

SAMKIT BAFNA

Supply Chain Analyst

Chicago, IL | (260) 387-2382 | samkitbafna39@gmail.com | LINKEDIN: [samkitbafna](#)

PROFESSIONAL SUMMARY

Results-driven **Supply Chain Data Analyst** with **4+ years** of progressive experience delivering data-backed demand forecasting, inventory optimization, and supply chain analytics across global operations. Proven expertise analyzing **5,000+** SKUs and **10,000+** products using **SQL, Tableau, Excel**, and **Python** to improve forecast accuracy by **30%**, reduce stockouts by **25%**, and generate **\$250K+** in cost savings. Demonstrated track record in **KPI automation, OTIF management**, inventory turnover optimization, and leading cross-functional analytics initiatives with procurement, logistics, and operations teams.

CORE COMPETENCIES

Supply Chain & Analytics: Demand Forecasting, Inventory Optimization, Safety Stock Modeling, Reorder Point Analysis, ABC/XYZ Analysis, OTIF Metrics, Inventory Turnover, S&OP Planning, Capacity Planning, Scenario Analysis, Fill Rate Optimization, Lead-Time Analytics

Data & BI Tools: SQL (CTEs, Window Functions, Query Optimization), Advanced Excel (Power Query, XLOOKUP, Pivot Tables, VLOOKUP), Tableau, Power BI (DAX), Data Visualization

Programming & Analytics: Python (Pandas, NumPy, Data Wrangling), Statistical Analysis, Root Cause Analysis, Reporting Automation, Data Governance

ERP & Systems: SAP MM/SD, Oracle SCM, Warehouse Management Systems (WMS), Order Management Systems (OMS)

Cloud & Data Platforms: AWS (S3, Athena, Redshift), Azure (Data Factory, Synapse), Snowflake, Data Warehousing

Procurement & Supplier Management: Spend Analysis, Vendor Scorecards, Vendor Performance Management, SLA Management

Collaboration & Tools: Jira, Confluence, Git, Agile/Scrum, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Supply Chain Analyst / Data Analyst | Honeywell | USA

July 2025 – Present

- Analyzed end-to-end supply chain data using **SQL, Tableau**, and **advanced Excel** for **5,000+ SKUs** across 3 regions, enabling data-driven decision-making for leadership and improving operational visibility globally.
- Developed and deployed demand forecasting models utilizing historical **sales data**, seasonality patterns, and trend analysis, improving forecast accuracy by **30%** and reducing forecast bias; supported **S&OP** planning cycles for **50+** stakeholder team
- Optimized inventory planning and safety stock levels through granular **SKU-level analysis**, reducing stockouts by **25%** while maintaining **98%+ service-level** targets across all regions; delivered **\$150K+** in working capital savings.
- Built and deployed automated Tableau dashboards tracking inventory turnover, **OTIF**, lead time variance, and forecast variance, eliminating **15+ hours per week** of manual reporting and improving data accessibility for **50+ stakeholders**
- Analyzed vendor and supplier performance **KPIs** including lead time, fill rate, and on-time delivery metrics, enabling **20%** faster replenishment cycles and improved supplier accountability through performance scorecards
- Partnered with procurement, **logistics**, and **ERP teams (SAP/Oracle)** to standardize **KPI** definitions, improve data accuracy, and scale analytics solutions across global operations; led data governance initiatives

Supply Chain Analyst | Amazon | USA

September 2024 – July 2025

- Analyzed fulfillment center inventory, demand, and logistics data using **SQL** and **advanced Excel** across **5 distribution centers**, reducing overstock by **18%** and improving inventory turnover by **12%** through data-driven recommendations
- Forecasted demand for **10,000+ SKUs** utilizing statistical models and trend analysis, supporting high-volume fulfillment operations and achieving **92% on-time delivery (OTIF)** performance; enabled accurate safety stock levels
- Designed and maintained Tableau dashboards tracking vendor performance metrics, **OTIF**, lead times, and fill rates, accelerating corrective actions by **30%** and improving cross-functional visibility for operations and procurement teams
- Led inventory audits and optimization initiatives across **5 warehouses**, identifying process gaps, eliminating excess stock, and delivering **\$250K** in cost savings through data-driven recommendations and cycle time improvements
- Optimized **Oracle SCM**-driven order and replenishment workflows, reducing order cycle time by **22%** and improving fulfillment efficiency; implemented best practices across fulfillment centers
- Collaborated cross-functionally with operations, procurement, and logistics teams to strengthen **SLA adherence**, improve **OTIF metrics**, and implement scalable analytics solutions

Supply Chain Analyst | Adani Group | India

July 2019 – July 2022

- Analyzed logistics, transportation, and procurement data using **SQL** and **Excel**, identifying optimization opportunities and reducing transportation costs by **15%** through route optimization and carrier performance management
- Forecasted demand and shipment volumes for **2,000+ monthly** shipments, improving fill rates by **28%** across regional distribution networks and enhancing inventory planning accuracy; supported **S&OP** initiatives
- Managed and analyzed port and yard inventory exceeding **50,000 tons per month**, improving inventory turnover and minimizing demurrage costs through **data-driven cycle** time improvements and capacity planning

- Developed supplier **KPI** dashboards tracking **OTIF**, **lead time**, and **cost variance**, improving supplier accountability and enabling data-driven performance management conversations; implemented vendor scorecards
 - Delivered **12% material** cost savings through comprehensive spend analysis and data-driven procurement optimization initiatives; conducted root cause analysis on cost drivers and process inefficiencies
-

TECHNICAL SKILLS

Databases & Query Languages: SQL, T-SQL, Complex Queries (CTEs, Window Functions, Subqueries), Query Optimization

Business Intelligence & Visualization: Tableau (Dashboard Design, Advanced Calculations), Power BI (DAX), Advanced Excel (Power Query, Pivot Tables, XLOOKUP)

Programming Languages: Python (Pandas, NumPy, Data Analysis, Data Wrangling), Statistical Programming

ERP Systems: SAP MM/SD, Oracle SCM, WMS, OMS

Cloud Platforms: AWS (S3, Athena, Redshift), Azure (Data Factory, Synapse), Snowflake, Data Warehousing

Collaboration & DevOps: Jira, Confluence, Git, Microsoft Office Suite

EDUCATION

Master of Science in Information Technology

Purdue University | USA

August 2022 – May 2024

Bachelor of Business Administration (Marketing & Finance)

Prestige Institute of Management and Research | India

June 2016 – May 2019

PROJECTS

Demand Forecasting & Inventory Optimization Initiative

- Analyzed demand and inventory data for **5,000+ SKUs** across multiple regions to identify variability drivers and improve planning accuracy.
- Built forecasting models incorporating seasonality and trend components, increasing forecast accuracy by **30%**.
- Automated **KPI** dashboards in **Tableau** integrating **SAP** and **Oracle data**, reducing manual reporting effort by 15+ hours per week.

Fulfillment Inventory & Vendor Performance Analytics

- Performed **SQL**- and **Excel**-based analysis of fulfillment center inventory and demand data, reducing overstock by **18%** and improving inventory turnover across high-volume operations.
- Forecasted demand for **10,000+ SKUs** using historical sales and trend analysis, supporting inventory optimization and achieving 92% on-time delivery.
- Developed Tableau **KPI** dashboards tracking vendor performance, lead time, **OTIF**, and fill rate, increasing supplier visibility and accelerating corrective actions by **30%**.
