

KUNAL MAVOORI

Supply Chain Analyst

📍 CA, 95391 📞 (334) 895-7300 ✉ kunalmavoori9@gmail.com

SUMMARY

Supply Chain Analyst with 4+ years' experience optimizing logistics, inventory, and fulfillment operations in retail and e-commerce. Skilled in demand forecasting, inventory optimization, and performance analytics using Power BI, SQL, and Excel. Proficient in SAP, Oracle SCM, and Manhattan WMS with a track record of translating insights into cost and efficiency gains. Known for analytical thinking, collaboration, and clear communication, leveraging Lean Six Sigma and data-driven decision-making to streamline workflows and enhance forecasting accuracy.

TECHNICAL SKILLS

Supply Chain Planning & Optimization

Sales & Operations Planning (S&OP), Demand Forecasting, Inventory Management, Order Fulfillment Analytics, Network Optimization

Data Analytics & Visualization

Power BI, Tableau, SQL, Advanced Excel (Pivot Tables, Power Query), KPI Dashboards, Data Storytelling, Root Cause Analysis

Process Improvement & Operational Excellence

Lean Six Sigma (Green Belt), Kaizen, Workflow Optimization, Cost Reduction, Continuous Improvement

Collaboration & Stakeholder Engagement

Vendor & Supplier Coordination, Cross-Functional Team Alignment, Procurement Support, Data-Driven Decision Enablement

E-Commerce & Logistics Operations

Last-Mile Delivery Analytics, Fulfillment Center Performance, Return Logistics, Warehouse Management Systems (WMS), Carrier Performance Tracking

ERP & Supply Chain Systems

SAP (MM, SD, IBP, EWM), Oracle SCM, Manhattan WMS, Inventory Control Systems, Order Management Systems (OMS)

Digital Enablement & Automation

Python (Pandas, NumPy), RPA (UiPath / Power Automate), Predictive Analytics for Inventory & Demand, Cloud-based SCM Platforms (AWS, Azure)

PROFESSIONAL EXPERIENCE

Supply Chain Analyst, Wayfair

Jun 2024 – Present | USA

- Developed data-driven visibility solutions in Power BI using DAX and SQL models, integrating fulfillment and logistics data from Oracle SCM to improve delivery forecasting accuracy and reduce average delays by 18 hours weekly.
- Implemented AI-driven demand forecasting models in Python (Pandas, NumPy) to predict seasonal SKU trends, improving stock accuracy by 14% and reducing overstock by 9% across regional fulfillment centers.
- Partnered with finance and operations teams to design cost-to-serve analytics dashboards, uncovering \$240K in annual savings through optimized carrier utilization, warehouse zoning, and shipment consolidation.
- Collaborated with data engineering and automation teams to deploy RPA-based data extraction pipelines, reducing manual reporting time by 40% and improving supply chain performance tracking reliability.

Junior Supply Chain Analyst, Flipkart

Jun 2019 – Jul 2022 | India

- Managed end-to-end inventory planning and replenishment across 120+ fulfillment nodes using SAP MM and Manhattan WMS, reducing stockouts by 22% and ensuring consistent product availability across regions.
- Conducted demand and sales analysis using SQL and Advanced Excel to align replenishment schedules with real-time sales trends, improving inventory accuracy and on-shelf availability.
- Translated operational data into actionable insights through Power BI dashboards tracking fill rate, OTIF, and lead-time metrics, improving decision visibility and reporting efficiency by 30%.
- Partnered with logistics and operations teams to refine last-mile delivery analytics, identifying route inefficiencies and optimizing vendor schedules to cut average delivery time by 16 hours weekly and improve customer satisfaction.
- Supported Lean and Kaizen-based warehouse process improvements by analyzing workflow bottlenecks and standardizing best practices, reducing material handling time by 20% and improving overall picking accuracy.
- Collaborated with procurement and supply planning teams to analyze sourcing inefficiencies and shipment delays, implementing corrective actions that improved supplier coordination, reduced purchase costs, and increased order accuracy by 11%.

EDUCATION

Master of Science in Information Systems Management,

Auburn University at Montgomery, USA

Aug 2022 – May 2024 | (GPA: 3.5)

Bachelor of Commerce with Computers,

Avinash College of Commerce, India

Jul 2016 – May 2019 | (GPA: 7.3)

PROJECTS

Network-Wide Inventory Optimization Model, Power BI, SQL, SAP S/4HANA, Excel

- Built an inventory model integrating SAP and SQL data to monitor stock, aging, and fill rates across fulfillment nodes.
- Cut backorders by 25% through proactive stock rebalancing and real-time replenishment tracking.
- Automated data prep and reporting via Power Query and VBA, standardizing replenishment workflows.

E-Commerce Fulfillment Analytics Platform, Power BI, Python, Oracle SCM, Tableau

- Developed a fulfillment analytics platform combining order, warehouse, and carrier data to track KPIs.
- Applied Python forecasting and anomaly detection to cut delivery cycle times by 12%.
- Streamlined ERP and WMS data ingestion with IT and supply teams, improving data refresh speed.
