PROFESSIONAL SUMMARY

I am a Business Data Analyst with 5+ years of hands-on experience developing Power BI dashboards, SQL-based data models, and operational reports that drive efficiency, cost reduction, and service-level improvements. Proven ability to transform data from operational systems into actionable insights for site leadership and cross-functional teams including Operations, Finance, and HR. Strong foundation in SQL, DAX, Python, and data modeling within operations-heavy environments.

SKILLS

- Power BI, SQL, DAX, Python, Data Modeling, Databases, Spreadsheets, Analytics, Data Validation, Collaboration, MATLAB, ETL, Outlook, Excel, VBA, Power Query, Power Pivot, PowerPoint, R, Snowflake, Knowledge Graphs, Microsoft Office, Cross-Validation Techniques, Cross-Functional Roles, Scala, SaaS, six sigma, PCB Design

PROFESSIONAL EXPERIENCE

CENTRAL MICHIGAN UNIVERSITY

Aug 2023 - May 2025

DATA ANALYST, OPERATIONS & PERFORMANCE ANALYTICS

- Developed and maintained Power BI dashboards, including back-end data modeling and calculated measures, to support operational and strategic decision-making.
- Analyzed operational data related to events, ticketing, attendance, and revenue sourced from the Paciolan ticketing system, spreadsheets, CSV files, and internal university systems.
- Designed end-to-end ETL pipelines by extracting raw data, staging files in AWS S3, and loading curated datasets into Snowflake.
- Cleaned, transformed, and reconciled data using SQL and Python (pandas, numpy), including deduplication, null handling, joins, and date normalization.
- Designed analytical data models with fact and dimension tables to support scalable reporting and Power BI consumption.
- Developed SQL queries to calculate operational KPIs such as utilization rates, revenue per event, refund rates, and execution timeliness.
- Built Excel-based operational tracking tools using Pivot Tables, Power Query, and lookup functions to support daily decision-making.
- Performed ad hoc analysis and deep dives to identify efficiency gaps, performance bottlenecks, and cost drivers.
- Automated recurring reports using SQL, Python, and BI scheduling, reducing manual reporting effort by approximately 50%.
- Collaborated with operations, finance, faculty, and administrators to translate business questions into actionable analytical solutions.
- Communicated insights through dashboards, written summaries, and presentations tailored for leadership and internal stakeholders.

GENPACT

Jul 2021 - May 2023

SENIOR BUSINESS DATA ANALYST

- Analyzed large-scale transactional and operational datasets including payments, refunds, chargebacks, and user activity logs exceeding 500 GB per day, primarily sourced from the Wander CRM platform supporting Google Pay operations.
- Designed and implemented scalable SQL- and Python-based ETL workflows to extract data from the Wander CRM tool and supporting databases to enable operational and performance reporting.
- Staged raw data in AWS S3 and loaded analytics-ready datasets into Snowflake for BI and reporting use cases.
- Cleaned and transformed data using Python (pandas, numpy) to standardize timestamps, currencies, and transaction attributes.
- Developed SQL queries and calculated metrics to support KPI reporting, trend analysis, and operational monitoring.
- Built executive dashboards to communicate performance trends, exception rates, and operational risks.
- Performed ad hoc investigations to identify anomalies, cost drivers, and process inefficiencies.
- Partnered with operations, finance, and compliance teams to deliver data-driven insights supporting decision-making.
- Improved reporting scalability, performance, and data quality across multiple analytical workflows.

ICICI BANK

Jun 2019 - Jul 2021

ANALYST, RISK & PERFORMANCE ANALYTICS

- Analyzed credit card and retail banking transaction data from core banking systems, ATM networks, and digital channels.
- Developed SQL-based ETL processes to extract, transform, and aggregate millions of daily transaction records.
- Applied statistical analysis and exploratory data techniques to identify fraud patterns, operational inefficiencies, and exception trends.
- Designed and maintained Power BI dashboards to communicate fraud trends, investigation outcomes, and operational KPIs.
- Wrote DAX expressions and calculated measures to automate reporting and enhance dashboard interactivity.
- Built Excel-based dashboards for daily monitoring of exception rates and performance metrics.
- Collaborated with audit, compliance, and operations teams to support investigations and root-cause analysis.
- Contributed to reducing false positives by 25% and investigation backlog by 35%.

LAMPEX ELECTRONICS LIMITED

May 2015 - Nov 2015

DATA INTERN, MANUFACTURING ANALYTICS

- Analyzed manufacturing, throughput, and defect data from PCB production lines.
- Built Excel-based dashboards to track utilization, quality metrics, and defect trends.
- Supported root-cause analysis and continuous improvement initiatives with engineering teams.
- Contributed to reducing rework costs by 20% and improving production yield.

EDUCATION

Central Michigan University

Aug 2023 - May 2025

Master of Science, Information Technology (Business Data Analytics) (GPA: 3.75 / 4.0)

Mount Pleasant, MI

St. Martin's Engineering College

Bachelor of Technology, Electronics & Communication Engineering

Hyderabad, India

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Google Cloud Looker & LookML
- Deloitte Data Analytics Simulation
- Lean Six Sigma Green Belt
- Oracle Analytics Cloud 2025 Certified
