Dallas, TX (Open to Relocate) +1(415)202-3299 [pranavkumarjainr@gmail.com](mailto:pranavkumarjainr@gmail.com) [LinkedIn](#) [GitHub](#)

## SKILLS

---

**Analytics:** Statistics, Hypothesis Testing, A/B Testing, Exploratory Data Analysis, Ad Hoc Analysis, Predictive Modeling  
**Data Visualization:** Tableau, Power BI, DAX, Excel, Streamlit, Matplotlib, Seaborn  
**Programming:** Python (Pandas, NumPy, Scikit-learn), SQL (PostgreSQL, MySQL, SQL Server), Bash/Shell, Git, GitHub  
**Cloud & Engineering:** AWS (S3, Athena, Bedrock), Airflow, ETL Pipelines, Data Modeling, Prompt Engineering

---

## tvScientific

San Francisco, CA (Remote)

*Data Science Intern*

*October 2024 – June 2025*

- Engineered an automated video processing pipeline with Python, SQL, and AWS S3 to catalog over 20,000 ad creatives in parquet format, reducing manual processing time by 90% for ad performance analysis.
- Developed a SQL metadata lookup function querying SingleStore to combine 8 campaign attributes (line item IDs, advertiser IDs, experiment codes, bidding strategies), reducing query time from 15 minutes to 2 minutes.
- Enhanced the frequency analysis tool by adding a histogram that shows impressions before conversion events, helping identify the best ad exposure thresholds for campaign recommendations.
- Implemented a Pytest test suite for 12 analytics tools with data validation logic, catching over 15 quality issues before production and reducing manual testing effort.

## Asian Beverages

Chennai, India

*Data Analyst*

*June 2023 – June 2024*

- Designed Power BI reports that visualized sales for 12 beverage products across states, revealing a 35% increase in summer sales of mango flavor, which helped guide production planning and reduced stockouts.
- Streamlined monthly sales reporting by using SQL queries with joins, CTEs, and window functions, reducing report preparation time from 6 hours to 45 minutes.
- Conducted segmentation with Python K-Means on over 180 distributor accounts, identifying that the top 25% of accounts were responsible for 68% of revenue, leading to a tiered pricing strategy that lowered high-value customer churn from 12% to 5%.
- Executed ad hoc seasonal sales analysis using SQL on 18 months of transaction data, discovering a 55% increase during festival periods and a 30% boost from bulk discounts, informing promotional calendar improvements and inventory planning.

## SBNA Technologies

Chennai, India

*Data Analyst Intern*

*July 2021 – December 2021*

- Transformed diabetes data with 120,000 rows in Python, using median imputation for missing values and range validation checks, ensuring data quality for client-facing Tableau dashboards presented to hospital stakeholders.
- Developed 6 interactive Tableau dashboards to analyze diabetes patient records across clinical features, identifying that 15% of patients accounted for 45% of readmissions, helping hospital clients prioritize case management resources.
- Designed geospatial visualizations in Tableau to map patient distribution across US zip codes, allowing hospital clients to see that 40% of patients came from 10 high-density areas and optimize resource allocation for outreach programs.

## Community Dreams Foundation

Dallas, TX (Remote)

*Volunteer Data Analyst*

*October 2025 – Present*

- Develop Power BI financial dashboards to track donations, revenue, and budget allocation, consolidating over 10,000 transaction records from different Excel files and databases, enabling nonprofit leaders to see real-time financial data.

## PROJECTS

---

### TubeQuiz – Generative AI, Python, Streamlit, AWS (Bedrock, S3, Transcribe)

- Engineered Streamlit app that extracts YouTube transcripts using the API or AWS Transcribe, processing with Claude via AWS Bedrock to generate multiple-choice and short-answer questions, reducing quiz creation time from 45 minutes to 5 minutes.

### COVID-19 Analytics Dashboard Suite – Tableau, Python

- Constructed a Tableau suite with geospatial maps and trend analysis for over 400,000 COVID records across 36 states, identifying 8 states facing critical bed shortages and a 30% vaccination lag compared to other states.

### Bank Loan Portfolio Risk Analysis – SQL, Power BI, DAX, Excel

- Designed Power BI dashboards to analyze over 38,000 loans worth \$435M, using SQL and DAX, showing a 13.8% default rate and enabling risk segmentation by loan grade, purpose, and geography for better capital deployment.

## EDUCATION

---

### University of San Francisco

San Francisco, CA

*M.S. in Data Science*

*July 2024 – June 2025*

### Sri Ramachandra Institute of Higher Education and Research

Chennai, India

*B.Tech. in Computer Science Engineering (AI and Machine Learning)*

*August 2019 – June 2023*
