

# Arthur Hugo Ribeiro Corrêa de Araújo

Sao Paulo, Brazil

Email: arthur10ribeiro@gmail.com - Phone Number: + 55 19 997237998

Analytics Engineer with 9+ years architecting scalable ETL/ELT pipelines, cloud data warehouses, and BI solutions in multi-cloud environments (Azure, AWS, GCP). Experience in Databricks (PySpark), Snowflake, Azure Data Factory and Python for automating data ingestion, real-time analytics, and legacy migrations. Expert in Power BI and Tableau. Proven in cross-functional collaboration, data governance, and transforming business requirements into measurable outcomes like optimized workflows and predictive models.

## PROFESSIONAL EXPERIENCE

### ScanSource, South Carolina, USA

**Ago 2023 – Nov 2025**

**Position:** Business Intelligence Specialist

- Architected ETL pipelines with Azure Data Factory, Databricks, and Snowflake, integrating diverse sources to enable scalable analytics and reduce query latency by 40%.
- Developed dynamic Power BI dashboards and custom Power Apps, automating workflows via Power Automate and RESTful APIs for real-time stakeholder insights.
- Led cross-team training on data governance and SQL optimization, advancing a data-driven culture and streamlining reporting processes.

### Heineken, São Paulo, Brazil

**Apr 2022 – May 2023**

**Position:** Senior Business Analyst

- Automated ETL/ELT processes using Alteryx, Snowflake, and Python models, deploying Power Apps/Automate to digitize operations and cut report cycles.
- Designed Power BI dashboards with forecasting/trend analysis, enforcing data governance to deliver timely insights for operational decisions.
- Collaborated with stakeholders to identify automation opportunities, supporting digital transformation across supply chain functions.

### Brasilprev S/A, São Paulo, Brazil

**Mar 2021 – Feb 2022**

**Position:** Senior Business Intelligence Analyst

- Developed dashboards and queries for internal and external clients' operations utilizing visualization products like Tableau, Power BI, and ArcGIS to create interactive dashboards and reports for stakeholders, working in Microsoft Azure Cloud environment.

- Developed predictive model to flag high-risk borrowers using payment history, debt-to-income ratios, and macroeconomic trends.
- Supported delivery of the Data Analysis and Insights service including data collection, validation, and data management.
- Developed PL/SQL scripts to extract data from diverse sources, including Oracle databases, flat files, and external APIs.

**Rede D'Or, Rio de Janeiro, Brazil**

**Sep 2019 – Jan 2021**

**Position:** Senior Data Analyst

- Engineered Azure Data Factory ETL pipelines and Python/Power BI ML models, leading a team to optimize data flows and boost business performance metrics.
- Implemented agile practices with Azure DevOps, delivering actionable healthcare insights through interactive visualizations.
- Built a dictionary for data visualization techniques including DAX measures for query editors, charts, data plotting, and data forecasting.
- Led meetings and presentations to share findings and ideas with cross-functional teams and stakeholders, helping them to make data-driven decisions.

**INSPER, São Paulo, Brazil**

**Feb 2017 – Jul 2019**

**Position:** Data Analyst

- Responsible for developing queries and dashboards, as well as key performance indicators (KPIs) analysis to support data-driven decisions.
- Worked with a variety of data visualization and business intelligence tools and technologies such as Cognos, Tableau, ArcGIS, Power BI, and Google Analytics.
- Responsible for data cleaning, data manipulation, and data analysis using SQL queries and Data Factory for external data.
- Performed data extraction, transformation, and loading (ETL) processes to ensure the accuracy and completeness of the data being analyzed.
- Created Tableau/Power BI dashboards and Lclustering models for business operations, managing cloud ETL and maps with ArcGIS for spatial analysis
- Accelerated project delivery using Microsoft Planner agile methods, ensuring data quality and scalability in education analytics.

**Bradesco S/A, São Paulo, Brazil**

**Jan 2016 – Jan 2017**

**Position:** Data Science Researcher

- Technical reports for AI improvements using Python for sentiment analysis.
- Extracted insights from large and complex datasets and created key performance indicators (KPIs), reports, and interactive, visually appealing dashboards using Tableau for risk analysis.
- Compared default rates during expansion (easy credit) vs. recession (tight credit).
- Analyzed historical lending data to identify phases of the credit cycle (expansion/contraction) and correlated them with economic indicators (GDP growth, unemployment, interest rates).
- Research focused on proof of concept and performance analysis.

### **KEY TECHNOLOGIES & SKILLS**

- Data Engineering: Databricks (PySpark), Snowflake, Azure Data Factory, Azure Synapse, ETL/ELT Pipelines
- Analytics & Viz: Power BI (DAX, Power Query), Tableau, Python (Pandas, NumPy), R, SQL Advanced
- Automation: Power Apps, Power Automate, Alteryx, RESTful APIs
- Cloud Platforms: Microsoft Azure, AWS, Google Cloud Platform
- Methodologies: Agile/Scrum, Data Governance, Stakeholder Engagement

### **EDUCATION**

- MBA in Data Science & Analytics - University of São Paulo | 2020 - 2022
- Master's degree in Demography - University of Campinas | 2016 -
- BSc in Geography - Federal University of Pernambuco | 2011-2015

### **CERTIFICATIONS**

- Business Analytics Executive Education - St. Paul Business School | 2021
- Natural Language Processing in Python - ICMC/University of São Paulo | 2021
- AI applied to communication – Insper | 2019
- Statistics and R - Harvard EdX | 2018
- Analyzing Big Data with Microsoft R - Microsoft EdX | 2018
- Remote Sensing and Geoprocessing – EMBRAPA | 2014
