

Princy Kishorbhai Sutariya

DATA ANALYST

New Jersey, USA | (551) 298-4355 | princysutariya28@gmail.com | <https://www.linkedin.com/in/princy-sutariya/>
<https://github.com/PrincySutariya19/projects>

SUMMARY

- Result – driven Data Analyst with 4+ years of expertise in designing and managing end-to-end data pipelines, from extraction and transformation to modeling and visualization, across healthcare and consulting domains.
- Skilled in gathering and translating complex business requirements into actionable data solutions, ensuring alignment between stakeholders and technical teams.
- Proficient in building and optimizing ETL workflows using tools such as AWS Glue, Informatica, and SSIS to integrate diverse datasets from enterprise systems including EHR, claims, and financial platforms.
- Strong background in relational and cloud databases, including Oracle, Snowflake, Redshift, and SQL Server, with hands-on experience in query optimization and data modeling.
- Adept at developing interactive dashboards and self-service analytics using Oracle Analytics Cloud, Tableau, Power BI, and AWS QuickSight to drive informed decision-making.
- Experienced in applying advanced analytics and statistical methods with Python, R, and machine learning frameworks to support forecasting, segmentation, and trend analysis.
- Demonstrated capability in ensuring regulatory compliance and secure data handling, with experience in HIPAA, SOX, and NCQA/HEDIS reporting requirements.
- Effective in Agile delivery environments, using JIRA and Confluence to support cross-functional collaboration and iterative solution development.

SKILLS

Methodologies:	SDLC, Agile, Waterfall
Programming Language:	Python, SQL, R
Packages:	NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, TensorFlow, Seaborn, dplyr, ggplot2
Visualization Tools:	Tableau, Power BI, Advanced Excel (Pivot Tables, VLOOKUP, Macros, VBA)
IDEs:	Visual Studio Code, PyCharm, Jupyter Notebook, IntelliJ
Database:	MySQL, PostgreSQL, MongoDB, SQL Server
Cloud Platform:	Amazon Web Services (AWS), Google Cloud Platform (Looker studio, Vertex AI)
Other Technical Skills:	SSIS, SSRS, Looker, Machine Learning Algorithms, Statistics, Alteryx, Google Big Query, Power Query, Probability distributions, Mathematics, Confidence Intervals, ANOVA, Advance Analytics, OLAP & OLTP, SAS, MS Office Suite (Microsoft Word, PowerPoint, MS Visio), Hypothesis Testing, Regression Analysis, Linear Algebra, Advance Analytics, Data Mining, Big Data, Data Integration, Data Interpretation, Data Pipeline, Data Visualization, Data warehousing, Data transformation, Data Governance, Data Storytelling, Association rules, Clustering, Classification, Regression, A/B Testing, Forecasting & Modelling, Data Cleaning, Data Wrangling, Descriptive analytics, Git, GitHub, SVN, Bitbucket, JIRA
Soft Skills:	Time Management, Leadership, Strategy Planning, Problem-Solving, Negotiation, Decision-Making, Documentation and Presentation, Analytical Thinking, Attention to Detail, verbal and written communication
Operating Systems:	Windows, Linux

EXPERIENCE

CVS Health

New Jersey, USA

Data Analyst

Jan 2024 – Present

- Collaborated with clinical and product teams to define KPIs for telehealth and in-clinic services, focusing on patient throughput, adoption rates, and wait-time reduction.
- Designed **automated ETL pipelines** with **AWS Glue** to ingest and transform data from **Epic EHR**, claims, and scheduling systems, consolidating **over 5M patient** encounters monthly into **Snowflake** for unified reporting.

- Optimized data storage and querying in **AWS Redshift**, cutting query run times by **35%** and enabling near real-time insights across **500+ retail clinics**.
- Built **Python (pandas, NumPy) scripts** to clean and standardize encounter and claims data, improving accuracy and reducing discrepancies in reporting by **30%**.
- **Conducted exploratory analysis** with **Python (matplotlib, seaborn, scikit-learn)** to evaluate demographic patterns and clinical outcomes, identifying that telehealth adoption was **37% higher in urban areas**.
- Developed **forecasting models** using **scikit-learn and XGBoost** to predict patient demand, improving resource allocation by **20%** and lowering no-show rates by **15%**.
- Created **Power BI and AWS QuickSight dashboards** to monitor utilization, wait times, and patient satisfaction, saving **40+ reporting** hours per month through automated refresh cycles.
- Executed **A/B testing in SQL and Python** to assess digital scheduling workflows, driving an **18%** increase in mobile scheduling adoption and reducing call center volume.
- Automated generation of **NCQA/HEDIS compliance** reports while ensuring **HIPAA-compliant** handling of PHI, achieving 97% reporting accuracy and maintaining regulatory adherence.
- Delivered analytics in an **Agile environment** using **JIRA and Confluence**, supporting a cross-functional team of 15+ members and enabling CVS to expand virtual care across 500+ clinics, resulting in a **25%** increase in telehealth adoption and a **12%** gain in patient throughput.

Deloitte

Data Analyst

India

Jul 2020 – Dec 2022

- Gathered reporting requirements from finance, supply chain, and HR teams, documenting technical specifications in Confluence and tracking deliverables through **JIRA** to align analytics outputs with business KPIs
- Extracted and prepared **multi-terabyte datasets** from **Oracle DB** and **Snowflake** using **advanced SQL** and automated scripts in **Python (pandas, NumPy)**, reducing manual data preparation by **35%**.
- Developed **ETL pipelines** with **Informatica and SSIS** to cleanse, transform, and integrate disparate data sources, improving reporting accuracy by **40%** and streamlining downstream analytics.
- Designed and optimized **star and snowflake schema models** in the **Oracle BI repository (RPD)**, cutting query response times by **25%** and supporting enterprise-level drill-through reporting
- Built interactive dashboards in **Oracle Analytics Cloud and Tableau**, enabling predictive insights and drill-down analysis that reduced executive reporting turnaround by **30+ hours per month**.
- Delivered **ad-hoc analysis** and executive reports in **Advanced Excel (Pivot Tables, VLOOKUP, VBA macros)**, shortening turnaround for urgent requests by **40%**.
- Implemented **time-series forecasting** and **regression models** using **Oracle ML** and **Python (scikit-learn)** to predict supply chain demand with 92% forecast accuracy, influencing procurement decisions.
- Conducted **UAT** and **regression testing** in **HPALM** and **JIRA**, validating ETL logic and dashboard functionality, which lowered post-deployment defects by 20%.
- Tuned **SQL queries** and optimized **OAC visualizations**, reducing dashboard load times by **40%** and improving adoption across finance and operations teams.
- Enforced data governance by implementing row-level security in OAC and ensuring compliance with **SOX and HIPAA**, safeguarding sensitive workforce and healthcare data.

EDUCATION

Master of Science in Data Science

Pace University, New York, USA

Bachelor of Technology in Computer Science and Engineering

Gujarat Technological University, Gujarat, India

CERTIFICATION

- AWS Certified Cloud Practitioner
- Certified Scrum Product Owner
- Advanced Google Analytics
- Python for Data Science, AI & Development – IBM
