

SUMMARY

Data Analytics & Business Intelligence professional skilled in **SQL, Python, PySpark, Power BI**, with expertise in **Azure cloud platforms** and **data modeling**. Proven track record in building **dashboards, pipelines, and reports** that drive **actionable business insights**. Strong **communicator** and **collaborator**, experienced in **presenting findings to stakeholders** and enabling **data-driven decisions**.

PROFESSIONAL EXPERIENCE

Data Analyst – Healthcare | GE HealthCare | India **June 2022 – November 2023**

- Consolidated and validated clinical and operational datasets from multiple systems using SQL and AWS Glue, enabling actionable insights across 1M+ patient and service records and supporting data-driven decision-making.
- Designed and deployed automated ETL pipelines and Power BI dashboards to monitor service utilization, throughput, and KPIs, reducing manual processing by ~60 staff hours/month and providing weekly insights to 20+ stakeholders.
- Diagnosed and resolved data inconsistencies, standardized definitions, and implemented validation checks across reporting layers, enhancing data reliability, audit readiness, and trust in operational metrics.
- Collaborated with cross-functional teams in clinical, IT and operations to translate business and compliance requirements into scalable analytics workflows, maintaining thorough documentation and monitoring pipeline performance for continuous improvement.

Data Analyst | Advantum Health | India **July 2021 – May 2022**

- Analyzed large-scale healthcare datasets using SQL and Python to build and optimize ETL workflows, delivering actionable insights that improved operational efficiency, clinical outcomes, and data-driven decision-making.
- Developed and maintained interactive dashboards and standardized reports to track KPIs, enhancing visibility into revenue cycle performance, provider productivity, and business trends.
- Spearheaded data quality initiatives with business and technical stakeholders by validating, transforming, and standardizing data across pipelines, improving accuracy, reliability, and usability for enterprise-level reporting and analytics.

Data Analyst Intern | Advantum Health | India **January 2021 – June 2021**

- Assisted in optimizing ETL workflows across multiple source systems, reducing daily data refresh times and improving accessibility of reporting datasets for analytics teams.
- Supported data validation and reconciliation processes across ingestion, transformation, and reporting layers, helping maintain accurate KPIs and executive dashboards.
- Contributed to cloud data lake management on AWS and Azure, applied data governance standards, and documented workflows to enhance reporting reliability and team collaboration.

PROJECTS

End-to-End Azure Data Lakehouse Pipeline | ADF, Databricks, Synapse, Power BI **September 2025 – October 2025**

- Built Azure Data Factory pipelines to ingest multi-table CSVs from a GitHub API into ADLS Gen2 and Engineered a Gold layer in Azure Synapse using Parquet external tables and views.
- Performed advanced data cleansing and feature engineering on three years of sales and customer data using Databricks PySpark, including complex string and date-time transformations.

Netflix Content Analytics | SQL, Python **March 2025 – April 2025**

- Created a 50K-title relational database, ran 15+ SQL queries and cleaned 10K+ records in Python to reveal content trends and insights.
- Produced visualizations of top genres, yearly hits, and top actors/directors to drive data-informed content strategy.

Delivery Management System Optimization | SQL **October 2024 – November 2024**

- Optimized delivery workflows with SQL, boosting service performance by 15% through data-driven insights.
- Crafted ERDs and implemented SQL triggers to automate workflows, enforce data integrity, and reduce operational errors.

TECHNICAL SKILLS

- Programming & Query Languages:** Python (Automation, Scripting, Data Processing), SQL (Querying, Automation, ETL), R
- Data Engineering & Big Data:** ETL/ELT pipelines, Data Lakes & Warehousing, Data Integration & Transformation, Data Modeling & Architecture (SSIS, Azure ADF, Databricks, Synapse, Delta Lake, AWS Glue/S3/Redshift, Snowflake, BigQuery)
- Databases:** MySQL, PostgreSQL, SQL Server, MongoDB
- Cloud Platforms & Services:** Azure, AWS, GCP – including ADF, Databricks, Synapse, Functions, DevOps, S3, EC2, Lambda, Glue, Athena, BigQuery, DataFlow
- Data Analytics & Visualization:** Business Intelligence & Dashboarding: Power BI (Dataflows, M Query), Tableau, Advanced Excel (Pivot Tables, Lookups, Macros, VBA), KPI Development, Executive Dashboards, Throughput Monitoring, Audit-Ready Reporting, Python & R Libraries: Pandas, NumPy, Matplotlib, Seaborn, Plotly, SciPy
- Machine Learning & Data Science:** Supervised & Unsupervised Learning: Regression, Classification, Clustering (K-Means, DBSCAN), Decision Trees, Random Forest, Logistic Regression, Neural Networks, Predictive Analytics, Statistical Methods (Hypothesis Testing, Regression), NLP & Text Analytics: NLTK, Sentiment Analysis
- Data Governance & Quality:** Data Validation, Reconciliation, Standardization, KPI Definitions, Compliance
- DevOps & Collaboration Tools:** Git, Jenkins, JIRA, Confluence, Zephyr Scale, Jupyter Notebook, Google Colab
- Methodologies:** Agile, Scrum, SDLC
- Domain Expertise:** Clinical & Operational Data Analysis, Workflow Implementation, Requirements Translation

EDUCATION

The University of Texas at Dallas | TX, USA **January 2024 – December 2025**
Master of Science, Business Analytics and AI GPA: 3.5/4
