

Madhurima Pal

Business Analyst

NJ,USA | (818) 877-5143 | Madhurimapal22@gmail.com | LinkedIn

Summary

Business Analyst with around 5 years of experience in digital product development, delivering engaging customer and associate-facing solutions across healthcare, supply chain, and pharma domains. Skilled in data-driven decision making, business acceptance testing, and Agile squad collaboration to define MVPs and deliver measurable business outcomes. Proficient in SQL, Snowflake, Tableau, Power BI, and Adobe Analytics with expertise in story writing, UAT, and product documentation. Adept at influencing cross-functional teams and ensuring compliance with regulatory standards. Experienced in cross-functional collaboration, stakeholder alignment, digital transformation, and process re-engineering across healthcare and service domains.

Technical Skills

- **Methodologies:** Agile, Scrum, Waterfall, SDLC, Business Process Improvement, Lean Six Sigma, Change Management, APICS CPIM, Root Cause Analysis, SWOT
- **Digital Product Development:** Use Case Development, Story Writing, MVP Definition, Business Acceptance Testing, A/B Testing, Product Documentation
- **Stakeholder & Project Management:** Stakeholder Communication, Jira, Confluence, Smartsheet, MS Project, Asana
- **ERP Systems:** SAP EWM, SAP TM, SAP IBP, Oracle ERP Cloud, Microsoft Dynamics 365
- **Agile & Collaboration:** Agile/Scrum, Jira, Confluence, Squad Collaboration, Stakeholder Influence, Regulatory & Compliance Alignment
- **Data Analysis & Visualization:** SQL (T-SQL, PL/SQL, PostgreSQL, Redshift, BigQuery, Snowflake), Power BI (DAX, Power Query), Tableau, Adobe Analytics, Excel (VBA, Advanced Modeling)
- **Supply Chain & Procurement:** Inventory forecasting, supplier negotiation, demand planning, purchasing strategies
- **Logistics & Compliance:** Shipping coordination, global freight management, ISO 9001 compliance
- **Business Intelligence & Dashboards:** Power BI, Tableau, Excel (Pivot Tables, Power Pivot), Google Data Studio
- **CRM & Customer Engagement:** Salesforce CRM, HubSpot, SAP SuccessFactors
- **Cloud Technologies:** AWS, Microsoft Azure, Google Cloud Platform (GCP), Azure DevOps
- **Customer Experience & Engagement:** Digital Solutions Strategy, Client Readiness & Adoption, Post-Launch KPI Measurement, Continuous Feedback Loop
- **Automation & Monitoring:** ServiceNow (ITSM, ITOM, Event Management), Cognos Analytics, Dynatrace, AppDynamics
- **Documentation & Specifications:** BRD, FSD, User Stories, Use Cases, Gap Analysis, UAT Test Plans, System Configuration Guides, Flowcharts, ER Diagrams

Certifications

- SAP Analytics Cloud
- SQL for Data Analysis
- Business Analysis Fundamentals & Process Management
- Microsoft Power BI Certification
- SAP EWM, SAP TM Training
- Data Analytics & Visualization with Google

Work Experience

Bristol Myers Squibb, USA | Business Analyst | Feb 2025 – Current

- Collaborated with product managers and developers in Agile squads to define MVP scope and deliver associate-facing digital dashboards.
- Collaborated with product managers and developers in Agile squads to define MVP scope and deliver associate-facing digital dashboards.
- Participated in business acceptance testing and validated end-to-end functionality before deployment.
- Automated data quality checks, reporting processes, and validations using Excel Power Query and Macros, streamlining workflows and reducing manual reporting efforts.
- Utilized Python (Pandas, NumPy) to clean, transform, and enrich raw logistics data for predictive modeling and trend identification in supply chain outcomes and enhance strategic planning.

