Career Summary

Accomplished supply chain leader with 18+ years of experience managing logistics operations, inventory planning, procurement, and supply chain optimization. Proven ability to lead large teams, drive operational excellence, and align supply chain functions with business goals. Skilled in implementing scalable process improvements, managing 3PL/vendor relationships, and executing cost-effective logistics solutions. Certified Supply Chain Professional (APICS) with advanced expertise in SAP, Power BI, SQL, and Microsoft Office Suite. Recognized for delivering measurable results in fast-paced, high-volume environments and for fostering team development and customer-focused strategies.

Core Competencies

- Logistics Operations & Procurement
- Inventory & Supply Chain Optimization
- ERP Systems (SAP, BI, Bourque)
- Lead-to-Cash Process Management
- Cost Reduction & Risk Management
- Third-Party Vendor & 3PL Management
- Organizational Metrics & Benchmarking
- Customer-Centric Strategies
- Talent Development & Coaching
- Strategic Decision-Making

Professional Experience

Tramontina – Sugar Land, TX

Supply Chain Operations | 2025 – Current

- Oversee end-to-end supply chain functions for Canada operations, including 3PL management, inventory control, inventory planning, inland freight, and international freight.
- Monitor full P&L for Canadian operations and implement strategies to streamline costs.
- Develop operational procedures to benchmark and improve efficiency across supply chain and warehouse processes.
- Partner with sales, operations, planning, e-commerce, and procurement teams to ensure inventory levels meet sales growth targets.

Key Achievements:

- Reduced inland freight costs by 40% and LTL costs by 50%, saving ~\$65,000 annually.
- Redesigned 3PL inventory storage and picking logic, eliminating excess positions and saving \$100,000 annually in storage costs.

Verizon – Fort Worth, TX

Supply Chain Analyst IV | 2021 – 2024

- Directed logistics operations and inventory planning for a high-volume supply chain, ensuring alignment with business objectives and customer satisfaction.
- Acted as liaison across sales, marketing, operations planning, and vendors to resolve issues and enhance performance.
- Developed operational procedures and metrics to foster a benchmark culture, improving service levels and cost performance.
- Leveraged SAP and Power BI to optimize supply chain networks and reduce operational expenses.
- Led cross-functional teams in executing scalable process improvements supporting customer-centric strategies.

Key Achievements:

- Reduced logistics costs by 20% through vendor negotiations and process enhancements.
- Improved inventory accuracy and lowered carrying costs by 23%.

T-Mobile – Coppell, TX

Sr. Vendor Solution Manager | 2009 – 2020

- Managed \$120M logistics network and team of 25+, overseeing procurement, distribution, and inventory management across multiple facilities.
- Designed and implemented lead-to-cash processes, increasing operational effectiveness and reducing costs.
- Established and maintained 3PL relationships, ensuring service level alignment and cost control.
- Created and standardized operating procedures to maximize efficiency and reduce bottlenecks.
- Conducted risk assessments and corrective actions to mitigate supply chain disruptions.

Key Achievements:

- Delivered \$10M in annual savings through logistics optimization initiatives.
- Reduced operational lead times by 15% and improved service delivery.

AT&T – Houston, TX

Retail Store Manager | 2004 – 2008

- Directed daily store operations, including inventory management and logistics, ensuring adequate stock levels to meet demand.
- Developed and trained a high-performing team, fostering accountability and professional growth.
- Consistently exceeded sales and customer satisfaction goals.
