

RITHIKA REDDY BANDA

Data Analyst

Email: rithikareddybanda2@gmail.com **LinkedIn:** <https://www.linkedin.com/in/rithikareddy/> **Mobile:** +1 469-774-8584

Place: United States (Open to relocate)

Summary

Results-oriented Data Analyst with 2+ years of experience transforming complex data into actionable insights across financial and healthcare domains. Skilled in data visualization, cloud data platforms, and building scalable analytics solutions. Proficient in SQL, Python, Power BI, and Databricks with a strong foundation in ETL, dashboarding, and real-time data pipelines. Adept at working in Agile environments and delivering business intelligence for strategic decision-making, with a strong understanding of financial planning and analysis and identifying trends.

Technical Skills

- Languages:** Python, SQL, Java, JavaScript, R, Scala.
- Data Visualization:** Power BI, Tableau, Looker, Seaborn, Matplotlib, QlikView.
- Big Data & ETL:** PySpark, Airflow, Kafka, Databricks, Snowflake, Azure Synapse, GCP Dataflow.
- Cloud & Databases:** AWS (Redshift, S3), Azure, GCP, PostgreSQL, SQL Server, MongoDB, Oracle.
- Tools & Compliance:** Git, Docker, Jupyter, REST APIs, CI/CD, HIPAA, HITECH Act.

Professional Experience

Capital One Financial **Aug 2024 – Present**
Data Analyst.

- Led the design of scalable analytics pipelines supporting real-time consumer transaction intelligence, processing 1M+ daily events to enable faster business and risk decisions across multiple product lines.
- Engineered streaming and batch ETL workflows using Databricks, PySpark, Kafka, and AWS Redshift, improving data availability by 35%—critical for time-sensitive executive and operational reporting and supporting continuous improvement.
- Translated high-volume behavioral data into standardized KPIs that empowered leadership to identify usage trends, anomalies, and performance gaps 30% faster, directly accelerating strategic planning cycles and supporting financial planning and analysis.
- Optimized SQL-based analytical models and PostgreSQL schemas through indexing and query tuning, increasing dashboard responsiveness by 25% for business stakeholders and enhancing operational analysis.
- Integrated external REST APIs and automated CI/CD pipelines with Git, reducing data ingestion errors by 45% and cutting production release timelines by 50%, ensuring analytics reliability at scale and demonstrating strong analytical skills.
- Delivered executive-facing Power BI and Tableau dashboards that transformed raw event data into actionable insights tied to revenue impact, operational efficiency, and forecasting accuracy, leveraging business intelligence tools.

Hexaware Technologies **Mar 2022 – Dec 2022**
Data Analyst, Chennai, India.

- Modernized fragmented legacy data pipelines by developing unified batch and streaming workflows using GCP Dataflow, Snowflake, and Python, reducing data latency by 40% across enterprise reporting systems and supporting continuous improvement.
- Standardized complex domain datasets into analytics-ready models, enabling consistent KPI tracking and cross-functional reporting across operations and leadership teams, identifying trends and supporting data-driven insights.
- Architected compliant, production-grade data lakes with automated metadata validation, ensuring data accuracy, trust, and auditability for regulated business environments, demonstrating attention to detail.
- Automated executive dashboards in Power BI and QlikView, shortening reporting cycles by 20% and enabling faster insight delivery for operational and financial decision-makers, utilizing business intelligence tools.

Projects

Road Accident Data Analysis Dashboard **Aug 2024 – Oct 2024**

- Needed to identify risk factors across 25,000+ road accident records to support safety policy and identify trends.
- Performed EDA using Python/SQL and built an interactive Power BI dashboard with optimized DAX measures and filters, demonstrating strong analytical skills.
- Identified a 28% spike in winter accidents and a 35% higher severity on wet roads, achieving 30% faster insight generation and supporting data-driven insights.

AI-Driven News Intelligence Dashboard **Jan 2024 – Mar 2024**

- Required a real-time system to monitor sentiment trends across 10,000+ news records and identify trends.
- Built a Microsoft Fabric-connected dashboard using NLP-driven sentiment scoring and configured real-time alerts via Data Activator, utilizing artificial intelligence.
- Improved response time to negative sentiment spikes by 30% through automated threshold-based reporting, supporting continuous improvement.

Education

Master of Information Systems

Saint Louis University, Missouri

Jan 2023 – Dec 2024

Bachelor of Science in Computer Science

Alphores Women's Degree College, India

Jul 2019 – Jun 2022

Certifications

- Microsoft Certified: Power BI Data Analyst Associate
- Google Data Analytics Professional Certificate
- IBM Data Analyst Professional Certificate
