Regulatory & Quality Specialist | FDA 510(k), EU MDR/IVDR, ISO 13485 Compliance | Medical Device Manufacturing & Risk Management Expert

PROFESSIONAL SUMMARY:

- expertise, effectively communicated and collaborated with regulatory bodies worldwide, including FDA, Health Canada, PMDA, ANVISA, COFEPRIS, and EU-notified bodies.
- Addressed inquiries from health authorities and proactively engaged with testing labs to secure necessary certifications.
 - Prepared change assessments for submissions to Japan, Brazil, and the EU markets and assessed the impact of changes on the devices in the current market.
 - Participated in cross-functional team meetings and acted as a core member, guiding the product development team on regulations and submission-related questions.
 - Appraised clinical data and prepared comprehensive clinical evaluation reports, mechanical testing overviews, and biocompatibility rationales for technical files and design dossiers. This included thoroughly reviewing annual Post-Market Surveillance Reports to ensure accuracy and adherence to regulatory standards.
 - Prepared change assessments, letters to file, justifications, test summary overviews, and reports.
 - Adapted to changing regulatory environments by creating technical files and documentation to support the IVDD to IVDR transition and supported the EU MDD to MDR file remediation, ensuring compliance with evolving guidelines.
 - Performed QC for labels and identified gaps concerning IVDD and IVDR.
 - Contributed to regulatory intelligence efforts to train and educate departments on changing regulations.
 - Developed and executed regulatory strategies and plans for devices and in vitro diagnostics, leading to successful entry into new markets and increased company success.
 - Involved in audits including ISO, MDR IVD, MDR, and MDSAP.
-

PROFESSIONAL EXPERIENCE:

DEKRA Product Testing & Certification.

Oct -2022 to May 2025

Technical Specialist/Regulatory Specialist

- Supported global regulatory submissions (FDA 510k, EU MDR 2017/745, IVDR 2017/746), achieving successful market approvals across the US and EU with zero major deficiencies.
- Authored and maintained 15+ Technical Files and design dossiers for MDR/IVDR compliance, expediting CE Marking by ensuring completeness and accuracy of design verification, clinical evaluation, and risk management documents.
- Created and implemented DEKRA's medical device qualification and training program, achieving 100% trainee compliance within required timelines and accelerating audit readiness.
- Supported risk management across design and post-market phases (ISO 14971), reducing patient safety risk scores by 20% and aligning risk controls with global standards.
- Developed, implemented, and verified CAPA and effectiveness review processes, achieving a 40% reduction in recurring non-conformities across key manufacturing lines.
- Played a pivotal role in 3 ISO 13485 audits, delivering assessments and facilitating client-facing meetings, achieving zero non-conformities, and strengthening internal quality practices.
- Reviewed and approved promotional materials and labeling, ensuring 100% compliance with FDA and EU regulations and avoiding costly delays or warning letters.
- Oversaw intake review and streamlined review of 50+ technical documents, expediting EU CE Marking by verifying design verification, clinical evaluation, and risk documents for completeness and accuracy.
- Partnered with cross-functional teams to review and update 15+ Technical Files, aligning MDR/IVDR documentation with evolving regulations and streamlining internal review processes.
- Maintained equipment and calibration per ISO 13485 and 21 CFR Part 820, achieving 100% compliance in internal audits and supporting operational excellence.
- Supported Management Reviews by presenting quality metrics, PFMEA findings, and risk analyses, directly influencing process improvements and risk mitigation strategies.
- Served as a technical liaison for client and internal meetings, strengthening communication, building trust, and boosting client satisfaction and retention.

Ambio Pharma INC.,

Aug 2022 – Sep 2022

Regulatory Affairs Associate

- Supported project planning and execution, utilizing Gantt charts, spreadsheets, and project management tools to track milestones, identify resource needs, and mitigate project delays.
- Prepared and reviewed regulatory documents, reports, and responses for FDA and other global authorities, ensuring completeness, accuracy, and on-time submissions.
- Maintained and managed electronic document repositories for drug substances and products, facilitating seamless access and retrieval across departments and manufacturing sites.
- Supported site readiness for customer and agency audits by coordinating preparations, addressing deficiencies, and

supporting the implementation of CAPAs and quality improvement measures.

- Evaluated process and specification changes, assessed their impact on existing regulatory filings, and communicated necessary adjustments to stakeholders and customers.
- Monitored new guidance documents and regulations, performed impact assessments, and implemented required changes to ensure ongoing compliance across products and projects.
- Streamlined quality standards, programs, and processes to reduce waste, improve operational efficiency, and enable timely, informed decision-making by senior management.

Aerosol Containment CO., Boston, MA.

Apr 2022 - July 2022

Regulatory Affairs Intern-Capstone Project

- Partnered with ACC, a medical device company that developed a single-use, disposable tent to provide EMS professionals with an extra layer of protection from infectious respiratory disease aerosols.
- Developed and implemented a 510(k)-submission pathway for a medical device company, aligning marketing authorization and license maintenance requirements with IMDRF and FDA regulations.
- Partnered with cross-functional teams (Formulation Development, Analytical Development, Quality, and Manufacturing) to compile and review critical CMC documents, supporting seamless and timely regulatory submissions.
- Created and managed submission trackers, conducted weekly review meetings, and identified timeline and deliverable risks, ensuring adherence to milestones and reducing delays.
- Supported the development of departmental work practices, training materials, and process improvements, streamlining the submission review process and enhancing overall department efficiency.

PNI Therapeutics, Mamaroneck, New York.

Sep 2021-Dec 2021

Research Intern - Experiential Network project

- Partnered with PNI Therapeutics through Northeastern University's Experiential Network, supporting a project to assess the acceptability, feasibility, and tolerability of PNI Thrive, a 10-minute VR-guided meditation therapy for cancer patients.
- Evaluated pre- and post-VR patient-reported outcomes, including relaxation, anxiety, fatigue, empowerment, and overall well-being, providing valuable insights for clinical and regulatory decision-making.
- Identified and escalated data discrepancies to the regulatory team, ensuring accurate database records and timely follow-up.
- Supported global regulatory collaboration by updating and verifying databases and coordinating key communication across departments.

CORE COMPETENCIES / SKILLS:

- Submissions & Compliance: 510(k), PMA, De Novo, EU MDR 2017/745, IVDR 2017/746, MDSAP
- Regulatory Standards: ISO 13485, ISO 14971, FDA 21 CFR 820, QSR, GxP, GMP, GLP
- Quality & Risk: CAPA, Recalls, Risk Management, Labeling Review, Vigilance Reporting
- Tools & Systems: MS Office Suite, Adobe Acrobat, SharePoint, Track Wise
- Post-Market Surveillance: PMS Reports, MAUDE, FAERS, Vigilance
- Cross-Functional Leadership: Project Planning, Training, Clinical Evaluations, Internal Audits
- Tools: MS Office (Word, Excel, PowerPoint), Adobe Suite, SharePoint

EDUCATION:

- Northeastern University, Master's in Regulatory Affairs – Drugs, Biologics & Medical Devices
- JNTUK - Master of Science in Pharmaceutical Science
- JNTUK – Bachelor of Pharmacy.
