SUMMARY

Data Analyst with **3+ years** of experience transforming raw data into actionable insights that drive business growth and operational efficiency. Skilled in SQL, Python, Tableau, and Power BI, with hands-on expertise in data visualization, ETL pipeline optimization, and A/B testing. Proficient in business intelligence (BI), data storytelling, and statistical modeling, with a proven ability to collaborate with cross-functional teams to deliver data-driven strategies that improve decision-making and key performance outcomes. Experienced in CRM analytics (Salesforce, Google Analytics), marketing campaign optimization, and data governance to ensure data accuracy and compliance.

SKILLS

Programming & Analytics: Python, SQL, Data Analytics, Hypothesis Testing, Probability, Statistics, A/B Testing

Data Visualization & Reporting: Tableau, Power BI, Looker, Dashboard Creation, KPI Tracking, Business Reporting

CRM & Business Tools: Salesforce, CRM Systems, Google Analytics

Data Management: Advanced Excel (Pivot Tables, VLOOKUP, Index/Match), Data Cleaning, Data Wrangling

Databases: MySQL

Operating Systems: Windows, macOS

Web Technologies: Google AdWords, SEO, HTML5, CSS, JavaScript, WordPress Development

Soft Skills: Critical Thinking, Problem-Solving, Communication, Collaboration, Time Management

EXPERIENCE

Data Analyst

| Jun 2022 – Present

Dell Technologies, Round Rock, TX

- Designed and developed interactive Tableau and Power BI dashboards, providing real-time insights on business KPIs and enabling data-driven decisions across marketing, sales, and operations teams.
- Extracted, transformed, and analyzed large datasets using SQL, Python (Pandas, NumPy), and ETL workflows, ensuring data accuracy and consistency across multiple sources.
- Collaborated with business stakeholders to gather requirements, define metrics, and translate objectives into analytical solutions, improving cross-departmental reporting efficiency by 30%.
- Conducted A/B testing and statistical modeling (hypothesis testing, regression analysis) to evaluate marketing performance and optimize campaign strategies, increasing conversion rates by 12%.
- Managed and optimized MySQL databases, performing regular data integrity checks, performance tuning, and automated backups to maintain data security and reliability.
- Streamlined ETL pipelines and data staging processes, reducing data refresh times by 40% and improving dashboard update frequency.
- Utilized Python for data cleaning, transformation, and clustering analysis, benchmarking CRM data to identify customer behavior trends and business opportunities.
- Built and maintained Excel-based dashboards and Power Query reports with Pivot Tables and VLOOKUP for regional campaign performance tracking and ad hoc analysis.
- Partnered with the data engineering team to refine data warehouse architecture and optimize datasets for analytics and machine learning initiatives.
- Translated analytical insights into clear visual narratives and executive summaries, enabling senior leadership to take actionable business decisions with confidence.

Front End Developer

| Mar 2016 - May 2019

Progressive Insurance

- Developed data-rich marketing microsites (HTML5, JavaScript, D3, .NET, WordPress) with embedded analytics to track user engagement.
- Collaborated with marketers to analyze campaign performance via Google Analytics and AdWords, refining SEO strategy.

- Led WordPress redesign of Progressive's lifestyle blog, improving load speed by 40% and monthly views by 25%.
- Implement responsive and visually appealing UI/UX designs in collaboration with UX designers, resulting in a 30% increase in user retention rates for both web and mobile platforms.
- Develop dynamic client-side JavaScript codes for web forms, page navigation, and form validation, boosting user journey efficiency by 20%.
- Integrate front-end components with RESTful APIs in partnership with back-end teams, ensuring seamless data synchronization and 100% platform reliability.
- Create reusable front-end components using Bootstrap and SASS, enhancing scalability and improving maintainability by 25%.

PROJECTS

Power BI

- **Data Professionals Survey Report** - Summarized survey data to show job satisfaction
- **Superstore Analytics Dashboard** - Analyzed sales performance by category for a large Amazon seller
- **Quick Report of Sales Data by Associate** - Detailed associate performance is based on feedback data

Tableau

- **Road Accidents Dashboard** - Investigated UK accident data based on a variety of data points
- **Seattle Air BnB Research Report** - Summarized the STR market to recommend a property purchase

EDUCATION

Bachelor of Science in Web Design and Interactive Media

Art Institute of Las Vegas
