

NAGA LAKSHMI DIVYAKOLA

Memphis, TN — +1-901-246-7080 — nagalakshmidivyakola0831@gmail.com
[linkedin.com/in/lakshmi-divyakola-7a2272318](https://www.linkedin.com/in/lakshmi-divyakola-7a2272318)

PROFESSIONAL SUMMARY

Data Engineer with 4+ years of experience in building scalable data pipelines and ETL/ELT frameworks across AWS, Azure, and GCP. Expertise in Big Data technologies (Spark, Kafka, Hadoop ecosystem), cloud-native data architectures, and modern data warehousing solutions (Snowflake, Redshift, Teradata). Proven track record in designing end-to-end data solutions for healthcare, financial, and enterprise analytics using PySpark, Python, SQL, and distributed computing frameworks.

TECHNICAL SKILLS

Big Data Technologies: Apache Spark, HDFS, MapReduce, YARN, Kafka, Kafka Connect, Hive, HBase, Sqoop, Flume, Oozie, Zookeeper, Pig, Impala, NiFi

Cloud Platforms: AWS (Glue, S3, Redshift, Lambda, Step Functions, CloudWatch, SNS, Secrets Manager, Transfer Family), Azure (Data Factory, Databricks, Data Lake, Blob Storage, SQL Database, Event Hubs), GCP (BigQuery, Cloud Storage, Cloud Composer)

Data Warehousing: Snowflake (Snowpark, Snowpipe), Teradata, Redshift, Azure SQL Data Warehouse

Programming Languages: Python (Pandas, PyTorch), PySpark, Scala, SQL, T-SQL, PL/SQL, HiveQL, UNIX Shell Scripting

Databases: MySQL, Oracle, PostgreSQL, MS SQL Server, Teradata, DB2, DynamoDB, HBase

ETL/Orchestration Tools: Apache Airflow, Cloud Composer, Azure Data Factory, Informatica PowerCenter, DBT, Talend, SSIS

Data Formats & Architecture: JSON, Avro, Parquet, Delta Lake, Medallion Architecture (Bronze-Silver-Gold)

DevOps & Automation: Terraform, CI/CD (GitHub Actions, AWS CodePipeline, Azure DevOps), Ansible

Reporting & Visualization: Tableau, Power BI, SSRS, SSAS, Arcadia

Operating Systems: Linux, Unix, Windows, Mac OS

PROFESSIONAL EXPERIENCE

Data Engineer

June 2025 – Present

Elevance Health, St. Louis, MO

- Modernized cloud-based healthcare data platforms using AWS Glue, Lambda, Redshift, and Step Functions to support clinical analytics and customer insights
- Designed and developed automated ETL pipelines consuming data from APIs and SQL Server, storing processed data in Amazon RDS and Redshift
- Built AWS Glue jobs and Lambda functions using PySpark and Python to extract, transform, and load data from SQL Server to S3
- Orchestrated complex data workflows using AWS Step Functions and Glue Workflows with custom alerting via CloudWatch Alarms and SNS
- Developed reusable SFTP framework using AWS Transfer Family, Lambda, and S3 for secure data ingestion and export processes
- Implemented Teradata ELT frameworks to ingest data from various sources using legacy Teradata load utilities
- Centralized credential management using AWS Secrets Manager for Glue jobs and Lambda functions
- Created custom CloudWatch Logs Insights queries and automated alerts using AWS Lambda and SNS notifications
- Utilized Pandas for data cleansing and validation, ensuring high-quality data for downstream analytics

Data Engineer

November 2021 – August 2023

Wissen Technology, India

- Built cloud-native data analytics platform using Azure Data Factory, Databricks, and Snowflake for enterprise customers
- Designed and orchestrated complex ETL workflows using Azure Data Factory to automate data ingestion and transformation from internal and external systems
- Implemented end-to-end data pipelines in Azure Databricks using Scala and PySpark following bronze-silver-

gold medallion architecture

- Developed optimized Snowflake data models with clustering keys, materialized views, and partitioning strategies for efficient reporting
- Built DBT models with reusable macros, Jinja templates, and test cases to maintain data quality and code consistency
- Developed Spark applications in Scala to process batch and streaming data from structured and semi-structured sources
- Implemented real-time data ingestion pipelines using Spark Structured Streaming in Azure Databricks, processing data from Kafka and Event Hubs
- Leveraged Snowpark and Python UDFs to implement advanced business logic and transformations directly in Snowflake
- Designed star schemas and robust data models in Snowflake optimized for Power BI and Tableau reporting
- Managed Azure Data Lake, Blob Storage, Azure SQL, and PostgreSQL databases for scalable, high-performance data storage

Data Engineer

January 2020 – October 2021

HCLTech, Noida, India

- Worked on large-scale enterprise data warehousing and ETL modernization projects supporting financial and lending applications
- Developed and maintained ETL processes using Informatica PowerCenter 10.x, utilizing transformations including Source Qualifier, Expression, Aggregator, Lookup, Filter, Router, Joiner, and Update Strategy
- Built complex stored procedures using input/output parameters, cursors, views, triggers, and optimized queries with temp tables and joins
- Developed scripts for loading data into Teradata tables using Fast Load, Multi Load, and BTEQ utilities
- Performed requirement analysis, ETL design, and development for extracting data from DB2, Oracle, and flat file sources
- Implemented Snowflake schema designs joined with fact tables for dimensional modeling
- Scheduled and monitored ETL jobs using Control-M to ensure reliable, timely data processing
- Consolidated data from various enterprise systems to improve data accuracy and provide unified analytics platform for reporting and regulatory compliance

EDUCATION

Master of Science in Information Technology

August 2023 – May 2025

University of Memphis, Memphis, TN, USA

Bachelor of Technology in Computer Science

July 2015 – May 2019

Chalapathi Institute of Engineering & Technology, India
