

Sairam Siripuram | Data Analyst

Location: Denton, TX | Email: siripuramsairam95@gmail.com | Mobile no: +1 (940)-326-1200 | [LinkedIn](#)

SUMMARY:

- Data Analyst with 4+ years of experience delivering analytics solutions across healthcare and banking domains, specializing in end-to-end data pipelines, advanced SQL, and cloud-based data platforms to support regulated, data-intensive environments.
- Proven expertise in healthcare and financial analytics, including claims and revenue cycle analysis, fraud detection, predictive modeling, and A/B testing to improve operational efficiency, compliance, and decision-making.
- Strong stakeholder-facing professional with hands-on experience in Power BI dashboards, Agile delivery, data governance, and regulatory compliance (HIPAA, GDPR, RBI), enabling actionable insights for leadership and operational teams.

TECHNICAL SKILLS:

Data Analysis & Reporting:	Tableau, Power BI, Excel (Pivot Tables, VLOOKUP), Advanced Excel, Excel VBA
Databases & Querying:	SQL, Oracle SQL, MySQL, PostgreSQL, Snowflake
ETL & Data Integration:	SSIS (SQL Server Integration Services), Azure Data Factory, AWS S3, AWS RDS, AWS Redshift
Data Transformation & Scripting:	Python (for automation and reporting), SQL (CTEs, window functions, joins)
Healthcare Data Standards:	EDI 837, EDI 835, HL7, FHIR, EMR, EHR
Compliance & Security:	HIPAA, CMS Regulations, PHI Governance, GDPR, RBI Guidelines
APIs & Integration:	FHIR APIs, EDI Transaction Mapping
Cloud Platforms:	Microsoft Azure, AWS (S3, RDS, Redshift)
Project & Agile Tools:	Jira, Confluence
Data Governance:	Data Quality Validation, Governance Standards, Joint Application Development (JAD)
Statistical Techniques:	A/B Testing, Fraud Detection Algorithms
Collaboration & Modeling:	Agile Scrum, Use Cases, User Stories, Sprint Management
Other skills:	Ggplot, Jupyter Notebook, decision tree, linear regression, Looker Studio, BigQuery, Data Storytelling, Data Wrangling, Regression analysis, A/B testing, Data Modeling, Data Cleaning, Data Transformation, Data Visualization, Data warehousing
Operating systems:	Windows, Linux, Mac, iOS

WORK EXPERIENCE

McKesson- TX	Aug 2024 - Present
Data Analyst	

- Designed and maintained end-to-end healthcare data pipelines in Azure Data Factory to ingest, transform, and standardize clinical, claims, and operational datasets.
- Analyzed EDI 837/835 claims using Advanced SQL to detect billing anomalies, denial patterns, and reimbursement leakage across payer systems.
- Built robust data quality frameworks with automated validation checks to ensure accurate, consistent, and HIPAA-compliant handling of PHI.
- Developed interactive Power BI dashboards for leadership, clinicians, and compliance teams to monitor denials, turnaround time, and utilization metrics.
- Mapped and integrated FHIR APIs with internal systems to improve interoperability between EMR/EHR platforms and analytics layers.
- Engineered analytics-ready datasets using SQL techniques including CTEs, window functions, and complex joins for reporting and modeling.
- Conducted A/B testing on care management and billing workflows to evaluate impact on denial reduction and processing efficiency.
- Applied regression and decision tree models to predict high-risk claim rejections and prioritize remediation actions for revenue cycle teams.
- Partnered with cross-functional teams in Agile Scrum using Jira and led JAD sessions to align analytics deliverables with CMS and governance requirements.

BitInfoCom Technologies. - India	May 2020 – Jun 2023
Data Analyst	

- Utilized advanced SQL across Oracle SQL, MySQL, and PostgreSQL to execute complex data extraction and transformation workflows, significantly improving query performance and banking data retrieval efficiency.
- Designed and implemented end-to-end ETL pipelines using SQL Server Integration Services (SSIS), integrating multiple financial data sources and enhancing data accuracy, consistency, and availability.
- Built interactive Power BI dashboards to track critical financial KPIs & operational metrics, enabling data-driven strategic decisions within Indian banking landscape.
- Leveraged AWS services including S3, and Redshift to optimize cloud-based data storage and analytics, reducing data access latency and improving system scalability.
- Developed and deployed fraud detection models capable of accurately identifying suspicious transactions, strengthening risk management and transaction monitoring processes.
- Automated recurring financial and operational reports using Python and Excel VBA, substantially reducing manual effort and increasing analyst productivity.
- Designed structured A/B testing frameworks to evaluate marketing campaigns, delivering measurable improvements in customer engagement and conversion performance.
- Collaborated with IT and compliance teams to implement data encryption and governance controls, ensuring adherence to GDPR and RBI regulatory standards.

EDUCATION

Master of Advanced Data Analytics - University of North Texas & Denton, USA
Bachelor of Engineering in Electronics –Anurag University, Hyderabad, India
Certifications: Data Analytics using Python (NPTEL) Python & ML (Coursera)
