Chicago, IL (Open to relocate) | +1 (312) 451-2380 | aniketpramodsingh01@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

SUMMARY

Data Analyst / BI Analyst with around 4+ years of experience across analytics engineering, dashboard development, and ETL pipeline design. Skilled in transforming raw data into actionable insights using SQL, Python, Power BI, and Snowflake, and optimizing reporting workflows through automation, data modeling, and data governance practices. Proven ability to support cross-functional teams by delivering scalable solutions using Azure Fabric, dbt, and cloud-based ETL frameworks. Strong foundation in data warehousing, compliance tracking, and executive KPI delivery.

TECHNICAL SKILLS

- **Programming & Analytics:** SQL, Python (Pandas, NumPy), R, Bash, dbt, PyMongo, Git, A/B Testing, Data Wrangling, Statistical Modeling
- **Data Engineering & ETL:** ETL pipelines, data cleansing, data migration, Snowflake, SQL Server, PostgreSQL, MySQL, Oracle, MongoDB
- **Cloud & Data Platforms:** Azure (Data Factory, Fabric), AWS (S3, Lambda), GCP, Snowflake architecture
- **Data Modeling & Governance:** Data modeling, role-based access control (RBAC), data lineage, metadata management, validation rules
- **Business Intelligence & Reporting:** Power BI, Tableau, Looker Studio, IBM Cognos, Google Data Studio, KPI dashboards, executive reporting, report automation
- **Analytics & Forecasting:** Predictive modeling, regression, classification, clustering, time-series forecasting, anomaly detection
- **AI & Machine Learning (Applied Analytics):** ML fundamentals (supervised & unsupervised learning), model evaluation & monitoring, NLP basics, prompt engineering
- **Data Quality & Compliance:** Audit readiness, SLA definitions, data validation, governance documentation
- **Agile & Delivery:** Agile methodologies, sprint planning, UAT, BRD/FSD documentation
- **Tools & Collaboration:** Jira, Confluence, Excel (Pivot Tables, Macros, Power Query), stakeholder communication

PROFESSIONAL EXPERIENCE

EPSILON

JUN 2025 – PRESENT

Data Analyst

USA

- Developed automated **ETL pipelines** in **Azure Data Factory**, integrating data from **CRM**, campaign, and advertising platforms, improving data flow efficiency and reducing report refresh time by 10 hours per week.
- Cleaned and prepared structured and semi-structured datasets using **Python (Pandas, NumPy)** and **SQL**, transforming over 120K monthly records for campaign analysis and predictive modeling.
- Built and maintained interactive dashboards in **Power BI** to visualize campaign ROI, conversion metrics, and **KPI** trends across 5 enterprise clients, enabling faster data-driven decisions.
- Applied **AI and machine learning tools** such as **Scikit-learn** and **OpenAI APIs** for churn analysis and anomaly detection, enhancing targeting precision and optimizing audience segmentation workflows.
- Partnered with business and engineering teams to define **data models**, establish **metric definitions**, and document reporting logic, ensuring analytics alignment across marketing and product data ecosystems.
- Conducted data validation and quality assurance using **Azure Synapse**, **SQL**, and automation scripts, identifying inconsistencies early and improving overall data reliability across 7 connected systems.

HYPHENOVA NETWORK

AUG 2024 – DEC 2024

Database Developer Intern

USA

- Automated HTML- and **SQL**-based reporting pipelines to eliminate repetitive manual steps, reducing monthly reporting effort and accelerating sprint report delivery by **30%**.
- Engineered scalable **ETL workflows** using **Python** and **Snowflake** to ingest, transform, and standardize high-volume **API** performance logs for analytics and reporting use cases.
- Designed and delivered KPI-driven **Power BI** and **Tableau** dashboards to track daily site operations and project milestones, enabling faster, data-backed decision-making for PMO and leadership teams.
- Diagnosed and resolved backend performance bottlenecks by analyzing **query execution plans** and **usage statistics**, improving KPI accuracy and overall reporting reliability by **25%**.
- Led end-to-end **data migration** of historical customer usage data to **Snowflake**, implementing data cleansing, schema harmonization, and validation to ensure consistency and scalability.
- Implemented column-level **data lineage** and documentation using **dbt** and **Azure Data Catalog** to enhance governance, traceability, and audit readiness across critical datasets.

ADANI

JAN 2023 – JUL 2023

Data Analyst

India

- Built automated **SQL** data pipelines to power regional procurement and logistics dashboards, eliminating manual data preparation and reducing reporting effort by **12 hours per week**.
- Developed KPI-driven **Power BI** and **Tableau** dashboards to track daily site operations and project milestones, enabling faster and more informed decision-making for PMO teams.
- Applied data validation frameworks using **SQL** and **Python** to cleanse supplier and site material datasets, improving reporting accuracy and data reliability by **25%**.
- Integrated **Oracle ERP** data into a centralized **SQL Server** staging environment, enabling unified access to spend, asset, and vendor data across multiple business units.
- Performed cost and performance analysis using **SQL** and **Excel** on equipment utilization trends, directly contributing insights that supported **\$500K** in optimization decisions.
- Built **Excel VBA** automation tools to standardize field-level reporting submissions across 6 remote locations, improving consistency and reducing manual errors.
- Designed and maintained **ETL pipelines** using **Python** and **SQL** to extract, transform, and load operational data into optimized, **Power BI**-ready analytical models.

