

Katherine Ballard

About Me

I am a seasoned Business Intelligence professional with deep expertise in financial services and broad consulting experience across healthcare, retail, transportation, insurance, manufacturing, and telecom industries. Core specialties include Power BI, Tableau, and SQL, with advanced proficiency in a wide range of BI tools. Proven success guiding organizations through seamless transitions to Power BI/Tableau from legacy platforms, ensuring adoption and measurable business impact.

Advanced skills span the full Microsoft BI stack (Power BI, SQL, SSIS, SSRS, SSAS), paired with strong knowledge of compliance, risk management, and financial/healthcare regulations. Equally effective in both front-end and back-end development, with a track record of building collaborative, trust-based relationships with stakeholders. Known for adaptability and the ability to manage multiple clients simultaneously while delivering solutions to complex business needs. Continuously pursuing professional growth and innovation, while investing fully in each organization served. I am Dedicated to driving value, efficiency, and long-term success.

Work History

Rapid Fire Safety & Security(Sr Power BI Developer)

August 2025-February 2026

- Led end-to-end design and development of enterprise dashboards, supporting executive, finance, and operations stakeholders across multiple regions and branches.
- Architected and optimized complex Power BI semantic models over large SQL/Fabric datasets, resolving ambiguous relationship paths, inactive relationships, and grain mismatches.
- Diagnosed and remediated data model and schema drift issues caused by upstream changes (column removals, renamed keys, view changes), partnering with data engineering to rebind sources and stabilize refresh pipelines.
- Collaborated closely with data engineers and stakeholders to identify data contract gaps, validate key domains, and recommend star-schema-aligned views to support reliable BI consumption.

Skills

Power BI. DAX. SQL. SSIS. SSRS. SSAS. ETL. Excel Certified. Snowflake. Data Analytics. SharePoint. Salesforce. Power Query. Power Automate. MicroStrategy. Power Platform. Power Apps. Power Pages. Power FX. SAP Business Objects. Agile. PeopleSoft Query. GIT. AWS. Alteryx. Azure Databricks. Jira. QlikView. Teradata. Tableau. OLAP. Domino. Prep. Python. BigQuery. Cognos. API. Project Management. ETL. Data Warehousing & Modeling. Gathering Requirements. Client Facing Meetings.

Education

Richland College

Dallas, TX
Associate in Business (Did not complete)

01/2015

Colaberry School of Data & Analytics

Plano, TX
Bachelor's Equivalent Degree of Data Analytics with Business Intelligence

- Led troubleshooting of Power BI refresh failures and blocked queries, isolating Power Query vs. model vs. source issues and restoring production refresh stability.
- Applied performance optimization techniques including model simplification, relationship pruning, to improve report responsiveness and scalability.
- Delivered stakeholder training and documentation on dashboard usage, metric definitions, and data limitations, improving adoption and reducing ad-hoc reporting requests.

Insight Global-Sr Power BI Developer (Health Care)

November 2024-July 2025(Shorter Contract)

- Maintained large enterprise Power BI report daily.
- Optimized data across SQL, Snowflake, Azure, and Denodo.
- Designed and developed interactive Tableau & Power BI dashboards and reports for executives.
- Built complex calculated fields, parameters, and level-of-detail (LOD) expressions to solve intricate business problems and uncover actionable insights.
- Delivered performance tuning improvements, increasing report speed by 30%.
- Built custom DAX measures and M code for executive-facing metrics.
- Built Snowflake-based data models to support Power BI reporting and improve query performance.
- Trained end users and facilitated adoption across clinical and financial teams.
- Managed Power BI/Tableau workspaces as administrator.
- Developed and optimized SQL stored procedures for transforming healthcare data across multiple domains.

CHS Inc/Randstad Digital (Retail & Manufacturing)

Sr. BI/Power BI Analyst

3/2024-11/2024(Contract role)

- Created over 15 custom dashboards and paginated reports with dynamic filtering.
- Built and maintained Power BI gateways and handled administrative tasks.
- Streamlined ETL processes, improving reliability.
- Built scalable ELT pipelines in Azure Databricks to prepare data for Snowflake ingestion.
- Implemented Delta Lake tables in Databricks for structured and semi-structured data processing.
- Implemented data quality checks and created standardized documentation.
- Mentored analysts and established best practices across BI development.

Certifications:

- Microsoft Excel Specialist
- SQL Certified Associate
- Tableau Certified Data Analyst
- Databricks Certified Data Engineer
- Agile Certification in progress
- PeopleSoft Certified Specialist in progress

Interests:

Reading. Writing. Gaming. Travel. Creative Arts.

- Refactored legacy SQL codebase to improve data consistency and reduce report generation time by 50%.
- Designed SSRS reports with dynamic parameters and expressions for operational reporting.
- Created Tableau dashboards combining multiple data sources and custom calculated fields.
- Optimized Tableau dashboards through data blending, extracts vs. live connections, and performance tuning, reducing load times.
- Integrated Tableau with SQL, Snowflake, and other enterprise data warehouses, creating scalable and secure reporting solutions.

