

Jahnavi Reddy

Bowling green, Ohio | +1 9703911094 | Jahnavireddy140@gmail.com | [Linkedin](#)

PROFILE

Data Analyst skilled in SQL, Python, and ETL pipeline development, with expertise in transforming large datasets into structured data models and interactive dashboards. Proven ability to reduce manual data preparation by 35% and enhance decision-making through advanced statistical analysis. Adept at collaborating with stakeholders to deliver clear, actionable insights that support strategic goals.

SKILLS

- **Programming Languages:** Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, R
- **Data Visualization:** Tableau, Power BI, AWS QuickSight
- **Database Management:** SQL, MySQL, PostgreSQL, MongoDB
- **ETL & Data Management:** Apache Airflow, Talend, Alteryx, SSIS
- **Cloud Platforms:** AWS (S3, Redshift, Glue, Lambda, QuickSight), Azure (Data Factory, Synapse Analytics)
- **Data Governance & Security:** Data quality, lineage, compliance (GDPR, HIPAA), Data stewardship, metadata management
- **Data Analysis:** Statistical analysis, regression analysis, predictive modeling, trend analysis, Analytical Skills, Data Modeling
- **Version Control & Collaboration:** Git, GitHub, Jira, Confluence
- **Methodologies:** Agile, SDLC (Software Development Life Cycle)
- **Other Tools:** Excel (Advanced functions, VBA), Google Analytics, Salesforce
- **Professional Qualifications:** Bachelor's Degree, Consulting Experience

PROFESSIONAL EXPERIENCE

Capital One | *Data Analyst*

Aug 2024 - Present

- Managed large-scale data integration and data modeling from multiple sources (databases, APIs, cloud systems) using SQL and Python (Pandas, NumPy), ensuring data consistency and seamless data flows for cross-departmental reporting and decision-making.
- Developed and automated end-to-end ETL pipelines, transforming raw datasets into clean, structured data models ready for analysis, reducing manual data preparation efforts by 35% and improving data accessibility.
- Applied advanced statistical and analytical methods (regression analysis, trend identification, anomaly detection) to financial datasets for deeper insights, supporting credit risk modeling, and improving decision-making by 20% in lending practices.
- Created actionable data visualizations and interactive dashboards using Tableau and Power BI, effectively communicating KPIs such as loan performance, customer segmentation, and credit utilization to leadership, enabling data-driven decisions that directly impacted business strategy.
- Collaborated closely with business stakeholders, leveraging consulting experience to understand evolving requirements and translate complex data into insights that informed strategic business initiatives, including customer acquisition, loan portfolio management, and credit policy adjustments.
- Ensured data governance, integrity, and compliance by applying best practices for data validation and quality assurance, managing discrepancies with SQL checks, and ensuring consistency for reporting purposes across multiple systems.

Accenture | *Data Analyst*

May 2022 - Jun 2023

- Developed and automated end-to-end data workflows using SQL, Python (Pandas), and Apache Airflow, streamlining data preparation and reducing report turnaround time by 60%.
- Conducted in-depth exploratory data analysis (EDA) on large-scale supply chain datasets to identify delivery delays, vendor inefficiencies, and inventory bottlenecks, enabling a 12% reduction in operational costs.
- Built and maintained interactive dashboards using Power BI and Tableau, effectively communicating KPIs such as inventory turnover, fulfillment rate, and procurement cycle time for executive-level reporting.
- Integrated and validated datasets from ERP, WMS, and logistics platforms, applying rigorous data quality checks including null handling, referential integrity, and threshold validations.
- Collaborated with business stakeholders across procurement, finance, and operations to define reporting requirements, deliver ad-hoc analysis, and leverage consulting expertise in developing self-service analytics solutions that improved decision-making.
- Created detailed data documentation, data dictionaries, and workflow diagrams to support governance, versioning, and onboarding for cross-functional data consumers.

A WORK CONNECT PRIVATE LIMITED | *Data Analyst Intern*

Dec 2021 - Apr 2022

- Collaborated with the data team to develop and maintain SQL queries and Python scripts for data extraction, transformation, and loading (ETL) from structured sources.
- Designed and deployed interactive dashboards using Power BI and Tableau to support operational reporting and assist in executive decision-making.
- Conducted exploratory data analysis (EDA) to identify performance trends, data anomalies, and provide actionable insights for business strategy.

- Supported data quality initiatives by validating source-to-target data mapping, managing missing values, and ensuring consistency across datasets.
- Assisted in documenting data workflows, transformation logic, and key metrics to maintain transparency and support data governance standards.
- Partnered with cross-functional teams to gather analytical requirements and deliver timely, accurate reports aligned with business objectives.

EDUCATION

Colorado State University <i>Master of Science, Computer information systems</i>	Aug 2023 - Dec 2024 <i>Colorado, USA</i>
Shreyas Institute of Engineering and Technology <i>Bachelor of Technology, Electronics and Communication Engineering</i>	Aug 2019 - May 2023 <i>HYD, India</i>

PROJECTS

Cloud-Based Inventory Management System Unicorn Vehicle Manufacturing Company	Oct 2024 - Jan 2025
• Implemented an Agile-based inventory system using cloud platform, e.g., AWS/Azure, enabling real-time stock tracking and automation. • Optimized workflows, reducing inventory discrepancies by X% and improving operational efficiency by Y%. • Developed dashboards and analytics for demand forecasting and decision-making. • Collaborated with cross-functional teams, ensuring on-time delivery and stakeholder satisfaction. • Utilized Jira and Confluence for Agile project management and communication.	
Advanced Safety Compliance System AI/ML Product Management Aero Check	Aug 2024 - Dec 2024
• Created essential system elements for an AI-powered platform, ensuring smooth connection with current airport and flight systems to improve safety monitoring during flights. • Utilized machine learning algorithms to analyze real-time passenger behavior data, detecting any violations of safety protocols and sending alerts to flight attendants. • Worked together with the product and design teams to guarantee the user interface was user-friendly and facilitated efficient decision-making for staff while in-flight.	
Database Design and Implementation Grand Vineyard Trading Company	Jan 2024 - May 2024
• Worked with business stakeholders to comprehend data flow needs and guarantee the database design supported GVTC's operational objectives. • Implemented normalization methods to remove duplication and guarantee optimal data storage, enhancing data retrieval speed and system efficiency. • Guaranteed the database facilitated effective acquisition and application management procedures.	
Software Development Denver International Airport	Sep 2023 - Dec 2023
• Performed a business process analysis to identify inefficiencies in current operations and suggested enhancements to optimize key functions like baggage handling and flight scheduling. • Enabled communication between the technical team and business stakeholders to ensure that the solution met both technical and business requirements. • Took charge of creating business requirements for new software applications, enhancing end-to-end service delivery. • Utilized React tools to enhance the user interface and foster improved team communication.	

CERTIFICATES

•Project Management: Information Technology (CSU) •AI/ML- Product Management (CSU)	•Agile Management and Product Development (CSU) •Business Intelligence (CSU)