BOMBAY PETROLEUM

JAN 2022 – DEC 2022

Data Analyst / BI Analyst

India

- Designed and maintained automated **Power BI** and **Tableau** dashboards to monitor compliance metrics, risk scores, and workflow KPIs across departments, enabling proactive risk tracking and visibility for stakeholders.
- Built and optimized **SQL**-based **ETL pipelines** to extract, cleanse, and consolidate data from finance and legal systems into unified, audit-ready reporting layers.
- Integrated **Excel macros** with **SQL** to automate reconciliation processes, reducing month-end close effort and manual intervention by 15%+.
- Developed **Power BI** data models and **DAX** measures to support drilldowns, custom compliance KPIs, and dynamic filtering tailored to regulatory and audit use cases.
- Analyzed **3+ years** of historical records using **SQL** and **Power BI** to uncover escalation trends, resolution delays, and audit risk patterns, sharing actionable insights with risk leadership.
- Standardized source files using **Power Query** and lookup logic to improve data refresh performance, consistency, and reliability across recurring compliance reports.

KPMG

JAN 2021 – DEC 2021

Data Analyst

India

- Designed and automated **Power BI** and **Tableau** dashboards to visualize KPIs and executive-level reports, enabling data-driven decision-making across operations and marketing teams.
- Built and maintained **ETL pipelines** using **SQL**, **Python (Pandas)**, and **dbt** to ingest and transform multi-source data, improving overall data accuracy and reporting reliability.
- Implemented data validation frameworks in **Snowflake** and **SQL Server** to ensure audit readiness, SLA compliance, and consistency across critical reporting workflows.
- Collaborated with cross-functional teams using **JIRA** and **Confluence** to manage user stories, sprint planning, and Agile deliverables, ensuring timely and aligned execution.
- Implemented role-based access controls and metadata documentation across **AWS**, **Azure**, and **GCP** to strengthen data security, governance, and end-to-end data lineage.
- Authored **BRDs** and **FSDs** and supported **UAT** for a **Snowflake** migration, enabling a smooth platform transition while maintaining strong stakeholder alignment.

LARSEN & TOUBRO

MAY 2019 – JUN 2019

Data Analyst Intern

India

- Developed **ETL pipelines** using **SQL** and **Excel macros** to automate reconciliation of financial and legal records, reducing manual intervention and improving data consistency.
- Built compliance dashboards in **Power BI** and **Tableau** to visualize submission cycles, risk metrics, and legal escalations, enabling better tracking and oversight for stakeholders.
- Streamlined month-end close processes through structured automation, reducing the close cycle by **2 business days** and improving reporting timeliness.
- Analyzed **3+ years** of legal case data using **SQL** and **Power BI** to identify frequency trends and resolution rates across business

units, supporting compliance planning.

- Created dynamic executive reports using **Power BI** bookmarks and filters, enabling tailored views for senior legal and compliance leadership.
- Implemented lookup normalization and data standardization logic in **SQL** and **Excel**, improving data retrieval performance and report efficiency by **20%**.
- Authored standardized documentation templates for recurring report specifications and legal review tracking, improving consistency and audit readiness.

PROJECTS

USA Car Accident Model | RStudio

- Conducted exploratory data analysis and statistical testing on 7.7M+ accident records using R (tidyverse, caret) to identify key predictors; built a regression model with 85 accuracy for forecasting accident risk levels.
- Validated model performance using ANOVA and chi-square tests and integrated findings into a reproducible framework, supporting decision-making for traffic safety and insurance risk profiling.

Sugar-Saver Platform | SQL, Java, HTML

- Designed a relational database schema to capture real-time blood glucose patterns and implemented SQL triggers for anomaly detection, generating alerts for clinical staff and patients.
- Integrated a Java-based UI to visualize trends and enable threshold-based notifications, reducing response times by 12 hours and improving health intervention speed.

Chicago Crime Dashboard | Python, Power BI

- Aggregated and processed real-time crime logs using Python (Pandas, Seaborn) and visualized patterns through Power BI dashboards, enabling analysis by zone, time, and category.
- Applied query optimization techniques to reduce dashboard query load by 40, enhancing live data refresh performance and supporting public safety initiatives.

LinkedIn Data Mart | SQL, Power BI, Snowflake

- Built automated ETL pipelines with SQL and dbt to clean, transform, and integrate LinkedIn engagement data into Snowflake data marts for reporting.
- Designed Power BI dashboards with real-time KPIs across 10+ metrics, improving data availability and report generation speed by 35, enabling faster stakeholder decisions.

EDUCATION

Master's in Information Technology and Management

Aug 2023 – May 2025

Illinois Institute of Technology

Minor: Data Analytics & Business Intelligence | GPA: 3.9/4.0

Bachelor of Engineering in Computer Science Engineering

Jun 2017 – Jun 2020

University of Mumbai | GPA: 3.9/4.0

CERTIFICATION

- IBM Data Analyst Professional Certificate, demonstrating expertise in data manipulation, visualization and analysis.
