

SUMMARY

Supply Chain & Operations Analyst with 3.5+ years of experience supporting production planning, inventory control, procurement coordination, and logistics execution across manufacturing and distribution environments. Hands-on experience in demand analysis, inventory allocation, and warehouse operations to support service levels and delivery performance. Strong in tracking and analyzing operational KPIs (OTIF, lead time, cycle time), collaborating cross-functionally to resolve bottlenecks, and supporting S&OP/S&OE execution to improve operational reliability and reduce shortages.

SKILLS

Supply Chain & Operations

Demand Planning, Inventory Optimization, Safety Stock & Reorder Points, MRP/MPS, Production & Capacity Planning, Warehouse Operations, WIP Control, Service Level Management

Operations Analytics & KPIs

Forecast Accuracy (MAPE, Bias), OTIF, Lead Time, Cycle Time, Inventory Turns, Bottleneck Analysis, Root Cause Analysis

Tools & Systems

SAP (Inventory Management, MRP, Master Data), Advanced Excel (Pivot Tables, Power Query), Power BI, SQL (Basic)

Execution & Cross-Functional

S&OP / S&OE Support, Supply–Demand Alignment, Operations Reviews, Stakeholder Coordination, Continuous Improvement (Lean)

PROFESSIONAL EXPERIENCE

Supply Chain Analyst | CISCO Systems, USA

August 2025 - Present

- Analyzed historical shipment and demand data at **SKU and regional levels** to support short-term demand planning for enterprise networking products
- Measured forecast accuracy using **MAPE and bias**, identifying error patterns and contributing to a ~12–15% improvement in forecast accuracy
- Supported safety stock and reorder point calculations by modeling demand variability and supplier lead-time fluctuations (± 20 –30%), reducing stockout risk during demand spikes
- Performed what-if scenario analysis (demand surges, supplier delays, constrained capacity) to assess inventory availability, helping planners proactively mitigate service-level risks (95%+ target)
- Built and maintained **Excel and Power BI reports** to track inventory levels, service performance, and forecast trends for planning reviews

Operations Analyst | KIM FABS, India

Sep 2020 - July 2023

- Supported **production planning and control (PPC)** activities for shipbuilding and pipeline fabrication projects by aligning production schedules with project demand, material availability, and milestone timelines.
- Built and maintained **material, manpower, and capacity plans** to support fabrication activities, improving resource utilization by ~15–20% and reducing schedule slippage.
- Monitored **work-in-progress (WIP)** across multiple fabrication stages, identifying bottlenecks and coordinating corrective actions with production teams to improve throughput and reduce idle time.
- Worked closely with quality and shop-floor teams to track inspections and non-conformances, contributing to a **10–12% reduction in rework and defects** and more predictable downstream execution.
- Coordinated with procurement and stores teams to ensure **timely material availability**, supporting uninterrupted production and minimizing line stoppages.
- Tracked **inbound and outbound logistics** between warehouses like fabrication yards, and client sites, monitoring shipment schedules, freight movements, and KPIs such as **OTIF and lead times**, contributing to ~98% on-time work completions.

PROJECTS

Demand & Inventory Optimization – Networking Hardware

- Analyzed SKU- and region-level historical demand to support Demand and Inventory planning.
- Used **MAPE, forecast bias, safety stock logic, and scenario analysis** to improve forecast reliability and inventory availability.

Production planning and control

- Analyzed production planning, WIP, and capacity data for large-scale fabrication projects to align schedules, materials, and manpower with delivery timelines.
- Supported operational efficiency and on-time execution by assisting with bottleneck analysis, quality coordination, and logistics KPI tracking.

EDUCATION

Master of Science in Engineering Management | California State University, Northridge (CSUN), USA April 2025

Bachelor of Mechanical Engineering | MVGR College of Engineering(A) - Affiliated by JNTUK, India June 2022