Stellium, USA | Business Analyst | July 2024 – Jan 2025

- Conducted detailed business process analysis for warehouse operations, inbound and outbound logistics, and transportation planning to gather and document functional requirements for SAP EWM and SAP TM modules.
- Facilitated end-to-end Integration Testing between SAP S/4HANA, EWM, and TM by validating IDoc communication, delivery status updates, and automatic freight order creation, ensuring seamless master data synchronization (Business Partners, Shipping Points, Plants).
- Created and executed User Acceptance Testing (UAT) scenarios to validate Order-to-Cash and Procure-to-Pay processes, covering PO, SO, IBD, OBD, Freight Order Planning, Shipment Execution, and Status Updates.
- Logged and tracked defects in JIRA, performed root cause analysis, and ensured issue resolution by collaborating with technical teams. Mapped business scenarios to system requirements using a Requirements Traceability Matrix (RTM) for functional and compliance alignment.

Humana, USA | Business Analyst – Healthcare | July 2023 – June 2024

- Utilized advanced Excel functions (VLOOKUP, Pivot Tables, Data Validation) to clean and preprocess large, unstructured healthcare datasets, improving data accuracy and consistency by 45%. Automated routine data cleaning tasks using Excel VBA, reducing manual errors and enhancing data integrity.
- Delivered cross-functional dashboards improving executive decision-making.
- Designed A/B testing frameworks to evaluate digital healthcare product features and analyzed adoption trends post-launch.
- Conducted exploratory data analysis (EDA) using statistical methods, forecasting a 25% increase in profitability by identifying cost-saving opportunities and improving claims accuracy.
- Managed procurement and vendor negotiations for healthcare operations, ensuring cost-effective purchasing of medical supplies and administrative resources.
- Created user stories, acceptance criteria, and detailed product documentation to support Agile squad delivery.
- Optimized inventory control processes for medical supplies and policy documentation materials, ensuring accurate tracking and reducing material discrepancies by 30%.
- Collaborated with compliance and legal teams to ensure adherence to regulatory frameworks while delivering digital solutions. Collaborated with compliance and legal teams to ensure adherence to **regulatory frameworks** while delivering digital solutions.
- Conducted Lean Six Sigma assessments, identifying inefficiencies in procurement workflows and reducing cycle time by 25%.
- Designed and implemented Power BI dashboards using DAX and Power Query to track key healthcare metrics such as claim approval rates, patient coverage trends, and provider performance.
- Leveraged Python to develop predictive models identifying high-risk patients for early intervention, enhancing patient care outcomes.
- Ensured HIPAA compliance by applying data masking techniques and maintaining data privacy standards while handling sensitive patient information.
- Collaborated with cross-functional teams (operations, IT, and finance) to gather business requirements, and translate them into BRDs, FRDs, and user stories, ensuring alignment with stakeholder needs.

Intex Technologies, India | Business Analyst – Supply Chain & Procurement | Jan 2019 – Aug 2021

- Designed and executed material planning models, improving procurement efficiency and reducing stockouts.
- Developed real-time inventory tracking dashboards in Power BI, improving visibility into stock levels and reorder points.
- Conducted supplier performance audits, ensuring alignment with quality standards and reducing procurement risks.
- Managed logistics operations, overseeing shipping, receiving, and coordination with freight forwarders to ensure smooth supply chain flow.
- Ensured compliance with ISO 9001 standards in procurement and inventory control, reducing errors and improving operational efficiency.
- Developed supplier performance tracking systems using Power BI and SQL, improving procurement efficiency and supplier transparency.
- Collaborated with cross-functional teams to streamline purchasing, planning, and logistics workflows, enhancing supply chain efficiency.
- Led predictive analytics initiatives, using Python and Power BI to forecast demand trends and optimize logistics operations.
- Conducted Root Cause Analysis (RCA) on inventory data discrepancies, implementing improved data validation methods, which reduced errors in inventory reporting by 10%.
- Streamlined reporting workflows reducing turnaround time by 25%.
- Led the transition to Microsoft Dynamics 365, integrating purchasing and inventory management for improved supply chain coordination.
- Participated in UAT testing for system rollouts, ensuring system functionality aligned with business requirements and compliance standards.

Education

Master of Science: Engineering Management California State University - Northridge, CA, USA	Aug 2021 – May 2023
Bachelor of Technology: Electronics and Communication Engineering Heritage Institute of Technology - Kolkata, India	Aug 2016 – Aug 2020
