EDUCATION

Masters in Data Science , Indiana University Bloomington , USA	May 2026
Course Work : Statistics, Data Visualization, Advanced Database Technology, Machine Learning, GPA : 3.9	
MBA, Information System , NMIMS, India,	GPA : 3.8 Sep 2024
Bachelor of Technology in Computer Engineering , Nirma University, India,	GPA : 3.6 June 2022

SKILLS

Languages & Databases: Python, R, PL/SQL, PostgreSQL, MySQL, NoSQL, MongoDB, Snowflake, Oracle,PySpark,VBA

Frameworks & Tools: Power BI, Tableau, Excel (Pivot Tables, VLOOKUP, VBA Macros, Power Query), OTBI, BI Publisher, Streamlit, Jupyter, AWS (EC2, S3, RDS), Qlik Sense, Visual Studio Code, GitHub, Jira, Confluence, Databricks,CI/CD pipeline implementation,Beautiful Soup, Selenium, Scrapy

Specializations & Techniques: Data Cleaning & Transformation, ETL Pipeline Design, Data Visualization, Statistical Modeling, A/B Testing, Data Storytelling, KPI Definition, Reporting Automation

ERP & Business Intelligence: Oracle Cloud ERP (Finance, SCM), SAP, Supply Chain Analytics, Manufacturing Metrics (OEE, Yield, Downtime), Analytical Reasoning, Quantitative Analysis, Cross-Functional Communication, Process Optimization, Agile Methodologies , HCM Modules

WORK EXPERIENCE

GIS ML Intern | Fenstermaker | Lafayette, USA **Sep 2025 - Dec 2025**

- Engineered a YOLOv8-based computer vision pipeline detecting **1,400+** MUTCD signs from roadway survey videos.
- Processed **40+ miles** of geospatial footage and integrated GPS-tagged detections into ArcGIS for roadway analytics.
- Orchestrated video-to-map workflows using GeoPandas/Pandas, reducing quality-check time by **50%**.

Graduate Teaching Assistant | Indiana University Bloomington,USA **Aug 2025 - Dec 2025**

- Guided **40+** graduate students through SQL, Arrow, Snowflake, and Neo4j coursework, providing technical support and feedback.
- Delivered weekly workshops on Snowflake, MySQL optimization, and Neo4j to strengthen student skills.

Operational Support Intern | Finetune | Chicago, USA **May 2025 - Aug 2025**

- Streamlined reporting for **50K+** utility records using Power BI, VBA, and Python, eliminating **8+ hours/week** of manual work.
- Optimized workflow efficiency by **25%** through pipeline enhancements, validation logic, and KPI redesign.
- Developed DAX/Power Query dashboards that surfaced operational and spending insights.

Research Assistant | Indiana University Bloomington,USA **Jan 2025 - May 2025**

- Prepared a **2,000+** case file database for the Indiana Innocence Project using SQL and Power BI, streamlining case selection by **35%** and delivering actionable insights.

Oracle Tech ERP Consultant | Mastek | Ahmedabad, India **Jan 2022 - Aug 2024**

- Built **17+** Oracle ERP dashboards with BI Publisher, OTBI, and VBA, cutting latency by **99%** and enabling real-time analytics.
- Automated cross-functional reporting workflows, reducing manual work by **60%**.
- Collaborated with finance/procurement teams to define KPIs and deliver executive insights.

PROJECTS

Traffic Sign Detection & Mapping - Python, YOLOv8, OpenCV, ArcGIS, GeoPandas

- Developed an AI-based traffic sign and light detection model using YOLOv8 and OpenCV mapped results with GPS metadata to create ArcGIS shapefiles for roadway analytics.
- Processed **40+** miles of roadway footage generating **1,400+** sign detections mapped into ArcGIS.

IndyGo Ridership Power BI Dashboard – Power BI, DAX, SQL

- Built an interactive dashboard for **500K+** transit records to analyze ridership trends and upgrade scheduling; improved planning accuracy by **30%**.

American Express Default Prediction – Python, Pandas, SQL, Scikit-learn

- Project aligned with real-world financial services workflows by reducing processing time by **40%** and increasing accuracy by **30%**.
- Conducted ROC/AUC, precision-recall and SHAP analysis to explain model decisions. Streamlined ETL preprocessing reduces pipeline runtime by **50%**.

Smart Approval System - SQL, ERP Automation, Cloud Architecture

- Automated ERP workflows and recalibrated SQL queries, improving financial data processing efficiency. Revamped cloud-based pipelines (AWS S3) to accelerate reporting by **35%** and reduce storage costs by **12%**.
