

NISHANTH VARMA

SUPPLY CHAIN ANALYST

(720) 896-0104 • nishanth.v@mailjobhub.com • [LinkedIn](#) • Colorado, USA (Open to Relocate)

PROFESSIONAL SUMMARY

Supply Chain Analyst with around 4 years of experience in inventory management, demand planning, procurement, and S&OP processes. Skilled in SAP ERP/HANA, Excel, Power BI, and Tableau to analyze data, optimize inventory, and improve operational efficiency. Proven track record in SKU rationalization, scenario planning, process improvement (Lean Six Sigma, DFMEA), and cross-functional collaboration to ensure timely material availability, reduce costs, and enhance supply chain performance

SKILLS

Technical Skills: Python, SQL, VBA, SAP ERP, SAP HANA, Ariba, NetSuite, Power BI, Tableau, Excel (Pivot Tables, VLOOKUP, Power Query, Macros), Looker, Kinaxis Rapid Response

Analytics & Reporting: KPI Tracking (OTIF, Inventory Turnover, Fill Rate, Forecast Accuracy), Time Series Forecasting, Regression Models, ABC/XYZ Analysis, Trend & Pattern Analysis, Hypothesis Testing, A/B Testing, Cycle Time Analysis

Inventory & Demand Planning: Forecasting, EOQ, Safety Stock Optimization, JIT, Scenario Planning, S&OP, SKU Rationalization

Supply Chain & Operations: Inventory Management, Demand Planning, Procurement & Supplier Management, Logistics Coordination, Warehouse Optimization, ERP/TMS/WMS Systems

Process Optimization: Lean Six Sigma, Value Stream Mapping, Root Cause Analysis (5-Why, Fishbone), DFMEA, PFMEA

Core Competencies: Project Management, Risk Control, Data-Driven Decision Making, Workflow Mapping, Agile Tools (Jira, Scrum)

WORK EXPERIENCE

Procter & Gamble

USA

Supply Chain Analyst

January 2025 – Present

- Optimized inventory levels by implementing EOQ and safety stock strategies across multiple product lines, reducing stockouts by 18% and lowering excess inventory by 12% using SAP HANA and Excel Power Query.
- Developed and automated KPI dashboards for OTIF, fill rate, and forecast accuracy using Power BI and Tableau, improving executive reporting efficiency by 30% and enabling data-driven decision-making.
- Analyzed demand patterns through time series forecasting and regression models in Python and SQL, achieving 95% forecast accuracy for key SKUs and supporting S&OP planning.
- Led SKU rationalization initiatives, performing ABC/XYZ and trend analysis to streamline the product portfolio, resulting in a 10% reduction in slow-moving SKUs and improved warehouse throughput.
- Cooperated with cross-functional teams including procurement, logistics, and warehouse operations to implement JIT strategies, reducing lead times by 15% and optimizing supply chain efficiency.
- Executed process improvement projects using Lean Six Sigma and root cause analysis (5-Why, Fishbone), enhancing order fulfillment workflows and reducing operational cycle time by 20%.
- Managed data-driven scenario planning in Kinaxis Rapid Response and SAP Ariba to support demand and supply decisions, mitigating supply risks and ensuring continuity for high-demand product lines.

Dixon Technology

India

Jr. Supply Chain Analyst

January 2021 – July 2023

- Accomplished inventory across multiple SKUs using SAP ERP and Excel, performing SKU rationalization to identify slow-moving and high-demand items, which reduced carrying costs by 15% and improved order accuracy by 12%.
- Established interactive dashboards in Power BI to track KPIs such as production efficiency, OTIF, and procurement timelines, enhancing visibility for operations managers and reducing manual reporting effort by 25%.
- Conducted scenario planning and demand forecasting using historical sales data and Excel-based models, supporting S&OP processes and achieving 92% forecast accuracy for key product lines, ensuring optimal production planning.
- Boosted procurement and supplier management by evaluating lead times, monitoring supplier performance, and coordinating deliveries, which reduced stockouts by 10% and ensured continuous material availability for production.
- Enhanced warehouse and inventory management through workflow mapping, cycle time analysis, and layout optimization, increasing material handling efficiency by 18% and reducing delays in Order processing.
- Implemented process improvements using DFMEA and Lean Six Sigma methodologies, identifying potential failure points in supply chain processes, standardizing workflows, and improving operational efficiency by 20%.
- Collaborated across demand planning, procurement, and production teams to execute S&OP meetings, align supply with forecasted demand, and mitigate supply chain risks, ensuring smooth operations and timely delivery of critical components.

EDUCATION

Masters' in Business Analytics

University of Colorado at Denver, USA
