Professional Summary

Senior Business/Data Analyst with 15+ years of experience driving data-driven decision-making across Fortune 500 companies. Skilled in SQL, Databricks, Power BI, and Python with a strong foundation in business systems analysis, data architecture, and cross-functional team collaboration. Proven ability to translate business needs into technical solutions that increase operational efficiency and drive revenue. Experienced in Agile, SDLC, and enterprise big data platforms including Azure and Amazon AWS.

Key Skills

- **Data Analysis/ Reporting: Databricks SQL, SQL, Excel, Power BI, Python, R, Tableau**
- **Databases: SQL Server 2019/2016, MySQL, Cosmos/Scope, Kusto**
- Cosmos/Scope, Kusto
- Tools: SSMS, Jupyter, Alteryx, ADO, Jira, Miro, Visio, MS Office

Work Experience

Senior Data Analyst - Nike (Tapfin) | Remote | Feb 2023 – July 2025

Worked on the Retail Listings Manager and Enterprise Availability data products to streamline inventory visibility and listings across Nike stores globally.

- Conducted complex data analysis to identify discrepancies and product availability patterns across retail channels.
- Gathered and documented Functional Design document.
- Collaborated with engineering, data modelers and architects to design and execute data workflows and source to target mappings.
- Authored and executed test cases to validate data through different layers of databricks medallion lakehouse architecture.
- Supported migration of data products from Native Databricks to Databricks SOLE.
- Automated testing scripts for data validation across different data layers.
- Supported resolution of production issues.

Technology: Databricks SQL, Python, MS Excel

Business Data Analyst – Microsoft Dynamics CRM – Success Centre | Microsoft (People Tech Group) | April 2022 – Jan 2023

Worked on Success Centre, a CRM application from Microsoft Dynamics that consists of specialized features and capabilities for Customer Success Managers to track and monitor Microsoft customers' cloud consumption. The CSM's offer support to their customer with offers and benefits that help enhance the customer's businesses, thus generating revenue for Microsoft.

- Collaborated with business stakeholders to gather reporting requirements for CSM(Customer Success Manager CRM) analytics.
- Analyzed and identified data sources to develop KPI and performance metrics.
- Led a team of analysts and engineers to deliver actionable reports supporting M365 product sales forecasting.
- Facilitated daily team standups and bi-weekly stakeholder syncs to communicate progress and manage expectations.
- Designed report mockups in Power BI/ Excel ensuring alignment with business needs.
- Managed project tracking and delivery through Azure DevOps.

Technology: MS SQL Server, Power BI, ADO, MS Excel, DAX

Systems Analyst – Privacy Workflows Services Automation(PWSA) | Starbucks (Capgemini) Seattle, WA | Feb 2021 – Feb 2022

Worked on automation of Privacy Workflows with CCPA in alignment with Starbucks Global Privacy's(business) vision to empower customers exercise their privacy rights(e.g. Right to Information, Right to Access, Right to Know, Right to Delete). Played a key role in the implementation of automation of privacy workflows using Pega, the industry leading business process management platform.

- Gathered business requirements from Privacy Operations to support workflow automation.
- Created business process models and systems integration diagrams to demonstrate current(As-Is) and future(To-Be) processes.
- Facilitated requirements elicitation and conducted stakeholder presentations.
- Collaborated with cross functional teams including engineering, product management and PEGA(external) to ensure end to end alignment.
- Authored user stories and managed back log in Jira aligning with agile delivery methodology.
- Performed data analysis to support validity of process workflows.
- Authored Test Cases and participated in systems integration testing

Technology: Jira, Miro, Pega, OneTrust, Alteryx

BI Engineer/Data Analyst – MCO+I / Data Center Integration Services (DCIS) | Microsoft Corporation (Insight Global) | Redmond | Mar 2020 – June 2020

Worked on Microsoft Cloud Operations & Innovation (MCIO), which is the engine that powers Microsoft's cloud services. The team delivers the core infrastructure and foundational technologies for Microsoft's over 200 online businesses including Bing, MSN, Office 365, Xbox Live, Skype and the Microsoft Azure platform. The team's infrastructure is comprised of a large global portfolio of more than 100 datacenters and 1 million servers. Their portfolio is built and managed by a team of SMEs working to support services for more than 1 billion customers and 20 million businesses worldwide.

- Developed SQL jobs, stored procedures and tables for ETL of data to support development/deployment of DCIS reports.
- Created Power BI visualizations to project data center server capacities.
- Investigated job failures and recommended performance tuning and debugging solutions.
- Performed database cleanup for deprecated reports.

