

Samat Zholdassov

Senior AI/ML Engineer | Data Scientist | Former Googler (650) 656-5483 | samzhold25@gmail.com | [GitHub](#) US Green Card Holder

Executive Summary:

Innovative Senior Data Scientist and AI/ML Engineer with 8+ years of experience in high-scale data environments. Expert in architecting ML pipelines, building full-stack analytics tools, and driving data governance initiatives. Proven track record of optimizing cloud infrastructure at **Google** and leading end-to-end data transformations at **Home Credit Bank**.

Technical Skills:

- **Languages:** Python (Advanced), JavaScript/TypeScript, SQL (Expert), Rust (basic).
- **ML & Analytics:** PyTorch, TensorFlow, XGBoost, scikit-learn, LLMs, Prophet, Pandas, NumPy.
- **Cloud & Data:** Google Cloud (BigQuery, Dataflow, Dataplex), Snowflake, Databricks, Redshift, Azure.
- **Engineering & DevOps:** dbt, Airflow, GitHub Actions, Docker, Terraform, FastAPI, Flask, React.
- **BI & Visualization:** Looker, Tableau, Power BI (Advanced DAX), Google Data Studio.

Professional Experience:

Mercor.com | Data Scientist / AI/ML Engineer | Aug 2025 – Present

- Architect and deploy ML pipelines for predictive analytics, anomaly detection, and forecasting using PyTorch and scikit-learn.
- Engineered full-stack analytics tools (React/Next.js + FastAPI) to automate failure tracking and integrate real-time Looker dashboards.
- Lead prompt-engineering and model-evaluation projects for LLM applications and intelligent retrieval systems.
- Implemented CI/CD pipelines (GitHub Actions, Docker) to ensure 100% reproducible deployments and ML version control.

Ipsy.com (via Intellisoft) | Senior Business Data Analyst | Jan 2023 – May 2025

- Orchestrated end-to-end analytics initiatives for 100M+ row datasets across Snowflake and BigQuery to drive operational improvements.
- Optimized modular ELT workflows using dbt, implementing automated data quality checks and version control.
- Architected marketing funnel analysis (CAC, LTV, ROAS) by integrating Salesforce, CRM, and Paid Ads data.
- Designed complex Power BI data models and DAX measures to fulfill critical regulatory (CPUC) audit and reporting requirements.
- Developed analytical models and data transformations using Python to support financial reporting and risk analysis.
- Partnered with risk, finance, and business stakeholders to translate analytical insights into data-driven decisions.

Google (via Artech LLC) | Data Analyst (GCP Power & Cooling) | Jul 2022 – Nov 2022

- Engineered Python-based pipelines (PySpark, Pandas) on Databricks to automate feature engineering for ML workflows.
- Increased reporting accuracy by 20% by applying proxy regression and statistical modeling to address incomplete telemetry datasets.
- Developed automated anomaly detection frameworks integrated into Dataflow and Dataplex pipelines.
- Authored cost-optimized GCP architecture blueprints and deployed infrastructure as code (IaC) via Terraform.

Home Credit Bank | Senior Business Data Analyst | Jan 2017 – Nov 2020

- Reduced data latency by 30% by automating data quality checks and ETL pipelines in Hadoop/Spark environments.

- Led data architecture and governance efforts, including data lineage mapping and metadata management in Google Data Catalog.
- Designed risk analytics frameworks in Python/SQL for retail credit and payment forecasting.
- Led advanced SQL analysis on high-volume financial and credit-risk datasets, supporting portfolio performance and risk assessment.
- Investigated payment flows, delinquency patterns, and risk metrics to surface anomalies and early warning signals.

Education & Certifications:

- **MBA in Management Information Systems** – California Lincoln University, Oakland, CA.
- **B.S. in Computer Science** – Eurasian National University.
- **Certifications:** Advanced Google Data Analytics, Meta Data Analytics, Tableau Desktop Specialist.
