SUMMARY

Analytical and results-oriented Data Analyst / BI Analyst with 5+ years of experience leveraging Python, SQL, Power BI, Tableau, and cloud platforms (AWS, Snowflake) to transform complex datasets into actionable business intelligence. Skilled in data modeling, ETL automation, and predictive analytics, delivering insights that enhance decision-making, streamline reporting, and drive measurable business performance improvements.

Expert in developing scalable data solutions and performance dashboards that improve data accuracy, efficiency, and accessibility across enterprise systems. Known for translating technical findings into strategic insights, optimizing workflows and enabling data-driven decision-making that supports long-term organizational growth.

EXPERIENCE

Senior Data Analyst / BI Data analyst | Doublene

Jan 2024 – Present

- Built predictive and exploratory models in Python (pandas, scikit-learn) to forecast business outcomes and detect behavioral trends, improving model accuracy by 41% and enabling proactive strategy optimization.
- Architected and fine-tuned complex SQL queries, CTEs, and stored procedures, cutting data retrieval and report refresh times by 30–40% across Tableau and Power BI dashboards.
- Designed and automated ETL pipelines using Informatica, SSIS, and Python scripts, integrating data from 10+ sources and reducing manual intervention by 33%.
- Leveraged AWS Redshift and Snowflake for cloud-based analytics and real-time reporting, driving a 50% improvement in decision-making efficiency and client satisfaction.
- Created a centralized data warehouse schema following star/snowflake modeling principles, improving query performance and data accessibility by 29%.
- Partnered with business stakeholders to translate KPIs into actionable dashboards and insights, identifying revenue leakage and process inefficiencies that cut costs by 19%.
- Documented and standardized ETL and data quality processes, establishing reusable data assets for analytics and compliance reporting.

Data analyst – Business | Infosys

Nov 2021 – Dec 2022

- Streamlined data mining and exploratory data analytics on large-scale financial datasets (multi-terabyte) using AWS S3, Spark, and Hadoop, improving analysis speed and decision accuracy by 35%.
- Developed forecasting and performance models in Python (NumPy, SciPy, scikit-learn), enhancing prediction accuracy by 15% and supporting financial and operational planning.
- Engineered robust data models and star schemas in SQL Server and Power BI, improving query and dashboard load performance by 33%, directly impacting executive reporting speed.
- Performed comprehensive data profiling, cleansing, and transformation, improving dataset quality by 19% and ensuring reliable metrics for leadership KPIs.
- Built and deployed optimized PL/SQL procedures, triggers, and views, reducing execution time by 27% and improving backend data processing for analytics.
- Collaborated with cross-functional teams to resolve 90%+ CRM data discrepancies, enhancing data integrity and improving business decision efficiency by 19%.
- Led cross-functional collaboration with the Data Team to strengthen data governance through rigorous data quality checks and proactive issue resolution, achieving a 20% drop in data errors and ensuring enterprise-wide data consistency.

Data analyst | Tata Consultancy Services

Jun 2019 – Oct 2021

- Designed and implemented graph data models in Neo4j, optimizing node–relationship queries and improving graph search performance by 40%, enabling faster fraud and network analysis.
- Automated analytical workflows using Pandas, NumPy, Matplotlib, Seaborn, SciPy, increasing data processing efficiency by 38% and reducing manual reporting cycles.
- Developed interactive Tableau dashboards visualizing graph and transactional insights, helping business leaders identify entity relationships and anomalies in real time.

- Built and maintained SQL jobs and stored procedures to support data integration and transformation, improving system reliability and uptime by 15%.
- Executed ETL processes with Tableau Prep and Alteryx, boosting data consistency and accuracy by 26% across multi-departmental datasets.
- Supported enterprise-scale reporting projects using Power BI and Excel, converting raw data into actionable KPIs that enhanced operational efficiency by 30%.
- Partnered with data engineers to migrate legacy Excel processes into SQL-based pipelines, standardizing analytics and reducing report turnaround time.

SKILLS

- **Specializations:** Data Storytelling, Data Warehousing, Statistical Analysis, ETL Automation
- **Programming Languages:** Python, R, SQL, PL/SQL
- **BI Tools:** Power BI, Tableau, Excel, Alteryx, Looker
- **Databases:** SQL Server, MySQL, PostgreSQL, Redshift, Snowflake, BigQuery, Neo4j
- **ETL tools:** Informatica, SSIS, API Data Integration, Pipeline Automation
- **Cloud Platforms:** AWS, Azure, Databricks
- **Big Data:** Hadoop, Spark
- **Data Modeling:** Star Schema, Snowflake Schema, Data Warehouse, Dimensional Modeling
- **Tools & Platforms:** Git, Oracle, Jupyter Notebook, SSRS, SSIS
- **Reporting:** KPI's, Dashboard, Stored Procedures, CTEs, Indexing, SLA Reporting
- **Project Management:** Microsoft Office Suite, Jira

CERTIFICATIONS

- Certified System Senior Architect (CSSA)
- Certified System Architect (CSA)

EDUCATION

Master of Science in Computer Science Kennesaw State University, Marietta, Georgia, USA	Jan 2023 – May 2024
Bachelor of Technology in Electronics and Communications Engineering Vishnu Institute of Technology, Bhimavaram, India	Jun 2015 – May 2019
