

Yogananda Ramesh Gorriparti

Data Analyst

Cape Girardeau, MO | +1 (425) 472 9623 | ramesh.data36@gmail.com

SUMMARY

Data Analyst with **4+ years of experience** delivering insights across **healthcare and enterprise environments**. Skilled in **SQL, Python, cloud-based analytics, and ETL development**, with hands-on experience in **data cleaning, transformation, and dashboarding** using **Power BI, Tableau, and Excel**. Proven ability to support data-driven decision-making while working effectively within **Agile and Waterfall SDLC models**.

SKILLS

Methodologies: SDLC, Agile, Waterfall

Programming Languages: Python, R, SAS, SQL, PL/SQL

IDEs: Visual Studio Code, PyCharm, Jupyter Notebook

Packages: NumPy, Pandas, SciPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow, ggplot2, PySpark

ETL Tools: SSIS, SSRS, SSAS, Informatica, Azure Data Factory (ADF), AWS Glue

Visualization Tools: Tableau, Power BI, Excel (VLOOKUP, HLOOKUP, Pivot Tables)

Cloud Technologies: AWS (S3, Redshift, Glue, Athena, EMR, Lambda, Kinesis, QuickSight), Azure (Synapse, Data Factory, Databricks, Data Lake Storage, Cosmos DB, Stream Analytics), GCP (BigQuery, Dataflow, Pub/Sub)

Data Platforms & Warehousing: Snowflake, Databricks, Delta Lake, AWS Redshift, Azure Synapse, Google BigQuery

Databases: MySQL, PostgreSQL, SQL Server, Oracle, MongoDB

Version Control Tools: Git, GitHub, GitLab, SVN

Other Skills: Data Cleaning, Data Wrangling, Data Mining, Data Manipulation, Data Architecture, Data Warehousing, Data Management, Decision-Making, Problem-Solving, Critical Thinking, Communication, Presentation Skills

EXPERIENCE

Centene, USA | Data Analyst

Jan 2025 - Present

- Analyze large-scale healthcare and operational datasets using **SQL, Python (Pandas, NumPy), and AWS Redshift**, supporting data-driven decisions for programs impacting **millions of members** across multiple business units.
- Design and maintain **ETL pipelines** using **AWS Glue, Azure Data Factory, and PySpark**, improving data ingestion reliability and reducing processing latency by **35%** across analytical workloads.
- Develop interactive **Power BI and Tableau dashboards** to track KPIs, utilization trends, and performance metrics, improving executive visibility and reducing manual reporting efforts by **40%**.
- Perform advanced **data cleaning, wrangling, and transformation** across structured and semi-structured sources stored in **S3, Data Lake Storage, and Snowflake**, increasing data accuracy by **25%**.
- Collaborate with cross-functional teams under **Agile SDLC**, translating business requirements into analytical solutions and delivering **95% on-time sprint commitments**.
- Leverage **AWS Athena, QuickSight, and Excel (Pivot Tables, VLOOKUP)** to support ad-hoc analysis and self-service reporting, accelerating turnaround time for stakeholder requests by **30%**.

Mindtree, India | Data Analyst

Jul 2022 – Nov 2023

- Supported enterprise analytics projects by extracting and analyzing data from **SQL Server, Oracle, and PostgreSQL**, delivering insights that improved operational efficiency by **20%** across client engagements.
- Built and optimized **ETL workflows** using **Informatica, SSIS, and Azure Data Factory**, processing **10+ TB of data** and improving data pipeline performance by **30%**.
- Developed analytical models and reports using **Python, R, and SAS**, enabling trend analysis, forecasting, and performance monitoring for finance and operations stakeholders.
- Created automated **Tableau, Power BI, and Excel dashboards**, reducing manual reporting effort by **35%** while improving data consistency and stakeholder adoption.
- Worked within **Waterfall and Agile methodologies**, collaborating with data engineers and business teams to ensure accurate requirement translation and successful project delivery.
- Utilized **Git and GitHub** for version control and collaborative development, improving code quality, traceability, and release management across analytics projects.

Metasystems, India | Data Analyst

Jan 2021 – Jun 2022

- Performed **data extraction, transformation, and analysis** using **SQL, Python, and Excel**, supporting reporting and decision-making initiatives across multiple internal projects.
- Assisted in building **data pipelines and warehouse structures** using **SSIS, SSAS, and MySQL**, improving data availability and reporting reliability by **25%**.
- Conducted **data mining, validation, and reconciliation** to identify anomalies and data quality issues, reducing reporting errors by **20%**.
- Supported senior analysts in developing **visual reports and dashboards** using **Tableau and Excel**, enabling business teams to monitor KPIs and operational metrics.
- Participated in **data modeling and documentation activities**, contributing to improved data governance and consistency across analytics and reporting solutions.

EDUCATION

Master of Science in Computer Systems Technology | Eastern Illinois University, Charleston, Illinois

May 2025
