Education

University of North Texas

Bachelor of Science in Computer Science, Certificate in Cybersecurity

Denton, TX

Expected May 2026

- GPA: 4.0/4.0

Technical Skills

Programming Languages: C++, C#, Java, C, SQL, Python

Frameworks & Libraries: ASP.NET Core, EF Core, FastAPI, Angular

Databases: MSSQL, PostgreSQL, MongoDB

Tools & Platforms: Git, GitLab, Azure DevOps

Learning: Kubernetes, gRPC, RabbitMQ, CI/CD pipelines, Dapper, Microservices Architecture, Docker

Internship Experience

GM Financial

May 2025 – Aug 2025

Software Development Engineering Intern

Irving, TX

- Built over 70% of the Preferences Center UI using Angular in an Agile team, enabling responsive access to 5+ secure profile pages across 17+ device types
- Collaborated with cross-functional teams to integrate backend services, resolving CPM aggregator issues and unifying 4 GMF platforms (MyAccount, Mode, GMIC, Evolve), improving the customer experience for over 2 million users
- Improved product reliability by adding unit tests and refining UI/UX, making features easier to test and deploy

T2

Jun 2024 – Aug 2024

Backend Development Intern

Riyadh, Saudi Arabia

- Engineered backend for 3-role support platform, enabling role-based ticket views and handling 50+ concurrent sessions
- Delivered 20+ secure REST APIs with .NET and 3-tier architecture, ensuring RBAC and input sanitization to prevent injection risks and improve overall system security

Projects

Vellora | *FastAPI, PostgreSQL, AWS*

[GitHub Repository](#)

- Designed and built a mileage-tracking and reimbursement platform with trip management, expense tracking, configurable rate rules, and automated report generation
- Added asynchronous background processing for long-running tasks (e.g., report generation), improving API responsiveness and scalability
- Secured sensitive location and address data using encryption, ensuring safe storage and compliance-ready handling of user data

Basboosify | *C#, ASP.NET Core, Docker, gRPC, MongoDB, Redis, Azure, Kubernetes*

[GitHub Repository](#)

- Building a distributed e-commerce backend using microservices for identity, basket, and catalog services
- Adopting clean architecture with .NET APIs and gRPC, leveraging event-driven design via RabbitMQ to facilitate communication between services
- Containerized 2+ services locally with Docker, validating service interactions and preparing for scalable deployment

QuizApp | *Java, Spring Boot, Spring Cloud (Eureka, API Gateway), PostgreSQL, Maven*

[GitHub Repository](#)

- Refactored monolithic app into microservices (quiz, question, registry), improving scalability and maintainability
- Implemented service discovery and routing through Spring Cloud Eureka and API Gateway, allowing seamless communication between services, and enabling easy scalability

TickX | *C#, ASP.NET Core, EF Core, MSSQL, RESTful API*

[GitHub Repository](#)

- Developed the backend for a ticketing app using ASP.NET Core with a 3-tier architecture, focusing on JWT authentication, user management, RBAC, and ticketing operations
- Integrated Quartz.NET to schedule ticket reminder emails and separated DB logic into services to keep controllers clean and testable

Leadership Experience & Campus Involvement

Computer Science Club at Frisco

Fall 2023 – Spring 2024

President & Co-Founder

University of North Texas

- Grew to 20+ active members, boosting retention 40% through tech talks and hackathons
- Partnered with the Career Center to host 4 technical talks and a mini hackathon, bringing students together to code, debug, and build projects in a competitive setting
