PROFESSIONAL SUMMARY

Data Analyst with 5+ years of experience in enterprise reporting, KPI development, and large-scale data analysis. Skilled in Excel, SQL, Power BI, Tableau, and Python to deliver accurate, data-driven insights. Known for strong data validation, dashboard design, and supporting executive decision-making in fast-paced environments. Translates complex data into actionable insights and collaborates cross-functionally to drive business performance and operational efficiency.

SKILLS

Technical Skills:

SQL | Power BI | Tableau | Python (Pandas, NumPy) | MS Excel

Analytics Skills:

Data Analysis | KPI Development | Data Validation | EDA | Reporting & Dashboards

Methods:

Visualization | Data Cleaning | Metric Standardization | Ad-hoc Analysis | Executive Reporting

PROFESSIONAL EXPERIENCE

New York City School Construction Authority (SCA) — New York, NY

Data Analyst | Jan 2025 – Present

- Designed and delivered enterprise Power BI dashboards integrating project, financial, and operational data across 6+ departments, streamlining executive reporting and improving cross-functional visibility.
- Analyzed and validated large-scale datasets (1M+ records) from multiple source systems using Oracle SQL, applying standardized metrics and data quality checks to ensure consistent, audit-ready reporting.
- Developed and standardized 20+ KPIs to track project schedules, budgets, vendor performance, and resource utilization, enabling consistent performance monitoring across portfolios.
- Analyzed performance data across hundreds of active and completed projects to assess contractor effectiveness, identify recurring bottlenecks, and support proactive risk mitigation planning for future initiatives.
- Supported executive and ad-hoc analysis requests by translating complex datasets into clear, decision-ready insights, accelerating leadership response times by 25%.

Imebrands — Remote, Illinois

Data Analyst | Sept 2023 – Sept 2024

- Analyzed customer behavior, sales performance, and product metrics by category and geography, contributing to a 25% improvement in customer retention.
- Conducted exploratory data analysis (EDA) and applied structured data cleaning and transformation techniques in Python to improve data quality and dataset usability.
- Built Tableau and Power BI dashboards that reduced manual reporting time by 40% and enabled faster, data-driven business insights.
- Performed revenue, profitability, and cancellation analysis to support forecasting and periodic performance reviews.

Amazon Marketplace Seller — Berlin, Germany

Data Analyst | Jan 2019 – July 2022

- Analyzed historical sales and operational data to optimize pricing, inventory, and logistics strategies, reducing excess inventory by 15%.
- Built recurring performance reports to monitor product trends, demand patterns, and profitability.
- Used data-driven insights to support marketing and growth decisions, increasing profitability by 20%.
- Wrote and optimized SQL queries (joins, CTEs, aggregations) to extract sales, inventory, and fulfillment data from relational databases for analysis and reporting
