

CHINMAYI GUNDLAPALLI

gchinmayi47@gmail.com | +1 513-302-8624

PROFESSIONAL SUMMARY

Senior Data Analyst with 3 years of experience delivering analytics, KPI frameworks, and executive reporting across healthcare, staffing, and operations. Strong in SQL-driven analysis, Python-based data processing, and BI dashboards that translate complex business questions into clear, actionable insights. Proven impact in improving data quality, optimizing performance, and enabling leadership decisions in regulated and high-volume environments.

TECHNICAL SKILLS

- **Advanced Analytics & Programming:** SQL (Window Functions, CTEs, Subqueries, Performance Tuning), Python (Pandas, NumPy), Excel (Power Pivot, Power Query, Advanced Formulas), PySpark
 - **Business Intelligence & Visualization:** Tableau, Power BI, Looker, KPI Dashboards, Executive Scorecards, Data Storytelling, Ad-hoc Reporting
 - **Analytics Engineering & Data Modeling:** ETL / ELT, Analytical Layer Design, Star & Snowflake Schemas, dbt, Data Validation, Data Quality Frameworks
 - **Data Platforms & Warehousing:** Snowflake, Amazon Redshift, BigQuery, Azure Synapse, SQL Server, PostgreSQL, MySQL
 - **Cloud & Collaboration Tools:** AWS (S3, Glue, Lambda), Azure (ADF, Blob Storage), GitHub, CI/CD, Docker (basic)
 - **Domain Expertise:** Healthcare Analytics (HIPAA), Recruitment & Staffing Analytics, Operations & Performance Analytics
-

PROFESSIONAL EXPERIENCE

Senior Data Analyst | Pamten Inc – Remote | Aug 2025 – Present

- Led **end-to-end analytics initiatives** for recruitment and staffing operations, supporting leadership decisions on hiring efficiency, candidate quality, and pipeline health.
- Designed **analytical data models** to process and analyze **10,000+ candidate and job records per execution**, ensuring consistent, analysis-ready datasets.
- Performed **deep SQL-driven analysis** to identify trends in candidate sourcing, job matching accuracy, recruiter productivity, and application conversion rates.
- Built Python-based data transformation workflows to normalize unstructured resume and job posting data into structured analytical dimensions and fact tables.
- Defined and implemented **business KPIs** including time-to-fill, candidate-to-interview ratio, job success rate, and recruiter throughput metrics.
- Engineered robust **data quality frameworks**, including validation rules, deduplication logic, and anomaly checks, reducing duplicate records by **20%**.
- Automated recurring reports and analytical extracts to support dashboards, CRM tools, and leadership scorecards.
- Developed **enterprise-grade Tableau and Power BI dashboards** delivering real-time insights into recruitment workflows, adopted by **50+ operational and leadership users**.
- Collaborated closely with stakeholders to interpret analytical findings, explain trends, and recommend data-backed operational improvements.
- Implemented logging, monitoring, and auditability mechanisms to ensure analytics accuracy during high-volume processing.

Environment: Python, SQL, Pandas, Excel, Tableau, Power BI, AWS S3, REST APIs, GitHub

Senior Data Analyst – Healthcare Analytics

Elevance Health – Atlanta, GA | Jul 2024 – May 2025

- Conducted **advanced analytical assessments** on large-scale healthcare claims and operational datasets to identify inefficiencies, cost drivers, and risk patterns.
- Designed **analytics-ready fact and dimension tables** using SQL and PySpark to support enterprise reporting and self-service analytics.
- Built and maintained **executive dashboards** in Power BI and Tableau tracking healthcare KPIs such as claims processing efficiency, system stability, and operational utilization.

- Performed root cause analysis on data inconsistencies and system failures, contributing to remediation of the **top three causes of application crashes**.
 - Optimized complex SQL workloads in **Snowflake and Azure Synapse**, reducing dashboard refresh times and improving analyst productivity.
 - Partnered with data engineering teams to redesign ELT workflows in **Azure Data Factory**, reducing job failure rates by **8%**.
 - Delivered **cost and utilization analysis** that identified operational inefficiencies, resulting in **\$75K annual savings**.
 - Ensured analytics solutions complied with **HIPAA regulations**, implementing role-based access, encryption standards, and audit-ready reporting.
 - Presented analytical findings to cross-functional stakeholders, enabling data-driven decisions across healthcare operations.
- Environment:** SQL, Python, PySpark, Snowflake, Azure Synapse, Azure Data Factory, Power BI, Tableau, AWS S3, Azure Blob Storage, HIPAA
-

Data Analyst – Operations & Logistics Analytics

Caterpillar (CAT) – Hyderabad, India | Sep 2022 – Jul 2023

- Delivered **operations and logistics analytics** by designing reporting datasets in **BigQuery** for enterprise BI consumption.
- Built **SQL-based performance dashboards** to track operational throughput, logistics efficiency, and supply chain KPIs.
- Applied query optimization and partition strategies to improve analytics query performance and dashboard responsiveness.
- Analyzed high-volume operational and IoT datasets using **Databricks and Delta Lake**, supporting real-time and historical trend analysis.
- Partnered with business analysts and operations teams to translate reporting needs into structured analytical datasets.
- Supported modernization of legacy analytics pipelines, improving data availability and trust for decision-making teams.

Environment: SQL, Python, BigQuery, Google Cloud Composer, Databricks, Delta Lake, Apache Spark, Airflow

Data Analyst Intern

Code Prism Technologies – Hyderabad, India | Jan 2022 – Aug 2022

- Supported enterprise analytics by performing SQL-based analysis on batch and streaming datasets.
- Designed **Tableau dashboards** visualizing KPIs, operational metrics, and performance trends for stakeholders.
- Created analytical extracts from multiple source systems to support reporting and decision-making.
- Implemented data validation checks and reconciliation processes to improve reporting accuracy.
- Assisted senior analysts with ad-hoc analysis, insights generation, and executive reporting support.

Environment: SQL, Python, Tableau, Excel, Azure Data Factory, Kafka, Azure Cloud

EDUCATION

Master of Engineering in Computer Science | University of Cincinnati | May 2025

Bachelor of Engineering in Computer Science | Sathyabama University | May 2023

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
- Google Data Analytics Professional Certificate
- Data Analytics & Visualization – Accenture (Forage)
- Cisco Certified Data Science Essentials
