SUMMARY

Data Analyst with **4+ years** delivering decision-ready reporting and analytics across utilities, healthcare, and financial services. Strong in translating ambiguous business questions into structured analyses using SQL, Excel, and BI dashboards, with a focus on accuracy, patterns, and clear recommendations. Known for **excellent communication**, detail-oriented QA, and building reliable reporting workflows that support cross-functional decision-making.

CORE SKILLS

- **Data Visualization & BI:** Power BI and Tableau dashboards, visualization design, interactive KPI reporting, executive-ready PowerPoint narratives
- **Data Analytics & Statistics (Applied):** trend analysis, pattern identification, variance explanation, hypothesis-driven deep dives, descriptive analysis and diagnostics
- **Data Modeling & Structure:** data models for reporting, KPI definitions, metric logic documentation, mapping logic, table relationships for reporting, dimensional reporting concepts (practical)
- **SQL & Data Preparation:** joins, aggregations, CTEs, reconciliation checks, data validation, anomaly/root-cause investigation
- **Excel (Advanced):** pivot tables, structured tables, conditional formatting, dynamic charts, slicers, reusable templates for repeatable reporting
- **Cross-Functional Delivery:** requirements gathering, cross-functional teams coordination, stakeholder updates, timeline management, process improvement

EXPERIENCE

Data Analyst — Consumers Energy, Jackson, Michigan Oct 2025 to Dec 2025
Tools: Power BI, Excel, PowerPoint, Teams, SharePoint/OneDrive, Internal CXI/VoC systems

- Built and delivered operational dashboards and reports; created clear visuals to interpret trends and support leadership decisions.
- Cleaned, standardized, and validated daily submissions; performed structured review to ensure data integrity and prevent duplicates.
- Maintained the master Excel tracker by developing repeatable templates and validation checks; documented metric logic and workflow steps for continuity.
- Performed root-cause analysis of data irregularities and partnered with cross-functional teams to resolve mapping and labeling issues.

Data Analyst — Ally Financial, Detroit, MI Feb 2025 to Sep 2025
Tools: SQL, Snowflake, Power BI, Tableau, Excel, PowerPoint

- Developed and maintained dashboards and recurring reports; created stakeholder-ready summaries that translated complex outputs into clear actions.
- Wrote SQL queries to extract, validate, and reconcile reporting data; troubleshoot discrepancies to improve accuracy and trust in deliverables.
- Supported report change testing and documentation, including refresh validation and QA checks; aligned metric definitions across teams.

Data Analyst — Care Insurance, Mumbai, India Apr 2021 to Dec 2022
Tools: SQL, Power BI, Tableau, Excel, Python (pandas)

- Produced dashboards and reports; interpreted complex data and created actionable insights for operational and business stakeholders.
- Used SQL and Excel for extraction, cleaning, and validation; performed root-cause analysis for irregularities impacting reporting outputs.
- Standardized recurring reporting by documenting business rules and QA steps; automated repeatable checks in Python where applicable.

Data Analyst — Barclays Bank, Mumbai, India Jun 2019 to Mar 2021
Tools: SQL, Tableau, Excel, PowerPoint

- Built Tableau dashboards and Excel reports from SQL datasets; developed stakeholder-facing summaries to support reporting and analysis needs.
- Conducted data verification and QA checks; documented logic and supported updates through testing and post-change validation.

EDUCATION

Central Michigan University, Mount Pleasant, MI
Master of Science in Information Systems (Data Analytics)

Jan 2023 to Dec 2024
