reporting, Analytics Adoption: Power BI

Metamorph IT Systems, India

Jun 2018 – Jan 2020

Role: Data Analyst

Responsibility:

- Generated energy consumption and operational reports using SSRS, analyzing daily, monthly, and yearly trends to support business planning.
- Performed ad-hoc data analysis and complex SQL queries to extract insights, resolve critical business issues and support timely decision-making.
- Designed and developed interactive Tableau dashboards and data storylines for retail and fashion datasets.
- Implemented data cleaning, validation, and reconciliation processes using Excel and SQL to ensure high-quality and consistent reporting datasets.
- Extracted and validated data from multiple databases using Oracle SQL Developer and SQL Server for analytical reporting.
- Built and executed ETL workflows using SSIS, including source-to-target mapping and transformation of CSV, text, and Excel data into data warehouses.
- Developed SQL test scripts to validate datasets across multiple scenarios, ensuring accuracy and completeness of analytical outputs.
- Supported ongoing reporting and analytics needs by collaborating with business users and technical teams.

Environment: SQL Server, Oracle SQL Developer, SSRS, SSIS, ETL, Tableau Desktop, Data Storytelling, Data Cleaning & Validation, Excel (Pivot Tables, Formulas, Macros), CSV/Text Data Transformation, Data Reconciliation, Dashboard Development, Ad-hoc Reporting, Data Extraction, Analytics Collaboration.

Education Details:

Master's - Data science

Kent State University (Aug 2023-May 2025)

Bachelor's - Computer science and engineering

JNTUK (June 2015- May 2019)