Incworx Consulting - Sr.BI/Power BI Developer/ETL/SQL Developer(Healthcare, Finance Retail, telecom, Education, Insurance)

Contract-Remote

03/2023 - 03/2024

- Delivered 30+ custom reports using advanced DAX for clients.
- Integrated geospatial analytics in Alteryx and built automated workflows.
- Built Power Apps & Power Automate flows for custom business solutions.
- Built and maintained Snowflake data warehouse with dimensional models.
- Built Spark-based ETL pipelines in Azure Databricks to handle high-volume raw ingestion.
- Created dashboards in Tableau and performed statistical analysis in SAS.
- Partnered with data science teams on cloud (AWS) & Python-based solutions.
- Designed scalable pipelines for batch processing and Delta Live Tables in Databricks.
- Designed and documented relational data models to support enterprise-wide BI usage.
- Developed automated SQL scripts to validate and clean incoming source data.
- Developed SSIS packages with error handling, logging, and checkpoints for large-scale ETL workflows.
- Built Tableau visualizations for marketing and sales analysis using parameter-driven views.
- Power Query in Power BI for data cleansing and transformation.
- Created complex SQL stored procedures, views, triggers, and constraints to implement database consistency and integrity.
- Assisted in Development and deployment for a Python-based web application that integrated data from multiple sources, resulting in a 25% increase in user engagement.
- Utilized Python to build custom scripts for automation of daily tasks, resulting in an increase in productivity.

Agree Technologies Consulting - Sr. BI/Power BI Developer

Contract-Remote (Government-Finance)

04/2022 - 03/2023

- Created robust data models and dashboards with complex DAX & Power Query.
- Optimized SQL and developed views, indexes, and stored procedures.
- Developed SSAS cubes and tabular models for OLAP reporting.
- Built data pipelines to integrate Azure Blob Storage with Snowflake for staging layer.
- Improved data gathering through strategic ETL and warehousing practices.
- Led database performance tuning and automated report generation.
- Led SQL Server optimization efforts, reducing stored procedure execution time by 40%.
- Implemented governance controls for stored procedures and query naming conventions.
- Created drill-down SSRS reports with parameterized inputs and subscription scheduling.
- Designed Tableau dashboards to support operational reporting.

AustinCSI - Sr. BI/Power BI Developer Analyst

Plano Tx-Hybrid(Laid off)-(Telecom, Healthcare Insurance, Manufacturing)

10/2021 - 04/2022

- Translated business needs into technical data models and reports.
- Extracted data from Azure, SQL Server, and Teradata into Power BI.
- Performed data quality assessments and advanced DAX development.
- Built ELT pipelines leveraging Databricks Notebooks for processing semi-structured datasets.
- Managed SSRS reports and created SSIS packages for automated ETL.
- Delivered rapid dashboard iterations in a consultative, Agile environment.
- Wrote and maintained complex SQL queries and views to support evolving business logic.
- Mentored junior team members on query tuning and database best practices.

- Created multidimensional cubes in SSAS with role-based security and KPI definitions.
- Built Tableau scorecards with slicers and filters for multi-level business review meetings.

Bank Of America - BI/Power BI Developer-Full Stack

Hybrid

06/2015 - 10/2021

- Transformed raw data into valuable and meaningful insights in the form of appealing analytical dashboards and reports.
- Gathered requirements directly from stakeholders.
- Built Measures and Calculated columns using DAX.
- Wrote complex SQL queries, tables, views, Stored Procedures.
- Extracted data from various sources, transforming, and loading it to SQL server databases.
- Created Data sets for SSRS/Power BI reporting.
- Data management - transactional and historical data storage and data warehousing.
- Champion of privacy and compliance.
- Advanced experience with Microsoft Excel and pivot tables.
- Worked in Development, Deployment to QA testing, UAT and production.
- Created reports for the DOJ by pulling raw data from Share point.
- General performance tuning of code, reports, packages.
- Error handling and debugging.
- Execute and monitor ETL deployment processes.
- Performed ETL from different data sources.
- Worked using Agile principles and philosophies.
- Designed, developed, and deployed many reports such as scorecards, KPI reports and dashboards using SSRS and Power BI.
- Created operation reporting such as dashboards, ad-hoc reports, metric reports, compliance reports.
- Experience with all Microsoft platforms, Salesforce, Azure Database, Oracle, Fiserv, AS400, Synergy, Share point, private cloud platform.

Bank Of America – Business/Data Analyst

Richardson, TX. Addison, TX.

01/2008 – 6/2015

- Assisted in development of KPI report production, automation, and validation.
- Managed, interpreted, and validated all data that was produced by the client, maintaining the focus on improving the quality of member care.
- Provided recommendations for possible process changes to help optimize current procedures in support of maximizing outcomes.

- Conducted targeted audits of all provider and member-oriented work streams to promote compliance.
- Proven experience in eliciting requirements and testing
- Experience in analyzing data to draw business-relevant conclusions and in data visualization techniques and tools.
- Basic knowledge in generating process documentation.
