

PROFESSIONAL SUMMARY

Senior Data Analyst with 4+ years of experience delivering enterprise-grade business intelligence, predictive analytics, and compliance-driven reporting across banking and healthcare domains. Expert in SQL, Python, Power BI, Tableau, and AWS data platforms, with end-to-end ownership of KPI frameworks, data pipelines, and executive dashboards. Strong track record of translating complex business and regulatory requirements into auditable analytics solutions that reduce risk exposure, improve decision-making, and streamline reporting operations.

CORE SKILLS

- Business Intelligence:** Power BI (DAX, Power Query, RLS), Tableau (LOD, Parameters), Executive Dashboards
- Data Analysis:** KPI Design, Trend & Cohort Analysis, Forecasting, Ad Hoc Reporting
- Programming:** SQL (CTEs, Window Functions, Optimization), Python (Pandas, NumPy, Scikit-learn), R
- Data Engineering:** AWS Glue, S3, Incremental Loads, Data Validation Frameworks, AWS Lambda
- Data Warehousing:** Amazon Redshift, Star & Snowflake Schema, Fact & Dimension Modeling
- Cloud & Monitoring:** AWS (Glue, S3, Redshift, CloudWatch, IAM), Data Catalog
- Machine Learning:** Regression, Classification, Feature Engineering, Model Validation
- Governance & Compliance:** SOX, HIPAA, Data Lineage, PII Masking, Audit Readiness
- Delivery & Collaboration:** BRDs, Stakeholder Workshops, UAT, JIRA, Confluence, Agile

PROFESSIONAL EXPERIENCE

SENIOR DATA ANALYST

Citi Bank – Irving, TX

August 2024 – Present

- Analyze 3M+ daily financial transactions using SQL and Python to identify fraud patterns and uncover \$12M in potential risk exposure.
- Design and maintain enterprise Power BI dashboards with DAX, drill-downs, and row-level security to track fraud KPIs and portfolio health, reducing reporting turnaround time by 18%.
- Build and validate predictive models in Python (Scikit-learn) to assess loan default risk, improving model accuracy from 78% to 94% through feature engineering and cross-validation.
- Optimize Amazon Redshift reporting layers using materialized views and window functions, reducing dashboard refresh times by 30%+.
- Implement automated data validation frameworks using Python and Great Expectations, enforcing 100+ business rules and ensuring 99.99% accuracy for SOX-compliant reporting.
- Lead stakeholder workshops with Risk, Finance, and Engineering teams, translating requirements into BRDs, SQL logic, and analytics specifications.
- Perform cohort and trend analysis on transaction behavior to refine fraud thresholds and reduce false positives.
- Standardize KPI definitions and reconciliation logic across dashboards, improving consistency and executive trust in reporting.
- Lead UAT and release validation for executive dashboards, achieving 98% stakeholder acceptance.
- Support audits by providing traceable SQL logic, validation evidence, and historical snapshots, resulting in zero audit findings.
- Document end-to-end data lineage and KPI definitions in Confluence and AWS Glue Data Catalog.

Technologies: SQL, Python, Power BI, AWS Glue, S3, Redshift, Excel, SOX, BRD, UAT, JIRA

BUSINESS DATA ANALYST

Deloitte – New York, NY

February 2024 – August 2024

- Ingest 2.5M+ regulatory records daily using AWS Glue pipelines to enable near real-time compliance and audit dashboards.
- Perform predictive risk and gap analysis using Python and R, improving anomaly detection accuracy by 22% and avoiding \$1.8M in potential penalties.
- Redesign Redshift data models with denormalized fact tables and incremental loading strategies, reducing query costs by 18%.

- Automate compliance reporting using Excel VBA, Power Query, and API integrations, saving 15+ hours per week.
- Serve as primary analytics contact during client workshops, translating regulatory requirements into scalable reporting logic.
- Establish data governance practices using AWS Glue Data Catalog and PII tagging to ensure HIPAA and SOX compliance.
- Build reusable SQL and Python templates for compliance checks and anomaly detection across engagements.
- Lead UAT for Tableau and Power BI dashboards and train 50+ stakeholders on self-service analytics.
- Conduct root cause analysis on reporting discrepancies, reducing recurring data issues by 35%.
- Create centralized metadata and KPI documentation in Confluence, improving analyst onboarding by 50%.

Technologies: SQL, Python, R, Tableau, Power BI, AWS Glue, Redshift, Excel VBA, HIPAA, SOX

DATA ANALYST

Max Healthcare – New Delhi, India

January 2021 – August 2023

- Analyze large-scale EHR datasets using SQL and Python to support patient flow forecasting and readmission risk scoring, improving resource allocation by 18%.
- Design Tableau dashboards for clinical and executive leaders to monitor readmissions, bed utilization, and care outcomes.
- Build and maintain AWS Glue and S3 ETL pipelines processing 500K+ records daily, with automated error handling and CloudWatch monitoring.
- Develop predictive readmission models using Random Forest and regression techniques, reducing 30-day readmissions by 12%.
- Translate clinical workflows into measurable KPIs aligned with hospital performance goals.
- Implement data quality, duplicate detection, and anonymization rules to maintain 99%+ accuracy while ensuring HIPAA compliance.
- Perform longitudinal analysis on patient outcomes to support staffing, bed planning, and discharge optimization.
- Automate monthly KPI and operational reporting using Python and AWS services, eliminating 20 hours of manual effort per month.
- Maintain historical datasets for audits and internal reviews.
- Lead UAT and train 40+ clinicians on dashboard usage and interpretation.

Technologies: SQL, Python, Tableau, AWS Glue, S3, Redshift, CloudWatch, HIPAA

EDUCATION

Master’s in Data Science

University of Missouri Kansas City

Kansas City, MO

GPA: 3.9/4.0

Bachelor’s in Computer Science and Engineering

Jawaharlal Nehru Technological University

Hyderabad, India

CERTIFICATIONS

- Microsoft Azure Data Analytics
- Certificate in Data Science
- Data Preparation for Machine Learning
- Advanced Machine Learning Operations
- Python Certification
- Tableau for Data Analysis & Visualization
