

Mahitha Polimetla

Memphis, TN | (901) 632 - 7462 | bindukpolimetla@gmail.com | [LinkedIn](#)

Summary

Senior Data Analyst with 6+ years of experience delivering scalable analytics solutions and driving data-informed decisions in enterprise and cloud environments. Expertise in advanced SQL, Python, R, and Snowflake, with a track record of building ETL pipelines, data modeling, and interactive dashboards to optimize performance. Proven ability to partner with cross-functional teams and develop BI products that enhance decision-making and data maturity.

Work Experience

Cisco | *Senior Data Analyst*

Dec 2024 - Present

- Built and maintained interactive Tableau dashboards as data products tracking 50+ KPIs across sales, customer retention, and service delivery, improving stakeholder visibility, defining the analytics roadmap, and accelerating data-driven decisions.
- Conducted A/B testing and experimental analysis using Python and R to evaluate product and process changes, driving 15% improvements in customer engagement and operational efficiency.
- Designed and automated ETL pipelines using AWS services and Snowflake, applying data modeling techniques and warehousing best practices, enabling scalable data ingestion and transformation while reducing data processing latency by 40%.
- Implemented data quality checks, validation logic, and reconciliation processes, ensuring 99%+ accuracy in weekly and monthly reporting pipelines.
- Developed predictive models and trend forecasts as business intelligence solutions using Python and R on Snowflake and NoSQL data, improving forecast accuracy and enabling proactive decisions for senior leadership.
- Optimized complex SQL in Snowflake using CTEs and window functions to analyze 100M+ row datasets, prioritizing multiple concurrent queries and reducing query execution costs by 30% through efficient warehouse utilization.
- Designed ingestion and transformation pipelines to load semi-structured JSON data from MongoDB and DynamoDB into Snowflake, enabling unified analytics across NoSQL and cloud data sources.
- Leveraged Google Analytics to track and analyze user behavior, website traffic, and conversion metrics, generating actionable insights that improved customer engagement and informed product and marketing strategy decisions.
- Partnered with product, operations, and finance teams to foster working relationships and automate reporting and KPI tracking using Python, Snowflake, and Tableau, cutting manual effort by 50% and speeding up reporting across business units.

ADP | *Business Data Analyst*

Aug 2018 - Dec 2022

- Partnered with product, engineering, finance, and operations teams to translate business requirements (BRD/FRD) into scalable analytical solutions, directly supporting revenue operations, contributing to the data analytics roadmap, and customer lifecycle initiatives.
- Designed, optimized, and maintained complex SQL pipelines and stored procedures across large relational datasets (SQL Server, MySQL), enabling 99.9% data accuracy for executive reporting and downstream analytics.
- Built and automated end-to-end ETL workflows using Azure Data Factory and SSIS, incorporating data warehousing solutions and reducing manual data processing by 40%, improving data availability for business-critical dashboards.
- Led A/B testing, cohort analysis, and trend analysis to evaluate feature rollouts and process changes, driving data-backed recommendations that improved customer engagement and operational efficiency.
- Defined UAT test strategies and partnered with QA and engineering to validate data logic, ensuring high-quality production deployments of analytics and reporting solutions.
- Performed data quality audits, anomaly detection, and validation checks, improving reporting reliability and supporting forecasting, budgeting, and financial planning use cases.
- Developed automated dashboards and self-service reports (Excel, Power Query, macros), cutting manual reporting effort by 50%+ across multiple business units.
- Delivered executive-ready insights using KPI frameworks, cost-benefit analysis, SWOT, and gap analysis, influencing leadership decisions across operations, sales strategy, and customer experience.
- Monitored and analyzed core business KPIs, partnering with stakeholders to plan and prioritize multiple concurrent projects and surface actionable insights that contributed to a 10% improvement in operational efficiency.

Skills

- **Languages & Programming:** Python, R, SQL, Excel (VBA, Power Query)
- **BI & Visualization:** Tableau, Power BI, Looker, Adobe Analytics, Google Analytics
- **Data Engineering & ETL:** dbt, Alteryx, SQL-based ETL, SSIS, Apache Spark, Databricks, Talend, AWS Glue
- **Cloud & Data Warehousing:** Snowflake, AWS (S3, Redshift, Lambda), Azure Data Factory, Google Cloud Platform
- **Databases:** SQL Server, MySQL, Snowflake, Teradata, NoSQL (MongoDB, DynamoDB)
- **Collaboration & Tools:** Git/GitHub, Jira, Confluence, Salesforce, Agile/Scrum, Azure DevOps

Education

University of Memphis | *Master of Science, Data Science*

Aug 2023 - Dec 2024
