SUMMARY

Supply Chain Analyst with 3+ years of experience integrating data analytics to streamline supply chain operations, optimize inventory, and enhance forecasting accuracy. Adept in transforming complex datasets into actionable insights using tools like SQL, Python, Excel, Power BI, and Tableau. Proven ability to drive cost savings and efficiency improvements through data-driven decision-making, KPI monitoring, and automation.

TECHNICAL SKILLS

Supply Chain & Operations Management: Supply Chain Optimization, Demand Forecasting, Inventory Management, Procurement & Sourcing Analytics, Logistics & Distribution Analysis, Sales & Operations Planning, Supply Planning, Vendor & Supplier Performance Analysis, Cost-to-Serve Analysis, Root Cause & Gap Analysis

Data Analytics & Decision Support: Predictive & Prescriptive Analytics, KPI Development & Monitoring, Statistical Modeling, Scenario Planning, Operational Dashboards, Automated Reporting, Data Storytelling, Data Governance, Data Cleansing & Transformation, Business Intelligence Strategy

Tools & Technologies: SQL, Python (Pandas, NumPy, SciPy, Matplotlib, Seaborn), Excel (Power Query, VBA, VLOOKUP, PivotTables, Macros), Tableau, Power BI, SAP ERP (MM, SD, PP, SCM modules), Snowflake, Microsoft Access, Alteryx, JIRA

Cross-Functional & Strategic Skills: Data-Driven Decision Making, Cross-Functional Collaboration, Supply Chain Risk Management, Strategic Sourcing, Project Management, Agile & Scrum Methodologies, Change Management

PROFESSIONAL EXPERIENCE

Supply Chain Analyst, Capgemini

Aug 2024 – Present | USA

- Designed and developed an interactive financial analytics dashboard to track revenue, expenses, profitability, and investment KPIs, integrating data from SAP ERP, Snowflake, and external financial systems, resulting in a 25% improvement in financial reporting efficiency.
- Optimized budget forecasting and cash flow management by analyzing historical financial data and implementing predictive modeling, reducing variance between forecasted and actual results by 18%.
- Collaborated with finance, accounting, and treasury teams to design data-driven solutions that enhanced financial planning, risk assessment, and cost control measures.
- Automated financial reporting workflows using Python and SQL, improving data refresh frequency and enabling real-time insights for leadership decision-making.
- Conducted variance and root cause analysis on cost overruns, revenue leakages, and delayed receivables, providing actionable insights that led to a 20% reduction in operational costs.
- Partnered with IT and data engineering teams to ensure accurate data integration from SAP, Snowflake, and third-party financial data providers, maintaining data integrity and consistency across all financial reports.

Supply Chain Analyst, Infor

Apr 2021 – Jul 2023 | India

- Designed and implemented inventory optimization strategies across 5 distribution centers using SAP ERP and simulation modeling, evaluating 10+ policies to reduce stockouts and inventory carrying costs.
- Analyzed demand variability, sales patterns, and lead times to support accurate demand forecasting, safety stock planning, and replenishment strategies, improving inventory turnover and service levels.
- Built and executed Python-based simulations to model inventory and distribution scenarios, assessing the impact of policy adjustments on logistics costs, order fulfillment, and stock efficiency.
- Extracted and analyzed supply chain data from SAP HANA using advanced SQL techniques, enabling insights into procurement timing, warehouse stock levels, and inter-location transfers.
- Collaborated cross-functionally with procurement, logistics, and operations teams in Agile settings, conducting bi-weekly sprints to align supply chain strategies with business objectives.
- Integrated SAP with AWS-based solutions (Lambda, S3) to automate real-time inventory tracking, improving supply chain visibility and reducing response time to stock fluctuations.
- Developed interactive dashboards in Power BI to track KPIs such as inventory accuracy, order cycle time, and service levels, enabling faster, data-driven decision-making across the supply chain function.

MASTER'S RESEARCH PROJECT

Retail Supply Chain Optimization at Walmart

- Investigating Walmart's \$2.8B annual loss from inventory imbalance and insufficient visibility.
- Designing a cloud-integrated analytics platform for inventory flow and demand forecasting.
- Enhancing operational visibility and customer experience across Walmart's 11,000+ stores.

EDUCATION

Master of Science, Saint Louis University

Aug 2023 – May 2025 | USA

Information Systems

Bachelor of Technology, Andhra University College of Engineering

Jun 2018 – May 2022 | AP, India

Electronics and Communication Engineering
