Summary

Senior Data Analyst with experience driving revenue growth, cost optimization, and operational efficiency through data-driven decision-making. Proven expertise in building automated analytics pipelines, KPI frameworks, and executive dashboards using Python, SQL, Power BI, and cloud platforms (Azure, Databricks, AWS). Strong track record partnering with cross-functional stakeholders across healthcare, e-commerce, and operations to deliver scalable insights, measurable business impact, and high-visibility outcomes in fast-paced environments.

Technical Skills

Core Competencies: Data Cleaning | Business Analysis | ETL | Data Visualization | Database Management | Statistical Analysis | Business Intelligence | Data Warehousing | **Programming & Querying:** Python (Pandas, NumPy, scikit-learn) | SQL (MS SQL Server | PostgreSQL | MySQL) | Spark SQL | **BI & Analytics Tools:** Power BI (DAX) | Tableau | Alteryx | **Cloud & Data Platforms:** Azure | Databricks | AWS | **Productivity & Methodologies:** Advanced Excel | VBA | Agile

Experience

Data Analyst

Dec 2025 – Present

Forman Technology

Remote, Austin, TX

- Working as a consultant on a US-based healthcare project, analyzing revenue cycle, claims, and financial performance data using SQL Server, Power BI, and Excel to identify trends, inefficiencies, and revenue leakage.
- Partnering with cross-functional stakeholders to translate business and operational requirements into KPI frameworks, analytical workflows, and dashboards, delivering timely, data-driven insights in a client-facing environment.

Analytics Consultant

Dec 2024 – Oct 2025

Acculevel Inc

Rossville, IN

- Collaborating with business leaders to define KPIs and deliver insight-driven analytics for Finance, Sales, Marketing, Operations, and Inventory teams.
- Translating business requirements into automated reporting solutions using SQL, Python, Excel VBA Macros, Power BI, and data models on Azure/Databricks, saving around 600 staff hours/month and \$30K/month in labour costs.
- Built 13+ Power BI dashboards (sales, vendor performance, price optimization, supply chain efficiency), driving staffing changes, vendor contract renegotiations, and pricing adjustments, contributing to a 5% YoY revenue lift (~\$5M).

Data Science Consultant

Jan 2024– May 2024

Prediction Guard

Hyderabad, TG

- Supported the core technical team by developing Federated Learning (FL) frameworks to enhance data privacy across image, text, and translation use cases.
- Leveraged a Power BI Dashboard to present the findings on the trade-offs between accuracy and computational resources in federated configurations, by varying FL rounds, epochs, and client count.

Senior Data Analyst

Dec 2021– Mar 2023

Accordion

Hyderabad, TG

- Owned and managed data processes for a US-based Healthcare client across Accounts Receivable, Claims Monitoring, and Productivity workstreams.
- Led a team of 3 analysts to process large-scale datasets and deliver actionable insights using SQL, Python, SSIS and Power BI.
- Prepared an automated end-to-end data pipeline to process EDI 835 Remittance data and monitor Claim Denial KPIs, helping the client target and prioritise specific claims, decreasing net denial amount by 10%.
- Performed ad hoc and root cause analyses to improve visibility in the Claims Management process, reducing rejected claims by 2% and increasing Clean Claim Rate by 5%.

Graduate Engineer - Analytics

Jul 2020– Aug 2021

HINDALCO	Renukoot, UP
● Maintained detailed data-driven Excel reports on maintenance operations and workload management. ● Designed and deployed 4 Power BI dashboards to monitor critical KPIs related to inventory management and production, reducing stockout rate by 5% and enhancing production efficiency. ● Prepared preventive maintenance schedules based on plant and workforce availability data, reducing downtimes by 20%.	

Projects	
Enhancing E-Commerce Efficiency github.com/saurav006/STEM Store Data Analysis	
● Optimized delivery vendor and driver allocation for an e-commerce platform to reduce delays and operational costs. Designed complex SQL queries to analyze delivery performance, identify bottlenecks, and recommend optimization strategies. ● Tools used: SQL (CTEs, Window Functions), Python, Excel	
Predictive Sales Forecasting github.com/saurav006/Forecasting-Walmart-Sales	
● Built time-series forecasting models to predict retail sales trends using historical transaction data, seasonality, and external signals to support inventory planning. ● Performed data cleaning, feature engineering, and model development using statistical and LSTM-based approaches; evaluated models and translated results into business-focused insights. ● Tools used: Python, Pandas, Machine Learning, Long Short-term Memory (LSTM), Keras, TensorFlow	

Education	
Purdue University	West Lafayette, IN
Master of Science in Business Analytics & Information Management	Aug 2023 – Aug 2024
Birla Institute of Technology and Science Pilani	India
Bachelor of Engineering (Mechanical Engineering) & Master of Science (Physics)	Aug 2015 – Aug 2024

Certifications	
Tableau Desktop Specialist Credential	
Associate Certified Analytics Professional (aCAP) Credential	
Databricks Lakehouse Fundamentals Credential	
Alteryx Designer Core Credential	
MS Azure Fundamentals Credential
