SUMMARY

Supply Chain professional with 4+ years of experience utilizing Python (Pandas), SQL, and SAP S/4HANA to optimize global logistics networks. Expert in Strategic Sourcing and Inventory Management, with identifying and eliminating \$120,000+ in annualized waste through advanced Data Validation and Lean Six Sigma methodologies. Bridging the gap between technical data analysis and strategic operations management in the US market.

SKILLS

ERP & Supply Chain Systems: SAP S/4HANA (MM/PP/SD), Oracle SCM, NetSuite, Blue Yonder, S&OP, Demand Forecasting, Inventory Optimization (EOQ/Safety Stock), MRP, WMS/TMS.

Analytical Skills & Reporting: SQL (Queries/Joins), Python (Pandas), Advanced Excel (VBA/Macros/Power Query), Power BI, Tableau, KPI Dashboards, Statistical Analysis, Predictive Modeling, Data Validation.

Process & Project Management: Lean Six Sigma, Root Cause Analysis (RCA), Risk Mitigation & Resiliency, Sustainability (ESG) Reporting, Agile/Scrum, Strategic Sourcing, Procurement, Logistics & 3PL.

WORK EXPERIENCE

Gxo Logistics Inc. | USA | Supply Chain Analyst (Digital Transformation & ERP) **November 2024 - Present**

- Engineered a Python (Pandas) script for automated Data Validation to refine Inventory Optimization models, improving stock accuracy by 18% across three centers.
- Managed Data Integrity for 70,000+ SKUs by executing complex SQL (Queries/Joins) to extract movement data from Blue Yonder and validate it against ERP records.
- Reduced weekly KPI Dashboard reporting lead time by 12 hours by utilizing Advanced Excel (VBA/Macros) and Power Query to accelerate Statistical Analysis.
- Identified and eliminated \$120,000 in annualized waste by applying Risk Mitigation strategies to Logistics routes and optimizing Strategic Sourcing allocations.
- Designed a Power BI "Control Tower" using Predictive Modeling principles within an Agile/Scrum workflow to visualize realtime flows and prevent stockouts.

Shiprocket Fulfillment | India | Supply Chain Manager **January 2022 - July 2023**

- Spearheaded a Lean Six Sigma driven Logistics network optimization that increased On-Time-In-Full (OTIF) delivery rates by 22% via enhanced 3PL performance tracking.
- Orchestrated the Strategic Sourcing and onboarding of 5 new 3PL partners to enhance Risk Mitigation & Resiliency, expanding delivery coverage to two new regions.
- Chaired daily S&OP meetings with 15 stakeholders to align Demand Forecasting accuracy with Procurement schedules and Inventory Optimization (EOQ) targets.
- Negotiated Procurement contracts and SLAs within the TMS (Transportation Management System), securing a fixed rate reduction that saved the company \$45,000 per quarter.
- Executed rigorous Root Cause Analysis (RCA) on WMS dispatch errors, implementing a standardized Process Management protocol that resolved shipment inaccuracies.

DB Schenker | India | Supply Chain Executive **February 2020 - December 2021**

- Improved Demand Forecasting accuracy by 15% by applying Statistical Analysis to historical sales data and adjusting Safety Stock levels in SAP S/4HANA.
- Coordinated the Logistics movement of 123+ TEUs monthly, ensuring compliance with Risk Mitigation standards and international Procurement documentation.
- Slashed Procurement lead times from 14 days to 9 days by consolidating Strategic Sourcing channels and optimizing MRP (Material Requirements Planning) inputs.
- Validated Data Integrity within SAP S/4HANA (MM/SD) modules to ensure accurate Material Requirements Planning (MRP) runs and seamless Order Processing.

PROJECTS

Respiratory Cancer Survival Prediction Using Machine Learning

- Built an end-to-end ML pipeline on SEER data using CRISP-DM, applying KNN imputation for 50% missing values and achieving 89% accuracy and 0.94 AUC-ROC with XGBoost.

Customer Churn Prediction & Retention Strategies

- Developed and compared Logistic Regression, Naive Bayes, LDA, and QDA models in R, using ROC curve analysis to optimize thresholds and propose actionable retention strategies to reduce churn.

Large-Scale Data Analytics

- Processed 100K+ records via SQL and Python for ETL, data cleaning, and feature engineering, leveraging Scikit-learn regression models to deliver scalable, data-driven predictive insights.

EDUCATION

Masters in Business Analytics

September 2023 - June 2025

University of Dayton, OH, USA.

Bachelors in Mechanical (B-Tech)

September 2012 - May 2016

DR. M.G.R Educational and Research Institute University, Tamil Nadu, India.