Technology: MS SQL Server 2016, Power BI, Excel Power Pivot, DAX, ADO

Data Analyst – Microsoft Philanthropies | Microsoft Corporation (Harman) | Redmond Dec 2018 – Feb 2020

Worked in Microsoft Philanthropies, which is the Microsoft organization committed to provide and manage various donations and benefits to eligible nonprofit organizations globally. It collaborates with its partners and grantees in achieving this goal

- Analyzed Nonprofit master child data to identify ambiguities with incorrect or missing masters.
- Performed data driven fraud analysis to detect fraudulent customers accessing MS technologies.
- Determine patterns in data discrepancies such as duplicity, incorrect relationships, orphans etc. and led initiatives to cleanup data ensuring integrity of Nonprofit data.
- Analyzed azure registrations for missing link to Nonprofit data and enabled mapping to relevant Nonprofit.
- Collaborated with stakeholders for reporting requirements and created visualizations for operational data analysis.

Technology: MS SQL Server 2016, Power BI, Power Pivot, DAX, SSAS tabular

Data Quality Analyst-Traffic Permits | Seattle Department of Transportation(SDOT)(People Tech Group) | Seattle Sep 2016 -March 2017

SDOT moved its traffic operation's IT platform from Hansen, a legacy system, to Accela, a Java/SQL server-based web system. Accela provides a feature rich web interface that can be customized to automate and streamline the operational procedures for SDOT.

- Worked on understanding various business scenarios to identify data requirements for dashboards to improve customer experience.

- Involved in analyzing functionality of various workflows in provisioning traffic permits from the point of application submission till issuance of permits for various permit types including amendments, renewals and replacements of licenses.
- Analyzed reports for accuracy in monthly invoices, payment reminders, renewal notifications and permanent permits.
- Authored test plans, test cases and SQL scripts for data preparation and validation.
- Supported UAT with instructions and test cases for end to end functional testing and data validation.

Data Quality Analyst – CFIT/Velocity | Microsoft Corporation (People Tech Group) | Redmond| Jan 2014 – Aug 2015

Worked on Velocity, which was a platform that sourced data from various MS divisions such as Commerce Platform, Office Subscription of Chinese market etc. in different formats such as text file, relational databases in SQL Server, Cosmos streams etc. using SQL Server jobs via ETL and shared data with stakeholders through DSL packages.

- Deployed and validated builds, conducted data validations and logged issues.
- Validated source to target mapping.
- Evaluated Scope scripts to verify the data extracted from COSMOS.
- Participated in automation of tools using SQL server and C#
- Participated in performance analysis of ETL jobs during migration from SQL 2012 to SQL 2014 and migration from Informatica to SSIS.

Technology: SQL Server 2014/2012, COSMOS, SSIS, C#, TFS, Octopus

SQL Developer/Consultant – Metropolis / Agent Desktop | Microsoft Corporation (Dynasoft), Redmond | Feb 2013 – Oct 2013

Worked on Metropolis, which was the primary OLTP customer data store for all Incident Management systems in the PSIT stream of Microsoft. Agent Desktop was the primary Incident Management application and the main source of data for the Metro DB besides MSODS, MIO etc., where the customer data was pulled via jobs or stored via partner interfaces. Metropolis supported its partners such as MS Solve, CAP etc., by offering Search and Get capabilities on its customer data.

- Key developer for the MIO (Microsoft Individuals and Organization) De-sync project: Prepared Tech Spec for the BE design and development. Developed new BE objects and re-engineered existing procedures to cater to the new requirements. Created SQL scheduled job for reporting to pull organization related data for business users.
- During production performance crisis, actively worked on resolving performance issues by identifying missing indexes or tuning the SQL queries.
- Was involved in several troubleshooting and fixing of issues reported by partners in production Metro DB.

Technology: MS SQL Server 2012, Replication, C#.net.

Earlier Experiences:

SQL Developer / Analyst / Associate – Various Clients (Microsoft, WDC, Take Solutions, Synectics) | 2000 – 2012

- Designed data warehouse database and olap cube for a migration project. Developed MDX queries for reporting on olap cube. Developed and scheduled DTS packages for automating the processing of olap cubes.
- Developed stored procedures for implementing several backend functionalities.
- Optimized SQL Server databases and ETL pipelines.
- Participated in trouble shooting production issues.
- SME for defining functional and technical spec for supply chain logistic modules.

Education

Master of Computer Application – Bharathidasan University
Bachelor of Science in Physics – University of Madras

Certifications

Databricks Certified Data Analyst Associate
Microsoft Certified Azure AI Fundamentals
