EDUCATION

California State University Long Beach, CA	August 2022 – May 2024
Master of Science in Information Systems	GPA 3.7
Relevant Coursework: Business Data Analytics, Programming for Business Analytics, Database Management Systems, System Analysis and Design, Machine learning, Deep Learning, Information Management Systems, Cybersecurity, Web Technology	
Jawaharlal Nehru National College of Engineering, India	August 2017 – June 2021
Bachelors of Engineering in Computer & Information Science	

SKILLS AND CERTIFICATIONS

Languages & Software: Python (NumPy, Pandas, PySpark), R studio, PL/SQL, HTML/CSS, MongoDB, Hadoop, Oracle MySQL, Alteryx, Adobe
Data Analysis Skills: MS Excel (VBA, Pivot, VLOOKUP), Regression Analysis, Statistical Modelling, Risk Management, Data Analysis
Visualization Skills: Tableau, Advanced Excel, Power BI, Minitab, Snowflake, SQL, Big Data, Machine learning, Data Mining
Tools & platforms: Linux, SharePoint, JIRA, Scrum, Agile, Azure, GIT, Viso, SDLC UML, Lucid Charts, UX Design, CRM, ERP (Oracle ERP, SAP)
Certifications: Tableau Data Analyst, AWS Academy Machine Learning Foundations, Google Data Analytics, Six Sigma Yellow belt, Forage PWC Power BI Virtual Case, Microsoft Business Analyst Professional Certificate

PROFESSIONAL EXPERIENCE

Project Analyst, KGS Technology Group, California, USA	August 2024 – Present
- Designed and maintained a centralized speaker database to improve data integrity, eliminate duplication, and streamline profile retrieval enhancing overall data accessibility and decision-making efficiency across project teams. - Developed and automated KPI-driven dashboards using Excel VBA, advanced Excel functions, and Tableau to track project metrics, team performance, and engagement trends boosting workflow transparency and operational efficiency by 20%. - Collaborated actively with Project Managers to define clear project goals, milestones, and deliverables, utilized JIRA to assign tasks, track dependencies, monitor status updates, and ensure timely completion of key activities. - Led full lifecycle management of speaker engagement processes by leveraging SQL to extract, clean, and analyse large datasets; identified pipeline bottlenecks, monitored engagement trends, and delivered actionable insights that directly supported strategic decision-making and process improvements.	
Jr. Business Analyst, UnitedHealth Group, California, USA	October 2023 - July 2024
- Managed projects using SDLC, Agile, and Waterfall methodologies, ensuring smooth coordination of tasks, timelines, and resources with tools like Microsoft Project, Trello, and Asana—leading to improved project delivery and team alignment. - Led the end-to-end gathering and documentation of business and functional requirements, preparing detailed FRD, BRD, and SRS documents using tools such as Microsoft Visio, Lucid chart, and Confluence, ensuring clarity and consistency across all project phases. - Created and maintained 40+ dashboards using Tableau, Power BI, and Google Data Studio, which enabled real-time reporting and led to a 20% increase in data-driven decision-making across business units. Designed interactive dashboards in Excel and Tableau with advanced formulas, pivot tables, and visualizations; successfully reduced inventory overstock by 40% and provided insights that supported strategic purchasing decisions and demand forecasting.	
Business Data Analyst, Span Infotech Pvt. Ltd Bangalore India	July 2021- July 2022
- Created and refined an Oracle ERP database structure for 1.2 million sellers on Flipkart Marketplace; streamlined ETL processes, reducing manual work by over 40 hours monthly and improving data processing speed. - Executed complex SQL queries to retrieve seller information from the Oracle database for in-depth data analysis. - Came up with 20+ key performance indicators (KPI) and metrics to design, build, and automate Tableau dashboards which assisted the Top offender’s team in detecting 30,000+ offending sellers worldwide, boosting Catalog quality by 65%. - Introduced Python-based keyword highlighting, boosting team productivity by 30% and drastically cutting customer support calls. - Enhanced the training curriculum by incorporating agile principles, resulting in a remarkable 20% reduction in new-hire training duration and leveraged tools like JIRA and Azure DevOps to manage tasks, track progress, and enhance cross-team collaboration	
Data Analyst Intern, Thynkryt innovations, India	January 2021 - June 2021
- Built interactive reporting dashboards in Excel, Tableau, and SQL, optimizing inventory management and increasing sales by 15%. - Enhanced operational efficiency by 25% with Oracle demand forecasting and Agile methodologies, reducing project durations by 20%.	

ACADEMIC PROJECTS

Sales Performance & Forecasting Dashboard – Business Analysis [SQL Excel VBA Power BI Python]	January 2024
Developed a real-time sales dashboard using SQL, Excel VBA, and Power BI, built Python predictive models with 90%+ accuracy, boosting quarterly sales by 12%. Streamlined reporting to cut manual effort by 50%, enabling data-driven decisions across teams.	
Brain Tumour Detection Using Machine Learning [Python Matplotlib CNN]	December 2023
Led the development of a deep learning model using 253 MRI scans for brain tumour detection, achieving 98% accuracy through advanced image preprocessing and neural network design, significantly advancing medical imaging technology.	
Data Quality Audit & Risk Analysis for Financial Reporting [SQL Excel VBA Power BI Python]	November 2023
Conducted data quality audits and error detection using SQL and Excel VBA, implemented intuitive Power BI dashboards to highlight risks and compliance issues; Python scripts to predict high-risk transactions, reducing reporting errors by 30% and improving audit efficiency.
