Summary

Emerging technology professional with experience in cloud-based data solutions, healthcare analytics, and end-to-end pipeline development in Azure. Strong analytical mindset with a track record of optimizing SQL/ETL workflows, building KPI dashboards, and collaborating with cross-functional stakeholders to deliver data-driven insights. Recognized for leadership in academic performance and team-based projects; eager to contribute to innovation in healthcare technology and grow within a structured leadership development program.

Experience

Data Engineering Intern Ascension Healthcare

May 2024 - Aug 2024
Indianapolis, Indiana

- Designed and optimized SQL-based **data ingestion and transformation pipelines** using **Azure Log Analytics** and **Stream Analytics**, improving system performance and integration speed across business units.
- Implemented schema changes and advanced SQL tuning, enhancing pipeline throughput by 40%.
- Delivered stakeholder-facing **Power BI dashboards** visualizing KPIs, resource usage, and operational trends.
- Automated data validation, cleaning, and **quality workflows** to standardize datasets and reduce inconsistencies by 30%.
- Integrated Microsoft Graph and Defender APIs to enable **real-time security alerting and system health monitoring**, improving anomaly detection accuracy and reducing manual troubleshooting efforts by 25%.
- Collaborated with cross-functional teams to align on reporting, monitoring, and data accuracy goals.

Technical Skills

Cloud Platforms & DevOps Tools: Microsoft Azure (Log Analytics, Event Hubs, Stream Analytics), Google Cloud, Git/GitHub

Development Tools & IDEs: Visual Studio Code, WebStorm, Replit, Eclipse, IDLE, Jupyter Notebook, Cloud Shell

Programming Languages & Scripting: Python, Pandas, JavaScript, HTML, CSS

Databases & Query Languages: MySQL, NoSQL (Firestore, BigQuery), OracleSQL, KQL, Entity-Relationship Modeling

Data Analysis & Productivity Software: ETL, Power BI, KPI Tracking, API Integration, JSON, Agile Methodologies, Computer Architecture, Microsoft (Excel, Word, PowerPoint), Data Analysis & Visualization, CI/CD

Technical Projects

Amazon Price Monitor

Python, Requests, BeautifulSoup, Automation, Email Alerts

- Scraped product data from Amazon and automated price monitoring using Python, Requests, and BeautifulSoup, with email alerts triggered via API integration.

Retail Inventory & Customer Management System

MySQL, ER Modeling, SQL Optimization

- Designed and implemented a fully normalized (3NF) relational database schema to efficiently manage inventory, customer rewards, order history, and tiered discount structures for a simulated clothing retail brand, ensuring scalable data integrity.
- Created schema, diagrams, and SQL scripts for business logic enforcement and performance reporting.

Twitter Data Scraper – Real-Time Tweet Collection & Analysis

Python, Tweepy, Pandas, REST APIs, Rate Limiting

- Extracted real-time tweets, applied **pattern analysis and descriptive statistics**, and generated reports on engagement trends.
- Implemented credentialed API access, automatic rate limit handling, and secure data collection.
- Transformed and stored tweet data (likes, retweets, timestamps) into CSVs for downstream analysis

Education

Purdue School of Engineering & Technology

Bachelor of Science: Computer Information Technology

Aug 2021 - May 2025

Cumulative GPA: 3.94

- Dean's List (All 8 Semesters), Member of ALD & PES Honor Societies
- Relevant Coursework:** Cloud-Based Application Development, Systems Analysis & Design, Quantitative Analysis, Data Management & Modeling, Python Programming, ETL-Based Development
