SUMMARY

Data-driven Supply Chain Analyst with 4+ years of experience optimizing global supply chains for industry leaders in the logistics and food & beverage sectors. Expert in leveraging advanced analytics Python, SQL, ERP systems SAP S/4HANA, IBP, and BI tools Power BI to drive multimillion-dollar cost savings, enhance forecast accuracy, and build resilient supply chains. Proven ability to lead cross-functional initiatives, translate data into actionable business intelligence, and deliver measurable improvements in inventory management, procurement, and on-time delivery performance.

SKILLS

Supply Chain Management: Demand & Supply Planning (S&OP/S&OE), Inventory Optimization, Procurement & Strategic Sourcing, Vendor & 3PL Management, Logistics & Distribution, Warehouse Operations, Cross-Functional Collaboration, Root Cause Analysis

Data Analytics & Automation: Python (Pandas, Prophet, XGBoost), SQL, ETL Processes, Data Modeling, Statistical Forecasting, Excel VBA, Data Cleansing

ERP & Planning Systems: SAP S/4HANA (MM/SD), SAP IBP, Oracle SCM Cloud, Blue Yonder, NetSuite

Business Intelligence: Power BI, Tableau, Looker Studio, KPI Dashboard Development, Executive Reporting, Scenario Modeling

Process Improvement: Lean Principles, Kaizen, Value Stream Mapping, Agile/Scrum, ABC/XYZ Analysis

EXPERIENCE

Supply Chain Analyst | DHL – United States | May 2024 – Present

- Developed and deployed Python-based demand forecasting models (Prophet, XGBoost) for a key product category, improving forecast accuracy by 19% and eliminating \$220K+ in excess inventory.
- Automated safety stock and replenishment logic within SAP IBP, driving \$1M+ in annual inventory cost reductions and improving stockout avoidance.
- Engineered real-time Power BI dashboards integrated with SAP S/4HANA, reducing daily exception handling time by 28% and providing leadership with actionable insights for faster decision-making.
- Spearheaded a transport route optimization project by analyzing shipment data and carrier performance, lowering carbon emissions by 12% and reducing fuel costs, directly supporting corporate ESG goals.
- Streamlined supplier master data and procurement workflows in SAP S/4HANA, shortening average lead times by 16% and improving purchase order accuracy.
- Facilitated monthly S&OP cycles, aligning stakeholders from logistics, operations, and finance to enhance forecast consensus and improve OTIF delivery performance to 98.5%.
- Created and maintained 3PL performance dashboards with SLA tracking, increasing delivery compliance by 15% across a network of 12 distribution centers.

Supply Chain Analyst | PepsiCo – India | Sep 2020 – Dec 2022

- Managed end-to-end S&OP cycles for a \$10M+ product portfolio across 5 categories, boosting forecast accuracy by 14% and providing optimized production plans to manufacturing teams.
- Utilized SQL for ABC/XYZ inventory segmentation and analysis, reducing obsolete stock by 18% and improving inventory turnover to free up working capital.
- Integrated Point-of-Sale (POS) data into SAP MM and established automated alert systems for low stock, cutting emergency purchases by 25%.
- Designed and implemented ETL pipelines to unify logistics and inventory data from multiple sources, decreasing delivery delays by 17%.
- Led a Kaizen event for warehouse layout and picking process improvements, generating \$150K in annual labor and operational savings.
- Automated weekly reconciliation and vendor performance reports using SQL and Excel VBA, saving 12+ hours of manual effort per week and reducing data entry errors by 35%.
- Developed vendor scorecard dashboards in Power BI, providing data-driven insights that improved negotiation leverage and supplier fulfillment rates by 10%.
