

Khan Mohammed

Data Analyst

mohiuddin@mymailbox.net | (602) 585-8910 | USA | [LinkedIn](#)

Summary

Experienced Data Analyst with 3+ years of experience in transforming complex data into actionable insights to support strategic decision-making. Proficient in SQL, Python, R, and various BI tools such as Power BI and Tableau. Adept at data cleaning, validation, and visualization, with strong expertise in ETL processes using cloud platforms like AWS and Azure. Collective team player with a solid understanding of data analytics, statistical methods, and agile workflows, committed to driving business gains via data-driven solutions.

Technical Skills

- **Programming & Scripting:** Python (pandas, NumPy, scipy), R
- **Database & Query Languages:** SQL (window functions, subqueries)
- **Data Visualization & BI Tools:** Power BI (DAX, custom visualizations, drill-through), Tableau (LOD expressions, real-time integration)
- **Cloud & ETL Tools:** AWS Athena, AWS Glue, AWS Lambda, Azure Data Factory
- **Analytics & Modeling:** Cluster analysis, customer segmentation, trend analysis, outlier detection
- **Collaboration & Methodologies:** Agile sprints, cross-functional teamwork, requirement gathering
- **Data Sources:** CRM systems, transactional logs, feedback systems, HR & procurement data

Professional Experience

Data Analyst, Brex

10/2024 – Present | Remote, USA

- Worked on Transaction Data Analysis for Insights on Customer Spending Behavior, collaborating with the marketing and product teams in agile sprints and requirement-gathering sessions, resulting in a 20% gain in insights for targeted marketing strategies.
- Utilized SQL with window functions and subqueries to optimize database queries and ETL processes using AWS Athena. Extracted data from CRM and transaction logs in CSV format, reducing processing time by 25% for faster analysis.
- Conducted cluster analysis to group customers based on spending behavior, identifying key segments that contributed to a 15% improvement in marketing ROI by delivering more personalized customer offerings.
- Used Python with NumPy, pandas, and scipy for data transformation, trend analysis, and outlier detection, improving the quality of insights by 30% and reducing manual data wrangling time by 20%.
- Validated data during ETL processes using AWS Glue and AWS Lambda to ensure data integrity, resulting in 98% data accuracy and preventing incorrect insights from being delivered to stakeholders for decision-making.
- Created PowerBI dashboards, incorporating drill-through, real-time data refresh, and custom visualizations. Used DAX to create advanced metrics, enabling marketing teams to make data-driven decisions, improving campaign performance by 25%.

Programmer Analyst, Cognizant India

03/2022 – 07/2023 | Onsite, Bengaluru, India

- Collected and processed data for customer segmentation by collaborating with marketing, sales, and IT teams, conducting agile sprints and requirement gathering, improving data availability for analysis by 20% to enhance customer targeting strategies.
- Optimized SQL queries for ETL processes using Azure Data Factory, extracting data from CRM, transactional, and feedback systems, reducing data processing time by 30%, and ensuring clean, structured data for analysis.
- Conducted cluster analysis using R's k-means clustering to segment customers into actionable groups, leading to an 18% improvement in targeted marketing efforts and a more refined approach to customer engagement.
- Utilized Python with NumPy and pandas to clean, manipulate, and transform large datasets, achieving a 25% efficiency increase in processing time, eliminating manual errors, and ensuring high-quality inputs for analysis.
- Validated data using Azure Data Factory for ETL processes, ensuring 98% data accuracy by resolving inconsistencies, maintaining data integrity, and enabling reliable insights for decision-making across multiple teams.
- Built Tableau dashboards, incorporating Level of Detail (LOD) expressions and real-time data integration, validating data during visualization, ensuring 99% accuracy, and enabling faster decision-making, resulting in a 40% increase in the efficiency of customer targeting campaigns.

Associate Data Analyst, Ameriprise India

01/2021 – 02/2022 | Remote, Hyderabad, India

- Assisted in collecting and analyzing operational data from HR, procurement, and customer service to identify inefficiencies, collaborating with cross-functional teams to understand operational workflows, ultimately driving insights that supported 18% reduction in operational costs.
- Utilized SQL and Python (pandas) to clean, transform, and analyze large datasets, identifying key inefficiencies in processes, and providing actionable insights to operations and finance teams for cost-saving opportunities, improving resource allocation by 20%.
- Build Tableau dashboards for real-time monitoring of operational performance, enabling data-driven decisions and validating process gains, overcoming resistance to change and easing smooth implementation, resulting in a 15% gain in operational efficiency.

Education

Ira A. Fulton Schools of Engineering, Arizona State University

Master of Science in Information Technology (Project Management)

College of Engineering, Andhra University

Bachelor of Technology in Information Technology

Tempe, AZ, USA

08/2023 – 05/2025

Visakhapatnam, India

06/2018 – 05/2022

Certificate

[AWS Certified Solutions Architect](#)
