

Bill R. Wathier

Firestone, CO 80504 | 720.215.7209 | billrwathier@yahoo.com | www.linkedin.com/in/billwathier | <https://github.com/bwathier>

PROFESSIONAL SUMMARY

Strategic data analytics professional with 20 years of technical leadership in engineering operations and laboratory environments, now pivoting into data science roles across industries. Currently completing an M.S. in Data Analytics (Nov 2025), with hands-on experience in predictive modeling, customer churn, and sustainability analytics. Skilled in R, Power BI, and Excel, with growing proficiency in SQL and Python for reproducible, stakeholder-facing workflows. Adept at transforming complex diagnostics into actionable insights that drive cost reduction, revenue prediction, and KPI alignment. Passionate about ethical data storytelling, CRM/BI integration, and translating analytics into business impact.

CERTIFICATIONS & LICENSURES

Certifications & Training

- DataCamp: Data Analyst Track (In Progress); Data Scientist Track (In Progress)

SKILLS

Analytics & Modeling: Predictive Modeling, Churn Analysis, Forecasting, Statistical Inference, Regression & Classification, Model Evaluation, AUC, ROC, Confusion Matrix, Bootstrapped Metrics, Lift & Gain

Tools & Languages: R, Power BI, Excel (advanced), SQL, Python (intermediate), Git & GitHub, RMarkdown

Data Science Concepts: CRISP-DM, Data Cleaning, Feature Engineering, Data Visualization, Machine Learning, PCA, Clustering, Modular Workflow Design, Reproducible Pipelines

Business & Domain Knowledge: Revenue Prediction, Customer Behavior Modeling, Process Optimization, Quality Assurance, Chemical Engineering, Oil & Gas (legacy domain), Sustainability Analytics.

ACADEMIC/NOTABLE PROJECTS

Customer Revenue Prediction (Capstone Project, SNHU) – In Progress

Built regression-based predictive model in R to forecast customer revenue and extend churn analysis. Applied feature engineering, statistical validation, and regression modeling to generate actionable insights for stakeholders.

Customer Churn Prediction (Advanced Data Analytics, SNHU)

Developed and compared models (glmnet, random forest, XGBoost) in R to predict churn. Evaluated model performance using AUC, ROC, and confusion matrices; presented insights via Power BI dashboards.

StopHunger Project (AI & Sustainability, SNHU)

Analyzed global food insecurity data in R and Power BI aligned with UN SDG “Zero Hunger. Built dashboards to highlight supply chain gaps and recommend resource allocation strategies.

PROFESSIONAL EXPERIENCE

Field Professional

2022–Present

Halliburton – Odessa, TX

- Delivered data-driven recommendations to optimize drilling fluid properties, reducing project costs by 20-25% per well.
- Conducted standardized API tests on 100+ wells, ensuring compliance and improving drilling efficiency by 20% on average.
- Collaborated with engineering teams, achieving 100% alignment of KPIs.

Quality Control Chemist

2021-2022

Boulder Scientific Company – Mead, CO

- Performed advanced chemical analyses for 35+ product batches weekly, maintaining 100% compliance with quality standards.
- Developed lab standards and reagents, reducing error rates in testing by 20%

Laboratory Technician

2020–2021

Empact Analytical Systems, Inc. – Brighton, CO

- Conducted hydrocarbon analysis on 250+ samples per month, providing actionable insights that supported timely client decisions and improved client productivity.
- Applied statistical methods to measure moisture, density, and volatility, reducing out-of-spec batches by 25+%.

Director of Chemistry

2019–2020

Advanced Surface Technologies – Arvada, CO

- Directed a team of chemists, overseeing production optimization and regulatory compliance.
- Implemented continuous improvement initiatives in testing and reporting.

Operations Supervisor

2018

Newalta Environmental Services – Denver, CO

- Managed solids control services for drilling sites, monitoring **HSE KPIs** to ensure compliance.
- Oversaw scheduling, training, and maintenance for site operations.

Field Professional

2017–2018

Halliburton – Ft. Lupton, CO

- Optimized drilling fluid systems to improve operational efficiency.
- Collaborated with cross-functional teams to meet client KPIs.

Product Development & Quality Manager

2016

Tolsa Wyoming Bentonite – Casper, WY

- Directed development of clay-based additives, ensuring ISO and quality compliance.
- Supported sales teams with technical expertise to increase product adoption.

Laboratory Manager

2012-2015

Halliburton – Brighton, CO

- Managed technical services lab with 4 employees, reducing backlog from 2 months to less than 2 weeks, improving client delivery timelines by 75%.
- Developed SOPs and custom reporting formats, increasing operational efficiency by 50%.

Technical Professional

2006 - 2012

Halliburton – Denver, CO

- Designed and implemented drilling fluid systems, ensuring technical and financial success.
- Managed field and supervisory teams and conducted post-project audits.
- Conducted and manages post-project audit processes improving operational efficiencies by 25%

EDUCATION

Southern New Hampshire University (SNHU) – Manchester, NH

Master of Science, Data Analytics

Expected Nov 2025

- GPA 3.77, Honor Roll (multiple terms, 2024-2025) .
- Coursework: Data Analytics Capstone, Advanced Data Analytics, Predictive Analytics, Quantitative Analysis, Data & Information Management, Decision Methods and Modeling, Enterprise Data Management, Present & Visualize Data, Optimization & Risk Assessment, Business Analytics, Project Management, and Introduction to AI.

Colorado School of Mines – Golden, CO

Bachelor of Science, Chemical Engineering and Petroleum Refining

Dec 2002
