SUMMARY

- Supply Chain Analyst with 3+ years of experience improving end-to-end supply operations by optimizing procurement, logistics, and inventory flows across domestic and international networks.
- Expertise in managing supply chain planning systems such as SAP MM, Oracle SCM Cloud, and Kinaxis RapidResponse to improve sourcing accuracy, reduce lead times, and support agile decision-making.
- Skilled in analyzing inventory trends, demand fluctuations, and supplier performance to inform safety stock policies, minimize excess inventory, and maintain service level consistency.
- Proficient in building interactive dashboards and reports using Tableau, SQL, and Excel to monitor key supply chain KPIs, track fulfillment efficiency, and highlight potential disruptions.
- Experienced in collaborating with procurement, warehousing, and operations teams to identify bottlenecks, streamline order workflows, and support system upgrades aligned with supply chain goals.

WORK EXPERIENCE

Amazon | Supply Chain Analyst

Feb 2024 – Current

- Optimized demand planning through SAP IBP and Excel Power Query, improving forecast accuracy by 16% and minimizing inventory stockouts during seasonal fluctuations and promotions.
- Integrated supply chain operations by aligning financial targets, demand forecasts, and supply constraints through S&OP, boosting product availability by 12% across regional distribution centers while maintaining cost-efficiency.
- Developed supplier performance scorecards using Tableau and SAP Ariba data, tracking key KPIs such as OTIF and lead time variability, driving a 22% improvement in vendor performance over two quarters.
- Improved transportation cost efficiency by consolidating shipments and optimizing routes, collaborating with third-party logistics providers to generate \$210K in transportation savings and enhancing delivery accuracy by 14%.
- Streamlined reporting through the automation of KPI dashboards in Excel VBA and Power Bi, reducing manual reporting time by 40% and providing real-time insights on inventory and service levels to executive teams.
- Enhanced supply chain responsiveness by incorporating store-level sales data into demand forecasting, ensuring better stock allocation during high-demand events and optimizing inventory placement.
- Promoted sustainability by integrating ESG metrics into supplier evaluations, resulting in 25% of vendor shipments transitioning to carbon-neutral carriers as part of BlackRock's broader environmental goals.

Blue Dart, India | Supply Chain Analyst

Apr 2020 – Dec 2022

- Re-engineered global supply chain models using Python and Excel Solver to assess warehouse placement, freight routing, and delivery zones, cutting logistics costs by 12% while improving delivery lead times by 18%.
- Refined inventory strategy by implementing ABC/XYZ classification and safety stock modeling in SAP S/4HANA, which increased inventory turnover by 14% and freed up \$380K in working capital.
- Created predictive dashboards by merging supplier performance data from MySQL and SAP, enabling risk management and preventing 96% of stockouts during peak demand periods.
- Reduced S&OP cycle times by 18% by consolidating demand forecasts, supply constraints, and production capacity using Anaplan, significantly improving product availability and cross-departmental coordination.
- Led logistics improvement initiatives using Lean methodologies, conducting root cause analysis with Fishbone Diagrams and 5-Why techniques, leading to an 11% reduction in logistics-related costs.
- Optimized demand forecasting by integrating advanced statistical models within SAP S/4HANA Cloud, cutting excess inventory by 15% and boosting order fulfillment rates by 12%.
- Supported procurement decisions through supplier risk assessments and spend analysis in Oracle SCM Cloud, enabling \$500K in cost savings while maintaining supplier continuity.
- Managed continuous improvement projects using Lean Six Sigma and Value Stream Mapping, reducing inbound logistics cycle time by 22% and eliminating non-value-added activities from procurement processes.

SKILLS

Methodologies: Lean Six Sigma, Agile, Just-in-Time (JIT), 5S, Value Stream Mapping, Root Cause Analysis (5-Why, Fishbone Diagram), Continuous Improvement (Kaizen)

Software/Tools: Advanced Excel (Pivot Tables, VLOOKUP, VBA/Macros), Power BI, Tableau, SAP S/4HANA (MM, SCM), Oracle SCM Cloud, Anaplan, Kinaxis RapidResponse, MS Office, MS Project

Analysis & Planning: Demand Forecasting, Inventory Optimization, S&OP (Sales & Operations Planning), Safety Stock Calculation, Economic Order Quantity (EOQ), KPI Tracking & Reporting (OTIF, Cycle Time, Fill Rate), ABC/XYZ Analysis, What-if Scenario Modeling

Databases: SQL (MS SQL Server, MySQL, Oracle Database)

Logistics & Operations: Warehouse Management Systems (WMS), Transportation Management Systems (TMS), Inbound/Outbound Logistics, Supplier Scorecarding, Order Management, RFID/IoT Supply Chain Integration

Cloud & Data Platforms: SAP S/4HANA Cloud, Oracle SCM Cloud

Collaboration & Communication: Cross-functional Team Collaboration, Supplier Relationship Management, Procurement Support, Stakeholder Engagement, Global Supply Chain Coordination
