

SHAMBHU PRASAD

Senior Data Modeler | 9789430893 | shambhuprasad0198@gmail.com |
<https://www.linkedin.com/in/shambhuprasad01/>

PROFESSIONAL SUMMARY

Data Modeler with **4 years of experience** in scalable data architecture. Expert in **Conceptual, Logical, and Physical modeling** for RDBMS and Cloud Warehouses. Proven track record of bridging business requirements and technical specs to improve query performance by **30%** and streamline data governance. Analytical Data Modeler designing scalable architectures in high-growth environments. Skilled at bridging the gap between raw data engineering and business intelligence, resulting in a **40% reduction in query latency** and enhanced data democratization.

TECHNICAL SKILLS

- **Modeling:** Dimensional (Kimball), Relational (Inmon), Data Vault 2.0, 3NF, Star/Snowflake Schema.
- **Tools:** Erwin, ER/Studio.
- **Data Tech:** AWS Redshift, Big Query, PostgreSQL, SQL Server, MongoDB.
- **Engineering:** Advanced SQL, Python, Airflow.
- **Governance:** Data Dictionaries, STTM, Metadata Management, Lineage.

PROFESSIONAL EXPERIENCE

Senior Data Modeler | *Tata consultancy services* -| April 2021– October 2025

- **Cloud Migration:** Led LDM design for migrating 200+ entities from SQL Server to Snowflake.
- **Reporting Optimization:** Designed a Marketing Star Schema that reduced reporting lead time by **50%**.
- **Data Integrity:** Partnered with Engineers to implement **SCD Type 2** logic for historical auditing.
- **Stakeholder Alignment:** Led JAD sessions to translate business KPIs into functional physical models.
- **Performance Tuning:** Developed PDMs for OLTP systems handling **500k+ daily transactions** via optimized indexing/partitioning.
- **Legacy Modernization:** Reverse-engineered legacy DBs to create ER diagrams and missing documentation.

- **Cost Efficiency:** Resolved redundancies by normalizing to **3NF**, reducing storage costs by **15%**.
- **Impact Analysis:** Managed schema changes to ensure zero downtime for Tableau/Power BI dashboards.

Projects

Centralized Logging Setup, Log Ingestion & Pipeline Design 18 Months-

- Implemented ELK stack (Elasticsearch, Logstash, Kibana) to establish centralized log management across microservices and Kubernetes clusters, increasing system monitoring and troubleshooting efficiency by 30%.
- Integrated logs from application pods, Nginx ingress controllers, system logs, and cloud services to enable comprehensive log aggregation and detailed analysis.
- Developed and optimized Logstash pipelines utilizing Grok, JSON, and Mutate filters to parse, enrich, and normalize diverse application logs, enhancing data consistency and reliability.
- Configured and deployed Filebeat, Fluentd, and Fluent Bit as scalable log shippers across Kubernetes nodes and containers, ensuring real-time, reliable log collection and delivery

EDUCATION & CERTIFICATIONS

- **B.Tech in Electronics/Telecommunication** | SRM Institute of Science & Technology, Chennai (2020) | 78%
- **Certified Data Analyst** | IIT Guwahati
- **Specialized Training:** Terraform, Azure DevOps, and Monitoring with Elasticsearch, Kibana, APM & Beats
