Professional Summary

Analytical Data Analyst with a Master's degree in Data Science and hands-on experience supporting finance, investment, and business stakeholders through large-scale data analysis, quantitative modeling, and data visualization. Proven ability to work with complex financial datasets, automate analytics using Python and SQL, and deliver high-impact dashboards using Tableau and Power BI. Strong communicator with experience translating analytical findings into actionable insights for leadership and cross-functional partners in fast-paced, high-visibility environment.

Technical Skills:

Programming & Analysis:

Python (Pandas, NumPy, automation, analysis), SQL (Joins, CTEs, Window Functions, Performance Optimization), Excel (Advanced formulas, Pivot Tables, Lookups)

Data Visualization & Reporting:

Tableau, Power BI (Executive dashboards, trend analysis, KPI reporting)

Data Platforms & Cloud:

Snowflake, Amazon Redshift, Databricks, AWS (S3, EC2), Azure SQL

Financial & Quantitative Concepts:

Financial KPIs, P&L Analysis, Revenue & Cost Metrics, Performance Attribution, Data Validation, Controls & Governance

Other Tools:

GitHub, JIRA, SDLC, Agile, Documentation & Stakeholder Reporting

Professional Experience:

Vanguard, PA

Data Analyst | Dec 2024- present

- Support finance and investment stakeholders by analyzing large-scale financial and operational datasets to evaluate performance, trends, and risk drivers.
- Design and maintain Tableau and Power BI dashboards to communicate revenue trends, cost drivers, and key performance indicators to senior leadership.
- Query, reconcile, and validate high-volume datasets from Snowflake and Amazon Redshift, ensuring accuracy and integrity of reported metrics.
- Develop Python-based automation and data validation workflows, reducing manual reporting effort and improving consistency across recurring deliverables.

- Build and optimize SQL-driven data pipelines using Databricks to support recurring management and performance reporting.
- Perform ad-hoc analysis to respond to stakeholder and leadership requests, translating quantitative findings into clear, business-focused insights.
- Create detailed documentation for data sources, KPIs, and calculation logic to support audit readiness and operational continuity.
- Manage multiple concurrent projects within Agile environments, coordinating across analytics, engineering, and business teams.

Infosys Ltd., Hyderabad, India

Data Analyst | November 2022 – June 2023

Client: Leading North American Financial Institution

- Supported Finance and FP&A teams by analyzing financial statements, KPIs, and operational metrics across multiple business units.
- Extracted, transformed, and integrated financial data from Azure SQL, cloud platforms, and Excel to support P&L, margin, and cost trend analysis.
- Optimized complex SQL queries, improving data processing efficiency and reducing reporting turnaround time by 40%.
- Automated monthly and quarterly financial reporting processes using Python, reducing manual effort by 70%.
- Developed Power BI dashboards to visualize revenue growth, operating expenses, variance analysis, and profitability trends.
- Implemented data quality checks and reconciliation processes to strengthen controls and ensure reporting accuracy.
- Collaborated with business stakeholders to define, document, and maintain standardized financial KPIs.

Infosys Ltd., Hyderabad, India

Data Analyst | November 2021 – November 2022

- Analyzed large structured datasets using SQL and Python to support analytics and reporting initiatives across multiple domains.
- Built interactive Tableau and Power BI dashboards to communicate trends, performance metrics, and analytical insights to non-technical stakeholders.

- Cleaned, transformed, and prepared data using Python (Pandas) and Excel to ensure data consistency and usability.
- Applied statistical analysis and basic machine learning techniques to identify patterns, anomalies, and predictive indicators.
- Partnered with cross-functional teams to understand business requirements and translate them into analytical solutions.

Data Management Intern

Yash technologies., Hyderabad | November 2020– April 2021

- Collected, cleaned, and organized large datasets from internal systems to support analytics and reporting initiatives.
- Assisted in preparing performance reports and dashboards using Excel and Power BI.
- Supported data validation, documentation, and version control activities to ensure data accuracy and traceability.
- Collaborated with cross-functional teams to interpret data and present insights through reports and presentations.

Education & Academic Projects:

Saint peters university, Jersey City, NJ

Master of Science in Data Science | Sep 2023-May 2025

Capstone Project with Little Diversified Architectural Consulting (Charlotte, NC)

Collaborated on a real-world capstone project sponsored by Little Diversified Architectural Consulting, Charlotte, NC, using their proprietary Positive Social Impact Tool (PSIT) framework. Analyzed accessibility to public parks, recreational centers, local businesses, and transit using demographic and geographic data. Cleaned and visualized spatial disparities in resource access using Python, Pandas, and Folium maps. Calculated PSIT scores based on factors like commute options, population distribution, and service proximity to identify underserved zones and inform future development priorities.

Customer Churn Prediction – ML

Built and tuned ML models (Logistic Regression, Random Forest, XGBoost) to predict telecom churn, boosting accuracy by 15% through EDA and feature engineering in Python.

Perfume Recommendation System – SQL & Tableau

Designed a product recommendation system using SQL and Tableau, analyzing sales and customer behavior to guide marketing decisions.

Certifications

Machine Learning Using Python – DHAAPPS Institutions, Hyderabad

Introduction to Machine Learning – Coursera
