

Pranati Bathina Business Data Analyst

+1 (667) 770-2644 | pranatibathina90@gmail.com | [Linked In](#)

SUMMARY

Business Data Analyst with 4+ years of experience delivering **data-driven insights, predictive analytics, and operational reporting** in healthcare and enterprise domains. Proven expertise in **SQL, Python, Power BI, Tableau, Snowflake, Azure SQL, and Alteryx**, with a strong focus on **ETL pipeline development, KPI tracking, and data governance**. Skilled in **healthcare data standards (ICD-10, SNOMED CT) and regulatory compliance (HIPAA, HITECH, CITI)**, ensuring accurate, auditable, and actionable analytics. Adept at translating complex datasets into **business intelligence dashboards, forecasting models, and process optimizations** that support leadership decision-making, improve operational efficiency, and drive revenue growth. Strong collaborator with experience partnering with cross-functional teams to deliver **scalable analytics solutions** across finance, marketing, and clinical operations.

SKILLS

Data Analysis & Visualization: SQL, Python (Pandas, NumPy), Power BI, Tableau, Excel (Power Query, VBA), Alteryx

Data Management & Cloud Platforms: Snowflake, Azure SQL, SAP, EHR Systems, ETL Development, Data Pipelines

Advanced Analytics & Modeling: Predictive Modeling, Trend Analysis, Regression, Time-Series Forecasting, KPI Design, Variance Analysis

Healthcare Domain Expertise: ICD-10, SNOMED CT, HIPAA Compliance, HITECH Act, CITI Training

Data Governance & Process Optimization: Data Quality, Documentation, Automation, Operational Reporting, Audit Readiness

Soft Skills: Stakeholder Collaboration, Business Storytelling, Cross-Functional Communication, Problem Solving

EXPERIENCE

Business Data Analyst | Accenture

Jan 2025 – Present | Remote, USA

- Lead the **Patient Analytics Automation Pipeline project**, integrating cloud data from **Snowflake and Azure SQL** to deliver actionable insights for product, finance, and marketing teams serving 50K+ patients.
- Develop and maintain **Power BI and Tableau dashboards** tracking KPIs including revenue, patient inflow, churn, and operational metrics, improving leadership visibility and decision-making efficiency.
- Build **end-to-end data pipelines using SQL, Python, and Alteryx**, automating 15+ recurring reports and dashboards, reducing manual effort by **50%** and improving accuracy of clinical and operational reporting.
- Conduct **predictive modeling and trend analysis** using regression and time-series techniques to forecast patient volumes and revenue cycles, increasing forecast accuracy by **18%**.
- Partnered with data engineering teams to implement **data quality and governance controls**, ensuring consistent, accurate, and auditable data across Snowflake and Azure SQL environments.
- Applied **healthcare domain expertise** including ICD-10, SNOMED CT, HIPAA, and CITI Training to validate patient data, support compliance reporting, and improve analytics integrity for clinical and financial operations.

Business Data Analyst | Infosys

Jan 2020 – Jun 2023 | India

- Led the **Revenue Cycle Optimization Dashboard project**, collecting and analyzing **80K+ patient and claims records** from SAP and EHR systems, ensuring full compliance with **HIPAA, HITECH Act, and CITI training standards**.
- Designed and deployed **10+ interactive Power BI dashboards** monitoring patient volumes, operational KPIs, and revenue cycles, reducing reporting time by over **40%** and enabling management to identify inefficiencies.
- Developed **ETL workflows using Python (Pandas, NumPy) and Power Query**, automating recurring data transformations for monthly reports and saving **30+ hours per reporting cycle**.
- Conducted **ICD-10 and SNOMED CT mapping and validation**, improving the accuracy of diagnosis and procedure coding for 100K+ patient records, enhancing analytics reliability for clinical and finance teams.
- Collaborated with cross-functional teams to **translate business requirements into actionable analytics**, delivering insights that improved claims processing efficiency by **12%** and reduced revenue leakage by over **\$150K annually**.
- Performed **variance analysis and trend forecasting** to support cost optimization initiatives and operational planning, contributing to data-driven decision-making across finance and clinical operations.
- Created and maintained **data governance and documentation standards**, ensuring data integrity, lineage tracking, and audit readiness across multiple reporting systems.

EDUCATION

Master of Professional Studies in Health Information Technology

University of Maryland Baltimore County

Aug 2023 – May 2025 | Baltimore, MD
