SUMMARY

Analytical and detail-driven Data Analyst with 3+ years of experience delivering data-driven insights across finance and healthcare domains. Proficient in Python, SQL, Power BI, and ETL pipelines to enable strategic decision-making. Experienced in designing automated dashboards, predictive models, and reporting infrastructures that enhance accuracy, compliance, and business performance. Proven ability to translate complex datasets into actionable insights, improve data quality, and support evidence-based financial and clinical decision processes.

TECHNICAL SKILLS

Programming & Data Analysis: Python (Pandas, NumPy, Matplotlib, Seaborn), R, SQL (CTEs, Window Functions, Optimization), Excel (PivotTables, VBA), Statistical Modeling, Hypothesis Testing, Regression Analysis, Data Cleaning & Transformation

Data Visualization & Reporting: Power BI, Tableau, Looker Studio, Excel Dashboards, KPI Design, Trend Forecasting, Drill-Down Analysis, Interactive Reports, Executive Dashboards, Storytelling with Data

Data Management & ETL: ETL Pipelines, Data Wrangling, Data Validation, Data Quality Assurance, Data Integration (APIs, Flat Files, Databases), Data Modeling, Metadata Management, Automated Data Refreshes

Finance Domain Expertise: Financial Data Analysis, Revenue Forecasting, Profitability Analysis, Risk & Compliance Reporting, Expense Monitoring, Credit Risk Analysis, Investment Performance Tracking, Financial KPIs (ROE, ROI, NPV, IRR)

Healthcare Domain Expertise: Patient Data Analytics, Claims & Billing Analysis, EHR/EMR Data Handling, HIPAA Compliance, Clinical Trial Metrics, Healthcare Cost Optimization, Population Health Analytics, Patient Outcome Tracking

Tools, Databases & Cloud: Snowflake, PostgreSQL, MySQL, MS SQL Server, Azure Data Studio, AWS (S3, Athena, QuickSight), Google BigQuery, Jira, Confluence, Git, Data Documentation & Version Control Audit Support

PROFESSIONAL EXPERIENCE

Data Analyst, McKesson

Aug 2024 – Present | Remote, USA

- Designed Power BI dashboards for patient outcomes and treatment efficacy tracking, increasing clinical visibility by 34% and enabling strategic intervention across multiple hospital departments.
- Utilized R and Python for patient data analysis, uncovering 18% efficiency improvements in healthcare cost allocation and contributing to optimized patient care delivery strategies.
- Developed ETL pipelines to process EMR and claims data, ensuring 99% data accuracy and full HIPAA compliance through automated metadata validation and error-handling mechanisms.
- Performed statistical analysis on clinical trial datasets, improving treatment impact measurement processes by 26% and enabling faster decisions for healthcare quality improvement initiatives.
- Created Looker Studio dashboards to visualize population health trends, providing stakeholders with actionable insights that drove a 15% reduction in redundant healthcare expenditures.
- Directed deployment of secure BigQuery-based reporting infrastructure at McKesson, establishing scalable, HIPAA-compliant analytics workflows and strengthening clinical data accessibility for national healthcare programs.
- Automated billing and reimbursement analytics using Python and SQL, identifying claim discrepancies that reduced denial rates by 21% and improved operational efficiency in hospital finance teams.

Data Analyst, Razorpay

Jan 2021 – Dec 2022 | Remote, India

- Engineered automated SQL dashboards to monitor daily transactions and financial metrics, improving data refresh efficiency by 38% and enabling leadership to track revenue performance proactively.
- Developed Python-based forecasting models for merchant revenue streams, achieving 97% accuracy in monthly projections and supporting critical financial planning and investment allocation decisions.
- Designed ETL workflows integrating APIs and databases, automating reconciliation processes and cutting manual effort by 42% while ensuring consistency in financial data reporting accuracy.
- Drove implementation of enterprise-grade Snowflake data models at Razorpay, which streamlined quarterly financial reporting workflows and accelerated revenue insights generation across merchant analytics operations.
- Built KPI tracking systems for ROI and liquidity ratios, enabling data-driven decision-making and improving profitability monitoring efficiency across multiple payment product lines.
- Automated expense variance and cost analysis using Excel Power Query, identifying 14% cost-saving opportunities through detailed financial process optimization across vendor management workflows.
- Enhanced credit risk evaluation pipelines through SQL-based anomaly detection, improving compliance accuracy by 22% and reducing manual intervention in credit portfolio reporting processes.

EDUCATION

Master of Science, University of North Texas
Information Science in Information Systems

Jan 2023 – Dec 2024 | TX, USA

Bachelor of Technology, Sri Indu College of Engineering and Technology
Information Technology

Jun 2018 – Jul 2022 | Telangana, India
