

Naveen Reddy

DATA ANALYST

OH, USA | (551) 277-2724 | naveenreddy7249@gmail.com

SUMMARY

Data Analyst with over 3 years of experience in extracting, integrating, and analyzing complex datasets from pharmacy systems and financial claims platforms. Proficient in SQL, Python, and R, along with advanced Excel and visualization tools like Tableau and Power BI. Experienced in leveraging AWS, Azure, and Google Cloud Platform (GCP) for secure, scalable data processing and working across SQL-based databases such as MySQL, PostgreSQL, and MongoDB. Adept at building predictive models and applying machine learning to optimize pharmacy operations and drive data-informed business decisions.

SKILLS

Methodologies:	SDLC, Agile, Waterfall
Languages:	Python, R, SQL
IDEs:	Visual Studio Code, PyCharm, Jupyter Notebook
Packages:	NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, TensorFlow, Seaborn, dplyr, ggplot2, Keras
Visualization Tools:	Tableau, Power BI, Advanced Excel (Pivot Tables, VLOOKUP)
Cloud Technology:	Amazon Web Services (AWS), Azure, Google Cloud Platform
Database:	MySQL, SQL Server, PostgreSQL, MongoDB, Apache NiFi
Other Skills:	SSIS, SSRS, Machine Learning Algorithms, Probability distributions, ANOVA, Hypothesis Testing, Regression Analysis, Linear Algebra, Advance Analytics, A/B Testing, Data Mining, Data Visualization, Data warehousing, Data transformation, Association rules, Clustering, Classification, Regression, Data Cleaning, Data Wrangling, Jira, Git, GitHub
Operating System:	Windows, Linux, Mac OS

WORK EXPERIENCE

Data Analyst | Blue Cross Blue Shield of North Carolina, USA August 2024 –Present

- Extracted, cleaned, and transformed preventive care datasets from **SQL Server** and **MySQL** using **Python** (Pandas, NumPy) to support analytics use cases like appointment adherence, **outreach** engagement, and chronic disease screening KPIs.
- Built and maintained automated ETL pipelines using **SSIS** and **Apache NiFi** to ingest EHR logs, teleconsultation data, and wearable device records. Enhanced data consolidation across 5+ care management tools and reduced manual load by 30%.
- Developed scalable data transformation pipelines in **AWS Glue** to convert **HL7/FHIR-based semi-structured** data into **Redshift** tables. Enabled near real-time analytics for vaccination rates, screening coverage, and care quality metrics.
- Built ML pipelines in **Scikit-learn** to predict likelihood of patient non-compliance and readmission risks. Helped care coordinators prioritize proactive interventions for high-risk members, improving adherence and care outcomes.
- Designed and deployed **Power BI dashboards** to visualize appointment compliance, provider utilization, and outreach performance, enabling leadership to monitor preventive care trends and take timely population health actions.
- Partnered with clinical operations, compliance, and quality teams in **Agile/Scrum** using **Jira** to gather analytics needs, translate insights into measurable KPIs, and ensure alignment with **NCQA**, **HEDIS**, and **CMS** quality standards.
- Performed statistical analysis (mean shifts, confidence intervals) on screening results and engagement metrics, applying **HIPAA-compliant** data practices and ensuring PHI protection across all healthcare data operations.

Data Analyst | Capgemini, India May 2021 – Jun 2023

- Analyzed large-scale **private banking and investment advisory datasets** using **Python (Pandas, dplyr)** to identify risk-weighted asset imbalances, segment investor profiles, and enhance fund performance insights. Improved data preparation workflows by 35%.
- Utilized **Excel (VLOOKUP, PivotTables, conditional logic)** for swift reconciliation of account holdings, benchmark comparisons, and compliance validations, ensuring portfolio integrity and accuracy in advisory reports.
- Queried and aggregated **portfolio and transaction data** from **MongoDB** and **SQL Server** to generate consolidated client risk views, including volatility tiers, liquidity ratios, and performance benchmarks for downstream analytics.
- Performed **A/B testing** and **statistical evaluations (t-tests, confidence intervals)** to assess returns from strategic rebalancing and fund optimization. Informed advisor insights on asset allocation and investor retention.
- Managed secure **ETL pipelines** in **Microsoft Azure (ADF, Blob Storage)** and **GCP (BigQuery, Cloud Storage)** to process both structured financial transactions and semi-structured client communication logs.
- Built interactive **Tableau dashboards** to visualize KPIs such as portfolio exposure, advisor ROI, and client churn probability, empowering leadership to make timely, data-driven wealth management decisions.
- Collaborated with **risk, compliance, and data engineering teams** under **SDLC** and **Agile** frameworks to deliver investment analytics solutions aligned with internal audit and evolving market compliance mandates.
- Maintained modular **Python codebases** in **Jupyter Notebook** and **PyCharm** for data wrangling, predictive modeling, and dashboard automation, ensuring reproducibility and seamless version control via **Git**.

EDUCATION

Master of Science in Computers and Information Systems– Youngstown State University, Youngstown, OH, USA
