

THRISHAPRIYA SELVARAJ

Data Analyst

thrishapriya931@gmail.com | Washington, USA | 857-498-1406 | [LinkedIn](#)

SUMMARY

Versatile **data analytics professional** with **3+ years of experience** delivering **actionable insights across healthcare, revenue operations, marketing, and business intelligence**. Expertise in **SQL, Python, Tableau, Power BI, Excel, and CRM analytics**. Proven track record building **75+ executive dashboards**, conducting **financial forecasting**, and **driving data-driven** decisions that delivered **\$5.25M in measurable business impact**.

TECHNICAL SKILLS

Analytics: Data Analysis • Statistical Modeling • Predictive Analytics • KPI Development • Business Intelligence • Executive Dashboards • Variance Analysis • Forecasting • A/B Testing • Cohort Analysis • Root Cause Analysis
Technical: SQL (PostgreSQL, MySQL, Redshift, Snowflake) • Python (Pandas, NumPy, Scikit-learn) • R • Tableau • Power BI • Looker • Excel (VLOOKUP, Pivot Tables, Macros, Power Query) • Salesforce • HubSpot • Google Analytics
Data Management: ETL/ELT • Data Warehousing • Data Quality • Data Governance • Great Expectations • AWS • Azure • Databricks • Apache Airflow
Domain Expertise: Healthcare Analytics (Epic EHR, HL7/FHIR, HIPAA, CMS/FDA Compliance) • Revenue Operations • Sales Analytics • Marketing Analytics • Financial Analysis • Clinical Operations • Product Analytics
Soft Skills: Stakeholder Management • Executive Communication • Cross-functional Collaboration • Data Storytelling • Process Improvement • Agile/Scrum

PROFESSIONAL EXPERIENCE

Data Analyst | Humana — Washington, USA

Jan 2025 – Present

- Analyze **50M+ clinical records, claims data**, and **operational metrics** daily using **SQL and Python** supporting **Medicare Stars** quality reporting, **value-based care** programs, and **provider performance** across **150+ facilities** while ensuring **HIPAA, FDA, and CMS** regulatory **compliance** for **\$2B+ reimbursement** programs
- Design and maintain **35+ interactive Tableau and Power BI dashboards** tracking **clinical KPIs, provider performance, patient outcomes, revenue metrics**, and **operational efficiency**, enabling **60+ stakeholders** to access real-time analytics and eliminating **40 hours weekly** of manual reporting
- Conduct **variance analysis** and **financial forecasting** on **\$50M+ quarterly healthcare budgets** using **Python statistical modeling and Excel**, building comprehensive financial dashboards that improved **forecast accuracy by 28%** and identified **\$750K in cost optimization** opportunities
- Collaborate with **data science teams** to develop analytical datasets supporting **predictive models** achieving **89% accuracy** for **patient readmission, \$4.5M savings in fraud detection**, and **care gap identification** through hypothesis testing, regression analysis, and time series forecasting
- Implement **data quality frameworks** and validation rules across **100+ data sources** using **SQL and Great Expectations**, reducing **data anomalies by 35%** and ensuring **99.7% accuracy** for regulatory reporting while managing ETL processes and quality assurance workflows
- Optimize **SQL queries** and automate repetitive processes including data extraction, transformation, and report generation, reducing **query execution time by 40%**, supporting **500+ concurrent users**, and saving **60+ hours weekly** through workflow automation

Business Intelligence Analyst | Cybage Software — Pune, India

Apr 2021 – Sept 2022

- Developed comprehensive BI platform with **40+ interactive Tableau and Power BI dashboards** tracking **revenue analytics, sales pipeline, customer segmentation, marketing ROI**, and operational **KPIs**, delivering actionable insights to **200+ business users** and reducing **ad-hoc reporting requests by 35%**
- Analyzed **Salesforce CRM data, sales pipeline metrics**, and **revenue performance** across multiple channels, tracking deal progression, quota attainment, and forecasting accuracy supporting **\$8M budget planning** while conducting **pricing analysis** and **deal profitability optimization**
- Performed **A/B testing analysis, conversion funnel optimization**, and **cohort analysis** on **10TB+ monthly data** from **Google Analytics** and product analytics tools (**Mixpanel, Amplitude**), identifying opportunities that increased **customer retention by 22%** and improved marketing ROI
- Built **customer lifetime value prediction models** using **Python machine learning** achieving **86% accuracy** that informed **marketing budget allocation**, analyzed customer data and purchase patterns to identify churn drivers, and created financial dashboards preventing **\$180K in reporting errors**

- Implemented **end-to-end data validation framework** across **80+ data sources** using Great Expectations and SQL checks reducing **data inconsistencies by 41%**, optimized database schemas improving **report performance by 38%**, and reduced analytics delivery time from **8 hours to 2.5 hours**
- Operations Analyst | Intex Technologies — Mumbai, India

Jun 2020 – Mar 2021

 - Supported **business intelligence** initiatives and **operational reporting** for **sales, operations, and finance teams**, performing data collection, entry, validation, and quality checks ensuring accuracy of business-critical datasets
 - Created **operational dashboards** tracking **KPIs, production metrics, inventory levels, and departmental performance** using Excel and data visualization tools, enabling stakeholders to monitor real-time business operations
 - Conducted **process analysis and workflow optimization** identifying operational inefficiencies and recommending data-driven improvements that enhanced **productivity** and reduced **manual effort**
 - Developed **automated reports** for **management** review, compiled performance metrics, and prepared presentations supporting **strategic decision-making** across multiple business units
-

EDUCATION

Master of Science in Information Technology GPA: 3.7/4.0	
University of Massachusetts Boston — Boston, Massachusetts	Dec 2024
Bachelor of Engineering in Computer Engineering	
University of Mumbai — Mumbai, India	May 2022

KEY ACHIEVEMENTS

- Built **75+ executive dashboards** and BI solutions supporting **260+ stakeholders** across healthcare, tech, and consulting organizations
- Analyzed **60M+ records daily** across healthcare, sales, marketing, and operational domains using **advanced SQL and Python** analytics
- Improved **reporting accuracy by 35-41%** through comprehensive **data quality frameworks** and validation systems
- Reduced **manual reporting effort by 100+ hours weekly** through **automation**, self-service analytics, and optimized workflows
- Delivered **\$5.25M in measurable business impact** through fraud detection, cost optimization, and process improvements
- Achieved **86-89% accuracy** in **predictive models** for customer lifetime value, patient readmission, and churn prediction
